PREFACE . . . . .	v
NATIONAL DIABETES ADVISORY BOARD . . . . .	vii
ACKNOWLEDGMENTS . . . . .	ix
AGENDA . . . . .	xii

### TOPICS OF CURRENT BASIC SCIENCE RELEVANT TO DIABETES RESEARCH

Molecular Biology of Cell Growth Transformation by Epstein-Barr Virus--Elliott Kieff, M.D., Ph.D. . . . . .	3
Immunology--John D. Stobo, M.D. . . . . .	7
Molecular Biology of Insulin--Howard M. Goodman, Ph.D. . . . . .	9
Plasma Membrane Biogenesis--David D. Sabatini, M.D., Ph.D. . . . . .	13
Cell Growth and Differentiation--Stanley Cohen, Ph.D. . . . . .	17

### WORKGROUP REPORTS

1. Insulin-Dependent Diabetes Mellitus . . . . .	21
2. Noninsulin-Dependent Diabetes Mellitus (Including Nutrition and Obesity) . . . . .	27
3. Cardiovascular Complications . . . . .	39
4. Eye Complications . . . . .	51
5. Neurological Complications . . . . .	63
6. Kidney Complications . . . . .	79
7. Pregnancy and Fetal Malformations . . . . .	87
8. Insulin Biosynthesis and Gene Studies . . . . .	97
9. Insulin Secretion . . . . .	103
10. Hormone Action . . . . .	115
11. Transplantation . . . . .	123
12. Insulin Delivery Systems . . . . .	127

WORKGROUP MEMBERS . . . . .	135
