

## Contents

<b>Executive summary</b> .....	<b>1</b>
<b>The measurement challenge</b> .....	<b>4</b>
1. Background .....	4
2. Why is maternal mortality difficult to measure? .....	4
3. How can maternal mortality be measured? .....	6
4. What were the sources of country data used for the 1995 estimates? .....	8
<b>The development of 1995 estimates of maternal mortality</b> .....	<b>9</b>
5. Why estimate maternal mortality for 1995? .....	9
6. What was the process for developing the 1995 estimates? .....	10
7. What methods were used for the 1995 estimates? .....	12
8. How does the 1995 methodology differ from that used for the 1990 estimates? .....	15
<b>Analysis and interpretation of 1995 estimates</b> .....	<b>16</b>
9. What are the results? .....	16
10. How do these estimates differ from nationally reported estimates? .....	17
11. How do these estimates differ from the WHO/UNICEF 1990 estimates? .....	18
<b>Using the 1995 maternal mortality estimates</b> .....	<b>18</b>
12. What can the 1995 estimates be used for? .....	18
13. What should the estimates NOT be used for? .....	18
14. Why can the 1995 estimates NOT be used to analyse trends? .....	20
<b>Review of progress in maternal mortality reduction</b> .....	<b>21</b>
15. What available evidence is there to assess trends in the maternal mortality ratio? .....	21
16. How can we assess progress? .....	23
17. What can we conclude about progress in reducing maternal mortality in the past decade? .....	26
<b>Where next?</b> .....	<b>27</b>
18. How can countries generate better maternal mortality information? .....	27

## Tables

<b>Table 1</b>	
WHO/UNICEF/UNFPA estimates of maternal mortality by United Nations regions (1995) .....	2
<b>Table 2</b>	
Sources of country data used in developing the 1995 estimates .....	8
<b>Table 3</b>	
Methods of producing the 1995 estimates according to data source and type .....	14
<b>Table 4</b>	
New regional estimates for 1995 compared with previous estimates for 1990 .....	19
<b>Table 5</b>	
Annual average rate of change in skilled attendant at delivery indicator for 52 countries over the period 1989-1999 .....	25

## Figures

### Figure 1

Trends in maternal mortality, 1980-1997, selected countries with vital registration in Asia, unadjusted figures ..... 32

### Figure 2

Trends in maternal mortality, 1980-1998, selected countries with vital registration in Latin America, unadjusted figures ..... 33

### Figure 3

Trends in maternal mortality, 1974-1997, selected countries with vital registration in Eastern Europe, unadjusted figures ..... 34

## Annex Tables

### Annex Table A

Maternal mortality estimates derived from vital registration: countries with good death registration and good attribution of cause of death ..... 35

### Annex Table B

Maternal mortality estimates derived from vital registration: countries with good death registration but uncertain attribution of cause of death ..... 37

### Annex Table C

Maternal mortality estimates derived from the sisterhood method: reported and adjusted estimates ..... 38

### Annex Table D

Maternal mortality estimates derived from Reproductive Age Mortality Studies (RAMOS) ..... 39

### Annex Table E

Maternal mortality estimates derived from the model (1995) ..... 40

### Annex Table F

Country estimates of numbers of maternal deaths, lifetime risk, maternal mortality and ranges of uncertainty (1995) ..... 42

### Annex Table G

Estimates of maternal mortality, numbers of maternal deaths and lifetime risk, by WHO regions (1995) ..... 48

### Annex Table H

Estimates of maternal mortality, numbers of maternal deaths and lifetime risk, by UNICEF regions (1995) ..... 48

## Appendices

### Appendix I

Countries grouped by United Nations regions, by WHO regions and by UNICEF regions ..... 49

### Appendix II

Peer review group members ..... 55
