

TABLE OF CONTENTS

ANTIMICROBIAL AGENTS

Preparations and recommended dosing regimens by generic and trade names	1-11
Preferred antimicrobial agents for specific pathogens	12-28
Antimicrobial regimens in renal failure	29-41
Use of antimicrobial agents in hepatic disease	42
Adverse reactions by agent	43-52
Penicillin allergy and desensitization	53
Pregnancy: Adverse reactions and contraindications	54-55
Drug Interactions	56-57

PREVENTATIVE TREATMENT

Adult immunization	58-67
Prophylactic antibiotics	68
Antimicrobial agents in surgery	69-73
Endocarditis	74-76
Traveler's diarrhea	77-78

NONBACTERIAL INFECTIONS

Treatment of fungal infections	79-90
Treatment of viral infections	91-95
Treatment of tuberculosis	96-102
Treatment of parasitic infections	103-112

SPECIFIC TYPES OF INFECTIONS

AIDS	113-125
Case definition for acquired immunodeficiency syndrome	113-118
Recommendations for HIV serologic testing	119
Management of opportunistic infections in patients with HIV infection	120-125
Pathogens associated with immunodeficiency status	126
Fever of unknown origin	127
CNS infections	128-135
Cerebrospinal fluid	128-129
Meningitis	130-134
Doses of drugs for CNS infections	135
Upper respiratory tract infections	136-140
Pulmonary infections	141-145
Specimens and tests for detection of pathogens	141
Preferred antibiotics	142-145
Treatment of endocarditis	146-150
Medical management	146-148
Indications for cardiac surgery	149-150
Intra-abdominal sepsis: Antibiotic selection	151-153
Hepatitis	154-157
Infectious diarrhea	158-163
Urinary tract infections	164-167
Sexually transmitted diseases	168-179
Organisms	168-175
Syndromes - Female	176-178
Syndromes - Male	178-179
