Foreword, v

Preface to the Third Edition, vi

1 The Postoperative Cardiac Patient, 1

2 Immediate Measures on Return to the Intensive Therapy Unit, 4

Staff; design of unit; transfer of patients to the ITU; immediate measures; clinical assessment; computer analysis

3 The Computer in Cardiac Surgical Postoperative Care, 29

N. M. KATZ & L. C. SHEPPARD

Integration of the computer systems into the postoperative care programme; measurements; computations; computer-assisted decision making; computer-regulated interventions; postoperative management of cardiovascular system; technical support and maintenance; effect of the system on patient care

4 Physiology of the Circulation, 39

Normal physiology; modifications imposed by disease

5 Low Cardiac Output, 49

Clinical diagnosis; differential diagnosis of causes of a low cardiac output; treatment

6 Hypertension, 95

Aetiology; Diagnosis; treatment

7 Blood Gas Tensions and Acid-Base Changes, 98

Blood sampling; methods of measurement and presentation of results; indications for analysis; abnormalities, their interpretation and treatment

8 Respiratory Function, 108

Causes of pulmonary dysfunction; consequences of pulmonary dysfunction; effects of IPPV; clinical management

- 9 Fluid Balance and Parenteral Nutrition, 123  
Water and sodium metabolism; potassium metabolism; magnesium metabolism; nutrition
- 10 Renal Failure, 137  
Aetiology; pathology; diagnosis; prevention; treatment of renal failure
- 11 Cerebral Damage, 152  
Aetiology; pathology; diagnosis; prevention; treatment
- 12 Hepatic Failure, 162  
Aetiology; diagnosis of liver damage; types of jaundice; treatment
- 13 Haematological Disorders, 166  
Postoperative anaemia; haemoconcentrations; complications of blood transfusion; failure of the haemostatic mechanisms
- 14 Cardiac Arrest, 176  
Aetiology; diagnosis of circulatory arrest; treatment of cardiac arrest
- 15 Infection, 190  
Infecting organisms; route of entry; prevention of infection; differential diagnosis of pyrexia; treatment of infection
- 16 Special Problems in Infancy and Childhood, 200  
M. JONES & J. STARK  
Preoperative considerations; initial postoperative management and basic procedures; cardiovascular problems; respiratory problems; fluid, electrolyte and metabolic problems; body temperature; renal problems; haematological problems; jaundice; infection; neurological problems; conclusions
- Index, 228
