

# Contents

- 6 **Preface**
  
- 7 **Chapter 1**  
**Immunoglobulins**
- 7 Antibody Structure
- 11 Antibody Function
- 12 Immunoglobulin Classes
- 16 Antibodies and Antigens as Reagents
- 20 Conclusion
  
- 21 **Chapter 2**  
**Reagin Allergy**
- 21 Introduction
- 21 Definition of Atopy or Reagin-Mediated Allergy
- 22 Symptoms, Disease Entities, Allergens
- 22 The Mechanism of IgE Production and Its Control
- 24 Hyposensitization Therapy
- 25 Methods for Demonstrating Atopic Conditions
- 29 Pharmacologic Mediators of Anaphylaxis and Their Release
- 34 Pharmacologic Regulation of Mediator Release and Mediator Action
  
- 38 **Chapter 3**  
**Immediate Hypersensitivity**
- 38 Introduction
- 38 Reactions Requiring Only Antibody
- 39 Reactions Requiring Antibody and Complement
- 40 Alternative Pathway of Complement Activation
- 41 Complement and Inflammation
- 43 Reactions Requiring Antibody and Macrophages
- 43 Reactions Requiring Antibody and Mast Cells
- 45 Reactions Requiring Antibody, Complement, and Mast Cells
- 47 Reactions Requiring Antibody, Complement, and Polymorphonuclear Leukocytes
- 49 Reactions Requiring Immune Complexes
  
- 51 **Chapter 4**  
**Cellular Immunology**
- 51 Two Universes of the Immune Response
- 51 Two Classes of Effector Lymphocytes – B and T
- 52 B Lymphocytes and Antibody Formation
- 57 Macrophages and Antigen Presentation
- 57 T Lymphocytes and Cell-Mediated Immunity
- 60 T-Cell Activation
- 61 Immunoregulation
  
- 62 **Chapter 5**  
**Delayed Hypersensitivity and Immunodeficiency**
- 62 Introduction
- 62 Definition of Delayed Hypersensitivity
- 63 Delayed Hypersensitivity Manifestations
- 63 How Delayed Hypersensitivity Is Established
- 64 Immunologic Specificity
- 65 Delayed Hypersensitivity: A Thymus-Dependent System
- 65 Lymph Node and Cellular Hypersensitivity
- 66 Transfer of Delayed Hypersensitivity
- 68 Histopathology
- 69 In Vitro Studies on Cellular Hypersensitivity
- 73 Clinical Aspects of Immunologic Deficiency Diseases
  
- 77 **Chapter 6**  
**Transplantation Immunogenetics of HLA**
- 77 Major Histocompatibility Complex
- 77 Schematic Map of the HLA Complex
- 78 Markers for MHC Genes
- 80 Antigens of the D Region
- 83 CD Antigens of the HLA-A, -B, -C Regions
- 83 Relationship of Serologically and Cellularly Defined Determinants
- 85 Role of MHC Antigens in Allograft Rejection
- 86 Role of Major Histocompatibility Complex Antigens in "Reactions to Syngeneic or Autologous Abnormal Cells"
- 87 Overview of the MHC
- 88 Glossary
  
- 89 **Chapter 7**  
**Transplantation Immunology**
- 89 Histocompatibility and Inheritance
- 90 Role of Transplantation Antigens
- 90 Tissue Typing
- 93 Pathophysiology of Rejection
- 94 Clinical Types of Renal Allograft Rejection
- 97 Allograft Prolongation
- 99 The Future Prospects in Clinical Transplantation

---

100 **Chapter 8**

**HLA and Diseases**

- 100 Introduction
- 107 Associations Between HLA and Disease
- 111 Diseases Linked to the HLA System
- 112 Possible Pathogenetic Mechanisms of HLA and Disease
- 112 Clinical and Practical Implications

114 **Chapter 9**

**Tumor Immunology**

- 114 Introduction
- 114 Malignant Cell Antigens
- 114 Normal and Tumor-Specific Transplantation Antigens
- 116 The Immune Response
- 117 Antibody
- 117 Cellular Immunity
- 118 The Integrated Immune Response
- 121 Human Tumors
- 122 Why Do Tumors Succeed?
- 122 Lapses in Immune Capacity
- 125 Escape From Immune Control
- 125 Suppression of the Immune Response by the Tumor
- 127 Immunotherapy
- 128 Immunotherapy of Human Cancer
- 128 Prospectus

129 **Chapter 10**

**Immunosuppression**

- 129 Introduction
- 129 Modification of the Immune-Response
- 129 Inhibition of Immunocompetent Cells
- 132 Chemical Immunosuppression
- 135 Other Therapeutic Options
- 136 Clinical Applications
- 137 Future Prospects

139 **Acknowledgments**

140 **Index**
