<b>Introduction</b>	1
Why study costs?	1
Who will use this manual?	1
How this manual is organized	2
<hr/>	
<b>Part A. Unit financial costs</b>	<b>3</b>
<hr/>	
<b>Module 1. What are the costs?</b>	5
Cost classification	5
Classification by inputs	5
Some possible secondary classifications	7
Conclusion	9
<b>Module 2. Using cost data</b>	10
Accountability – keeping track	10
Assessing efficiency	12
Assessing equity	14
Assessing priorities	15
Making cost projections	16
Considering cost recovery	16
Tables for presenting and analysing expenditure data	17
<b>Module 3. Planning the study</b>	25
Setting the scope of the cost analysis	25
Deciding on the time period	26
Selecting a sample	26
Drawing up an itinerary and checklists	28
Locating information sources	30
<b>Module 4. Calculating costs</b>	32
Capital (nonrecurrent) resource inputs	32
Recurrent resource inputs	35
Allocating shared inputs	41
<b>Module 5. Measuring effectiveness</b>	44
Choosing an indicator of effectiveness	44
Judging the merits of measures of effectiveness	46
Measuring effectiveness	49
Locating data on effectiveness	50
Expressing measures of effectiveness	51

---

<b>Module 6. Calculating unit financial costs</b>	53
General nature of unit costs	53
Examples of unit costs	53
Uses of unit costs	54

---

<b>Part B. Cost-effectiveness analysis</b>	55
--	----

---

<b>Module 7. Measuring and using economic costs</b>	57
What are economic costs?	57
How to measure economic costs	57
How to use economic costs	61

<b>Module 8. Household costs</b>	63
What are household costs?	63
Why measure household costs?	64
How to measure household costs	66

<b>Module 9. Cost-effectiveness analysis</b>	67
Define the objectives of the programme	68
Identify the possible ways of achieving the objectives	69
Identify and measure the costs of each option	70
Identify and measure the effectiveness of each option	71
Calculate and interpret the cost-effectiveness of each option	72

---

<b>Part C. Using cost data in planning</b>	75
--	----

---

<b>Module 10. Future costs</b>	77
How to estimate future costs	77
How to use future cost estimates for decision-making	82

<b>Module 11. Financial analysis</b>	87
Applications at different levels of the health system	87
Equity	88
Affordability	88
Cost recovery	88

<b>Module 12. Managerial efficiency</b>	90
What total cost profiles reveal about efficiency	90
Some important influences on average costs and their implications for efficiency	91
Conclusion	92

---

<b>Exercises</b>	93
<b>Annualization factors</b>	142
<b>Further reading</b>	143
<b>Index</b>	145
