Preface	ix
Contributing Authors	x
1. Value and Limitations of Cardiac Diagnostic Procedures: An Overview	1
<i>Peter F. Cohn and Joshua Wynne</i>	
I. Electrocardiography	3
2. The Resting Electrocardiogram	5
<i>Gilbert H. Mudge, Jr.</i>	
3. Ambulatory Electrocardiographic Monitoring	29
<i>Elliott M. Antman and Peter F. Cohn</i>	
4. Exercise Testing	51
<i>Peter H. Stone and Peter F. Cohn</i>	
II. Echocardiography, External Pulse Recordings, and Related Procedures	81
5. Echocardiography	83
<i>Thomas A. Risser and Joshua Wynne</i>	
6. External Pulse Recordings, Systolic Time Intervals, Apexcardiography, and Phonocardiography	121
<i>Kenneth M. Borow and Joshua Wynne</i>	
III. Radioisotopic Examination of the Heart	163
7. Radionuclide Ventriculography	165
<i>Marvin A. Konstam and Joshua Wynne</i>	
8. Myocardial Perfusion and Infarct Imaging	199
<i>Edward J. Brown, Jr., and Joshua Wynne</i>	
IV. Invasive Procedures	233
9. Bedside Hemodynamic Monitoring, Cardiac Catheterization, and Pulmonary Angiography	235
<i>Blase A. Carabello and William Grossman</i>	

10. Electrophysiologic Studies	271
Stephen C. Vlay and Peter F. Cohn	
V. Additional Diagnostic Procedures	291
11. Nonangiographic Radiologic Examination of the Heart	293
Donald P. Harrington and J. Daniel Garnic	
12. Blood Tests	333
Samuel Z. Goldhaber and Thomas W. Smith	
Index	367
