Disparities at the household level	45
Resources for health and adjustment in times of crisis	45
Priority for health in the allocation of resources	45
The health budget	46
Equity and resources for health in times of crisis	47
The implications of adjustment policies for health	48
Chapter 2 Agriculture — food and nutrition	53
Agriculture and health — the interrelations and issues	53
The link between agriculture and health	53
Impact of agriculture on health	53
Impact of health on agriculture	54
Working together	54

The product mix in agriculture	54
Food crops before cash crops?	55
Nutritional vulnerability	55
Investment in productive or poor regions?	56
Expensive crops at the expense of health?	56
High yields or dependability?	58
Can crops with harmful effects on health be managed?	58
Foods with direct health hazards	58
Diets deficient in nutrients	58
Agricultural products with major health risks	58
Food and nutrition policies in developed countries	61
Farm labour, land systems, and technology	61
An equity-oriented agricultural strategy	61
The health of farm labourers	61
Land systems and the vulnerable groups	64
The health impact of technology	65
Macro-policies in agriculture and food	67
Making agriculture more responsive to health	69
Institutionalizing interaction between health and agriculture at the national level	69
Strengthening existing institutions	70
Improving the health information system	71
Subnational policy-making, administration and politics	72
Participation and pressure from below	72
Chapter 3 Education, culture, information and life patterns	75
Background	75
Education as a decisive factor in health improvement	75
The impact of formal education on child survival	75
Interaction between health and formal education	79
Functional literacy, non-formal education and health	79
The creative role of the school in health improvement	82
The school as the focus of health care of the young	82
The school and its role in community health	87
The school — the child's example of a healthy environment	90
Higher learning institutions and health	91
The relationships between culture and health	91
Culture-linked health risks	92
The vulnerable groups in relation to cultural change	92
Communicating health knowledge — the role of the media	95
Chapter 4 Environment — water and sanitation, habitat and industry	99
Background	99
Policy implications	100
Water and sanitation as determinants of health	101
Linkages between water, sanitation and health	101
Using and maintaining community water supplies	102
Alternative technologies	104

Housing _____	104
Hazards in urban slums and rural villages	106
Housing hazards in developed countries	108
The new problems: development, urbanization, industrialization and health _____	108
Health problems of urbanization	108
Industrialization, technological change and health	111
Economic development, water resources and health	114
Lessons learned and persistent problems _____	120
Chapter 5 Summary and conclusions _____	123
Chapter 6 Recommendations _____	127
Bibliography _____	139
Acknowledgements _____	145
Annex 1 _____	147
