
Contents

1. Introduction	1
2. Description of the International Statistical Classification of Diseases and Related Health Problems	2
2.1 Purpose and applicability	2
2.2 The concept of a "family" of disease and health-related classifications	3
2.2.1 Diagnosis-related classifications	5
2.2.2 Non-diagnostic classifications	7
2.2.3 Information support to primary health care	9
2.2.4 International Nomenclature of Diseases	10
2.2.5 The role of WHO	11
2.3 General principles of disease classification	11
2.4 The basic structure and principles of classification of the ICD	12
2.4.1 Volumes	13
2.4.2 Chapters	14
2.4.3 Blocks of categories	15
2.4.4 Three-character categories	15
2.4.5 Four-character subcategories	16
2.4.6 Supplementary subdivisions for use at the fifth or subsequent character level	16
2.4.7 The unused "U" codes	17
3. How to use the ICD	18
3.1 How to use Volume 1	18
3.1.1 Introduction	18
3.1.2 Use of the tabular list of inclusions and four-character subcategories	18
3.1.3 Two codes for certain conditions	20

INTERNATIONAL CLASSIFICATION OF DISEASES

3.1.4	Conventions used in the tabular list	22
3.1.5	Categories with common characteristics	25
3.2	How to use Volume 3	27
3.2.1	Arrangement of the Alphabetical Index	27
3.2.2	Structure	27
3.2.3	Code numbers	28
3.2.4	Conventions	28
3.3	Basic coding guidelines	28
<hr/>		
4.	Rules and guidelines for mortality and morbidity coding	30
<hr/>		
4.1	Mortality: guidelines for certification and rules for coding	30
4.1.1	Causes of death	30
4.1.2	Underlying cause of death	30
4.1.3	International form of medical certificate of cause of death	31
4.1.4	Procedures for selection of the underlying cause of death for mortality tabulation	33
4.1.5	Rules for selection of the originating antecedent cause	33
4.1.6	Some considerations on selection rules	35
4.1.7	Examples of the General Principle and selection rules	36
4.1.8	Modification of the selected cause	42
4.1.9	The modification rules	42
4.1.10	Examples of the modification rules	44
4.1.11	Notes for use in underlying cause mortality coding	50
4.1.12	Summary of linkages by code number	62
4.2	Notes for interpretation of entries of causes of death	66
4.2.1	Assumption of intervening cause	66
4.2.2	Interpretation of "highly improbable"	67
4.2.3	Effect of duration on classification	69
4.2.4	Sequelae	70
4.2.5	Consistency between sex of patient and diagnosis	71
4.2.6	Operations	71
4.2.7	Malignant neoplasms	71
4.2.8	Rheumatic fever with heart involvement	85

4.2.9	Congenital malformations, deformations and chromosomal abnormalities	86
4.2.10	Nature of injury	86
4.2.11	Poisoning by drugs, medicaments and biological substances	87
4.2.12	External causes	88
4.2.13	Expressions indicating doubtful diagnosis	88
4.3	Perinatal mortality: guidelines for certification and rules for coding	88
4.3.1	Certification of perinatal deaths	88
4.3.2	Statement of causes of death	89
4.3.3	Tabulation of perinatal mortality by cause	92
4.3.4	Coding of causes of death	93
4.3.5	Coding rules	93
4.4	Morbidity	96
4.4.1	Guidelines for recording diagnostic information for single-condition analysis of morbidity data	97
4.4.2	Guidelines for coding "main condition" and "other conditions"	99
4.4.3	Rules for reselection when the main condition is incorrectly recorded	106
4.4.4	Chapter-specific notes	112
<hr/> 5. Statistical presentation		124
<hr/>		
5.1	Introduction	124
5.2	Source of data	124
5.3	Level of detail of cause in tabulations	124
5.4	The recommended special tabulation lists for mortality	125
5.4.1	The condensed lists	125
5.4.2	The selected lists	125
5.4.3	Use of prefixes to identify the mortality lists	126
5.4.4	Locally designed lists	126
5.5	The special tabulation list for morbidity	127
5.5.1	Description	127

INTERNATIONAL CLASSIFICATION OF DISEASES

5.5.2	Modification of the special tabulation list for morbidity according to national requirements	127
5.6	Recommendations in relation to statistical tables for international comparison	127
5.6.1	Statistical tables	127
5.6.2	Tabulation of causes of death	128
5.7	Standards and reporting requirements related to fetal, perinatal, neonatal and infant mortality	129
5.7.1	Definitions	129
5.7.2	Reporting criteria	131
5.7.3	Statistics for international comparison	131
5.7.4	Presentation of causes of perinatal mortality	133
5.8	Standards and reporting requirements related to maternal mortality	134
5.8.1	Definitions	134
5.8.2	International reporting	135
5.8.3	Published maternal mortality rates	135
5.8.4	Denominators for maternal mortality	136
5.9	Proportion of deaths classified to ill-defined causes	136
5.10	Morbidity	136
5.11	Precautions needed when tabulation lists include subtotals	137
5.12	Problems of a small population	137
5.13	"Empty cells" and cells with low frequencies	138
<hr/>		
6.	History of the development of the ICD	139
<hr/>		
6.1	Early history	139
6.2	Adoption of the International List of Causes of Death	140
6.3	The Fifth Decennial Revision Conference	143
6.4	Previous classifications of diseases for morbidity statistics	144
