| <i>Message from the Director-General</i> | vi |
| <i>About this book</i> | viii |
| <i>Abbreviations and acronyms</i> | x |
| <i>Units of measurement</i> | xiv |
| Chapter 1: A New Perspective on Health | 1 |
| 1.1 How are we doing? | 1 |
| 1.2 Five years since the Earth Summit | 4 |
| 1.3 Environmental threats to human health | 6 |
| 1.4 A health-and-environment cause-effect framework | 7 |
| 1.5 Relevant information for decision-making and action | 10 |
| 1.6 Finding solutions to environmental health problems | 12 |
| 1.7 Supportive environments for health | 13 |
| 1.8 Power and participation for both men and women | 13 |
| 1.9 Intersectoral actions for a healthy environment | 14 |
| 1.10 Health for All: the way ahead | 16 |
| Chapter 2: Driving Forces Behind Current Health-and-Environment Trends | 19 |
| 2.1 The driving forces concept | 19 |
| 2.2 Population dynamics | 20 |
| 2.2.1 Population growth and its relation to environment | 20 |
| 2.2.2 Population structure and changing health concerns | 21 |
| 2.2.3 Population movement: increasing numbers | 22 |
| 2.3 Urbanization | 23 |
| 2.3.1 Urban growth: scale and pace | 24 |
| 2.3.2 Growth of urban slums | 24 |
| 2.4 Poverty and inequity | 25 |
| 2.4.1 The poverty-environmental degradation link | 26 |
| 2.4.2 Displaced and impoverished groups | 27 |
| 2.4.3 Status of women: poverty, patriarchy and diminishing resources | 28 |
| 2.5 Science and technology | 29 |
| 2.5.1 Research for health and environment | 29 |
| 2.5.2 Appropriate technology | 30 |

| | | | |
|--|-------|--|-----------|
| | 2.5.3 | Technology transfer, adaptation and redesign | 31 |
| | 2.5.4 | Information and communication technology | 33 |
| 2.6 | | Consumption and production patterns | 34 |
| | 2.6.1 | Changes in diet: environmental implications | 34 |
| | 2.6.2 | Consumption of raw materials and persistent chemicals | 35 |
| | 2.6.3 | Burning of fossil fuels | 36 |
| 2.7 | | Economic development | 37 |
| | 2.7.1 | Economic development as a driving force | 37 |
| | 2.7.2 | Economic development trends and environmental hazards | 39 |
| | 2.7.3 | Trade development | 39 |
| | 2.7.4 | Economic resources for health-and-environment protection | 41 |
| 2.8 | | The foundations of sustainability | 43 |
| | | | |
| Chapter 3: Major Human Activities Affecting Environmental Quality | | | 45 |
| 3.1 | | How driving forces create environmental pressures | 45 |
| 3.2 | | Household wastes | 45 |
| | 3.2.1 | Human excreta: little or no treatment | 46 |
| | 3.2.2 | Solid wastes from households: levels increasing | 49 |
| 3.3 | | Fresh water | 50 |
| | 3.3.1 | Global freshwater resources: limited, uneven and subject to pressure | 50 |
| | 3.3.2 | Global freshwater use: demand inequity | 51 |
| | 3.3.3 | Freshwater scarcity: of growing proportions | 52 |
| | 3.3.4 | Freshwater pollution: a new problem every decade | 53 |
| | 3.3.5 | The marine environment: land-based pressures | 55 |
| | 3.3.6 | Hydrology and aquatic environments: integrated planning needed | 55 |
| 3.4 | | Land use and agricultural development | 57 |
| | 3.4.1 | Competition for land | 57 |
| | 3.4.2 | Agricultural development and environmental changes | 59 |
| | 3.4.3 | Soil degradation: sources and effects | 60 |
| 3.5 | | Industrialization: improved prospects and adverse consequences | 62 |
| | 3.5.1 | Emissions, waste and natural resource use | 63 |
| | 3.5.2 | Industrial accidents and health-and-environment impacts | 67 |
| | 3.5.3 | Industrial activity trends | 68 |
| | 3.5.4 | Industry and sustainable development: evolving together | 68 |
| 3.6 | | Energy | 71 |
| | 3.6.1 | Energy dependency | 71 |
| | 3.6.2 | Household use of biomass and coal: impairing indoor air quality | 72 |
| | 3.6.3 | Pollution from use of fossil fuels in power stations, industry and transport | 74 |
| | 3.6.4 | Hydropower: population dislocation and ecological change | 76 |
| | 3.6.5 | Nuclear energy: maintained vigilance needed | 76 |
| 3.7 | | Considerable threats to environmental quality and health | 78 |

Chapter 4: Poor Environmental Quality, Exposures and Risks 81

| | | |
|-------------|---|------------|
| 4.1 | The human dimension to environmental quality | 81 |
| 4.2 | Air pollution | 81 |
| 4.2.1 | Urban ambient air quality: often poor | 82 |
| 4.2.2 | Indoor air pollution: “rule of one thousand” | 84 |
| 4.2.3 | Human exposures to particulate air pollution | 84 |
| 4.2.4 | Health risks of air pollution | 86 |
| 4.2.5 | Environmental tobacco smoke: on the increase | 89 |
| 4.2.6 | Ionizing radiation: natural and human-caused exposure | 90 |
| 4.2.7 | Air quality management: many factors | 92 |
| 4.3 | Household wastes | 93 |
| 4.3.1 | Health risks of inappropriate excreta disposal | 93 |
| 4.3.2 | Health risks of solid waste | 94 |
| 4.4 | Water | 96 |
| 4.4.1 | Water supply access and equity | 97 |
| 4.4.2 | Sustainability of water supply and sanitation services | 98 |
| 4.4.3 | Environmental health risks of water pollution | 99 |
| 4.4.4 | Chemicals in drinking-water | 101 |
| 4.4.5 | Public health risks from recreational use of water | 102 |
| 4.4.6 | Water related vector-borne diseases | 103 |
| 4.5 | Food | 104 |
| 4.5.1 | Biological hazards in food | 105 |
| 4.5.2 | Chemical and radioactive hazards in food | 108 |
| 4.6 | Soil | 111 |
| 4.7 | Housing | 113 |
| 4.7.1 | The importance of housing for health | 113 |
| 4.7.2 | Extent of the problem | 114 |
| 4.7.3 | Crowding | 115 |
| 4.7.4 | Accidents and injuries | 115 |
| 4.7.5 | Building materials and construction-related problems | 116 |
| 4.7.6 | Indoor air pollution | 117 |
| 4.7.7 | Pests | 117 |
| 4.8 | The workplace | 117 |
| 4.8.1 | The workplace environment and economic development | 118 |
| 4.8.2 | Workplace exposures | 119 |
| 4.8.3 | Occupational health impacts | 121 |
| 4.9 | The global environment | 121 |
| 4.9.1 | From local pressures to global impacts | 121 |
| 4.9.2 | Climate change | 122 |
| 4.9.3 | Stratospheric ozone depletion and its health effects | 125 |
| 4.9.4 | Transboundary air pollution and movement of hazardous waste | 127 |
| 4.9.5 | Dealing with global environmental health problems | 128 |
| 4.10 | Combined exposures from a variety of sources | 128 |
| 4.10.1 | The concept of total human exposure | 128 |
| 4.10.2 | The example of lead | 129 |
| 4.11 | Multiple challenges for health protection | 130 |

| | |
|---|------------|
| Chapter 5: Health Conditions in an Environmental Context | 133 |
| 5.1 Estimating the burden of disease | 133 |
| 5.2 Acute respiratory infections | 136 |
| 5.2.1 One of the greatest threats to child health | 136 |
| 5.2.2 Historical trends and risk factors | 137 |
| 5.2.3 Current control strategies | 138 |
| 5.3 Diarrhoeal diseases | 138 |
| 5.3.1 The devastating results of poor sanitation | 138 |
| 5.3.2 The example of cholera | 139 |
| 5.3.3 Impact of interventions | 140 |
| 5.4 Vaccine-preventable infectious diseases | 142 |
| 5.4.1 When immunization helps stop environmental transmission | 142 |
| 5.4.2 Measles | 142 |
| 5.4.3 Neonatal tetanus | 143 |
| 5.4.4 Poliomyelitis | 144 |
| 5.4.5 Other vaccine-preventable diseases | 144 |
| 5.5 Malaria, other tropical vector-borne diseases, and newly-emerging diseases | 145 |
| 5.5.1 Debilitating diseases related to climate and ecological conditions | 145 |
| 5.5.2 Malaria | 146 |
| 5.5.3 Other vector-borne diseases | 147 |
| 5.5.4 Emerging infectious diseases: surveillance needed | 148 |
| 5.6 Injuries and poisonings | 149 |
| 5.6.1 Major causes of ill health in both children and adults | 149 |
| 5.6.2 Road-traffic accidents: a major health problem | 150 |
| 5.6.3 Occupational accidents: considerable under-reporting | 151 |
| 5.6.4 Poisonings: few reliable data | 152 |
| 5.6.5 Intentional injuries: violence | 153 |
| 5.7 Mental health conditions | 155 |
| 5.7.1 A growing health concern | 155 |
| 5.7.2 Effects of chemical and physical factors | 155 |
| 5.7.3 Effects of psychosocial factors | 156 |
| 5.8 Cardiovascular diseases | 157 |
| 5.8.1 The most common cause of death | 157 |
| 5.8.2 Social and lifestyle risk factors | 157 |
| 5.8.3 Physical environmental risk factors | 158 |
| 5.9 Cancer | 160 |
| 5.9.1 Diseases of concern at all levels of development | 160 |
| 5.9.2 Occupational cancer | 162 |
| 5.9.3 Infectious agents | 163 |
| 5.9.4 Air pollution | 163 |
| 5.9.5 Water pollution and contaminated food | 164 |
| 5.9.6 Ionizing radiation | 165 |
| 5.9.7 Non-ionizing radiation | 166 |
| 5.9.8 Environmental tobacco smoke: acute and chronic effects | 167 |

| | | |
|-------------|---|------------|
| 5.10 | Chronic respiratory diseases | 168 |
| 5.10.1 | The impacts of inhaling polluted air | 168 |
| 5.10.2 | Occupational respiratory diseases | 169 |
| 5.11 | Other diseases | 170 |
| 5.11.1 | Allergies | 170 |
| 5.11.2 | Reproductive health problems | 171 |
| 5.12 | Special features of occupational diseases and injuries | 172 |
| 5.13 | Environmental factors and the global burden of disease | 172 |

**Chapter 6: Integrated Policies, Strategies and Actions:
Progress Since The Earth Summit** **177**

| | | |
|------------|---|------------|
| 6.1 | The need for an integrated framework | 177 |
| 6.1.1 | Changing perspectives in health | 177 |
| 6.1.2 | New planning frameworks | 178 |
| 6.1.3 | New health information systems | 179 |
| 6.2 | International initiatives | 180 |
| 6.2.1 | Involvement of the UN system: institutional arrangements | 180 |
| 6.2.2 | Selected cooperative initiatives | 183 |
| 6.3 | A stronger health focus in national planning for sustainable development | 185 |
| 6.3.1 | Regional and country initiatives | 186 |
| 6.4 | A stronger health focus in local planning for sustainable development | 189 |
| 6.4.1 | Relevance at local level | 189 |
| 6.4.2 | Focus on urban areas | 189 |
| 6.4.3 | Focus on rural areas | 192 |
| 6.4.4 | Focus on islands | 193 |
| 6.5 | Integrated planning initiatives: successes and achievements | 193 |
| 6.6 | Renewing “Health for All” | 194 |

Chapter 7: Conclusions **197**

Glossary **203**

References **207**

Index **231**

Annex A **241**

Annex B **242**

| | | |
|-------------|---|------------|
| 5.10 | Chronic respiratory diseases | 168 |
| 5.10.1 | The impacts of inhaling polluted air | 168 |
| 5.10.2 | Occupational respiratory diseases | 169 |
| 5.11 | Other diseases | 170 |
| 5.11.1 | Allergies | 170 |
| 5.11.2 | Reproductive health problems | 171 |
| 5.12 | Special features of occupational diseases and injuries | 172 |
| 5.13 | Environmental factors and the global burden of disease | 172 |

***Chapter 6: Integrated Policies, Strategies and Actions:
Progress Since The Earth Summit***

| | | |
|------------|---|------------|
| | | 177 |
| 6.1 | The need for an integrated framework | 177 |
| 6.1.1 | Changing perspectives in health | 177 |
| 6.1.2 | New planning frameworks | 178 |
| 6.1.3 | New health information systems | 179 |
| 6.2 | International initiatives | 180 |
| 6.2.1 | Involvement of the UN system: institutional arrangements | 180 |
| 6.2.2 | Selected cooperative initiatives | 183 |
| 6.3 | A stronger health focus in national planning for sustainable development | 185 |
| 6.3.1 | Regional and country initiatives | 186 |
| 6.4 | A stronger health focus in local planning for sustainable development | 189 |
| 6.4.1 | Relevance at local level | 189 |
| 6.4.2 | Focus on urban areas | 189 |
| 6.4.3 | Focus on rural areas | 192 |
| 6.4.4 | Focus on islands | 193 |
| 6.5 | Integrated planning initiatives: successes and achievements | 193 |
| 6.6 | Renewing “Health for All” | 194 |
