Summary	ix
I. BACKGROUND	1
The significance of the problem	1
The involvement of the World Health Organization and the Pan American Health Organization	1
II. MORTALITY AND MORBIDITY FROM ACUTE RESPIRATORY INFECTIONS	4
Mortality data - general	4
Mortality data - the Americas: recent data and comparison with data 10 years previously	9
Morbidity data	13
III. RELEVANT ANATOMICAL AND PHYSIOLOGICAL FACTORS	21
Anatomical factors	21
Pulmonary defence mechanisms	21
IV. PREDISPOSING FACTORS IN THE CHILD	23
Nutrition	23
Breastfeeding	24
Environmental factors	24
V. CLINICAL SYNDROMES OF ACUTE RESPIRATORY INFECTIONS	26
Acute nasopharyngitis	26
Acute otitis media	26
Acute pharyngotonsillitis	26
Acute laryngitis	27
Acute bronchitis	27
Acute bronchiolitis	27

Pneumonia	28
An alternative classification of ARI	29
VI. GENERAL LABORATORY DIAGNOSIS OF ACUTE RESPIRATORY INFECTIONS	31
Rapid diagnosis	32
Bacterial infections	32
Viral diseases	34
VII. ETIOLOGICAL AGENTS, DIAGNOSIS, AND PREVENTION	39
Viruses	39
Respiratory syncytial virus	39
Clinical and epidemiological features	39
Laboratory diagnosis	40
Vaccines	41
Parainfluenza viruses	41
Clinical and epidemiological features	41
Laboratory diagnosis	43
Vaccines	43
The adenoviruses	44
Clinical and epidemiological features	44
Laboratory diagnosis	45
Vaccines	45
Influenza virus	46
Clinical and epidemiological features	46
Laboratory diagnosis	47
Vaccines	48
Coxsackieviruses	50
Clinical and epidemiological features	50
Laboratory diagnosis	50
Echoviruses	50
Clinical and epidemiological features	50
Laboratory diagnosis	51
Rhinoviruses	51
Clinical and epidemiological features	51
Laboratory diagnosis	51
Vaccines	52
Coronaviruses	52
Clinical and epidemiological features	52
Laboratory diagnosis	53
Common bacterial etiological agents responsible for ARI	53

<u>Mycoplasma pneumoniae</u>	53
Clinical and epidemiological features	53
Laboratory diagnosis	56
Vaccines	56
<u>Streptococcus pneumoniae</u>	57
Clinical and epidemiological features	57
Laboratory diagnosis	58
Vaccines	58
Streptococci	59
Clinical and epidemiological features	59
Laboratory diagnosis	59
Vaccines	60
<u>Bordetella pertussis</u>	60
Clinical and epidemiological features	60
Laboratory diagnosis	61
Vaccines	61
<u>Hemophilus influenzae</u>	61
Clinical and epidemiological features	61
Laboratory diagnosis	62
Vaccines	62
VIII. TREATMENT OF ACUTE RESPIRATORY INFECTIONS	63
Treatment of the established clinical syndromes	63
Acute nasopharyngitis	63
Acute otitis media	64
Acute sinusitis	64
Acute Pharyngotonsillitis	65
Acute laryngitis	65
Acute bronchitis	65
Bronchiolitis	65
Pneumonia	65
Management taking account of site and facilities for care: the primary health care approach	66
Social factors involved	74
IX. SEQUELAE OF ARI	77
Persistent lung disease	77
Malnutrition	79
X. AREAS FOR FUTURE RESEARCH	81
Epidemiological research	81
Clinicomicrobiological correlation	84

Clinicopathological correlation	84
Follow up	86
Research on diagnostic methods	87
Research on control methods	87
Prevention	87
Vaccine development	87
Health education	90
Treatment	90
Appropriate treatment at primary care level using flowcharts, decision trees	90
New drugs and biologics	91
Health services research	92
Sociological/behavioral research	92
Basic research	93
 XI. TRAINING	 95
 REFERENCES	 96
