Preface		xvii
Chapter 1	<b>Introduction</b>	1
	Historical Review	2
	Epidemiology	3
	Etiology	5
	• Autoimmunity • Infection • Genetics	
	• Endocrinologic and Other Hypotheses	
	References	8
Chapter 2	<b>Rheumatoid Arthritis or Rheumatoid Disease? The Clinical Spectrum</b>	10
	Diagnostic Criteria	11
	The Onset of Disease	13
	Patterns of Rheumatoid Disease	14
	• Palindromic Rheumatism • Monoarthropathy	
	• Robust-type • Nonarticular and Anarthritic Rheumatoid Disease • Malignant Disease	
	Drug Therapy	18
	References	18
	Suggested Readings	18
Chapter 3	<b>Differential Diagnosis</b>	19
	Generalized Osteoarthritis (or Osteoarthritis)	20
	Seronegative Spondyloarthropathies	23

	• Ankylosing Spondylitis • Psoriatic Arthropathy • Reiter's Syndrome • Inflammatory Bowel Disease and Associated Arthropathy	29
	Juvenile Chronic Polyarthropathy	30
	Psychogenic Rheumatism	30
	Fibrositis Syndromes	31
	Polymyalgia Rheumatica	33
	Systemic Lupus Erythematosus and the Other Collagen Vascular Disorders	35
	Rheumatic Fever	36
	Polyarticular Gout	37
	Calcium Pyrophosphate Deposition Disease	39
	Viral Arthropathies	39
	Palindromic Rheumatism	39
	Hypertrophic Pulmonary Osteoarthropathy	40
	Sarcoidosis	40
	Subacute Bacterial Endocarditis	40
	Hemachromatosis and Wilson's Disease	40
	Steroid Withdrawal Pseudorheumatism	41
	Synovial Deposition Disorders	41
	References	42
	Suggested Readings	43
<b>Chapter 4</b>	<b>Articular and Extra-Articular Pathology</b>	44
	Articular Pathology	
	• Synovitis • Synovial Fluid Changes • Evidence for an Immunopathologic Mechanism for Synovitis and Joint Destruction • Ruptured Synovial Cysts	49
	Extra-Articular Pathology	
	• The Subcutaneous Nodule • Differential Diagnosis of Nodules in Rheumatic Disorders • Lymphoreticular Involvement • Cardiovascular Disease • Respiratory Disease • Renal Disease • Gastrointestinal Disease • The Blood System • Blood Vessel Involvement	52
	Suggested Readings	53
<b>Chapter 5</b>	<b>Joint Manifestations</b>	54
	Arthralgia or Arthritis	54
	Inflammation	54
	Joint Distribution	54

	Symmetry or Asymmetry	55
	Joint Stiffness	55
	The Rheumatoid Hand	56
	• Palmar Erythema • Moist Palms (Autonomic Dysfunction)	
	• Rheumatoid Nodules • Synovial Cysts • Inflamed Joints	
	• Subluxation • Ulnar Deviation • Swan-Neck Deformities	
	• Boutonniere Deformities • Trigger Fingers (Stenosing	
	Tenosynovitis) • Ruptured Tendons • Wasted Muscles	
	• Evidence of Median Nerve Entrapment • Nail-Fold	
	Vasculitis and Digital Ulcers • Opera-Glass Hand	
	• Normal Nails	
	Specific Joint Problems	62
	• The Cervical Spine • Shoulders • Hips • Knees • The Ankle	
	and Feet • Temporomandibular Joint • Other Joints	
	Suggested Readings	68
<b>Chapter 6</b>	<b>Extra-Articular Disease: General Aspects</b>	69
	A Systemic Disease	70
	Extra-Articular Manifestations	71
	Rheumatoid Nodules	71
	Increased Risk of Infection	74
	References	75
	Suggested Readings	75
<b>Chapter 7</b>	<b>Hematologic Disease</b>	77
	Anemia	77
	Felty's Syndrome	77
	Parameters • Features • Mechanism • Treatment Option	
	Neutrophil Function and Coagulation Abnormalities	80
	Thrombocytosis and Thrombocytopenia	81
	Eosinophilia	81
	Hyperviscosity Syndrome	81
	Iatrogenic Abnormalities	81
	Lymphadenopathy and Sjögren's Syndrome	82
	References	83
	Suggested Readings	84
<b>Chapter 8</b>	<b>Vasculitis</b>	85
	Rheumatoid Nodules	86
	Bland Intimal Lesions Affecting Digital Arteries	86

	Necrotizing Vasculitis	86
	Suggested Readings	88
<b>Chapter 9</b>	<b>Pulmonary Disease</b>	89
	Infection	89
	Pleurisy and Pleural Effusions	90
	Pulmonary Rheumatoid Nodules	91
	Caplan's Syndrome	92
	Diffuse Interstitial Fibrosis	93
	Changes Secondary to Sjögren's Syndrome	95
	Pulmonary Vasculitis and Hypertension	95
	Small Airways Disease (Obstructive Pulmonary Disease) and Obliterative Bronchiolitis	95
	Erosive Rib Disease	96
	Amyloidosis	96
	References	97
	Suggested Readings	97
<b>Chapter 10</b>	<b>Ophthalmologic Complications</b>	98
	A Chance Finding or a Sinister Complications?	99
	Related to the Underlying Disease or to the Treatment?	99
	Keratoconjunctivitis Sicca	100
	Episcleritis	101
	Scleritis	102
	Corneal Disease	103
	Conjunctival Disease	103
	Iridocyclitis in Juvenile Chronic Arthritis	103
	• Acute Iridocyclitis • Chronic Iridocyclitis	
	Iatrogenic Eye Disease	104
	• Corticosteroids • Chloroquine and Hydroxychloroquine • Indomethacin • Phenylbutazone • Ibuprofen • Gold	
	References	105
	Suggested Readings	106
<b>Chapter 11</b>	<b>Cardiac Disease</b>	107
	Primary, Secondary, and Iatrogenic Causes of Heart Disease	108
	Pericarditis	109
	Rheumatoid Granulomata	110

	Myocarditis	110
	Endocarditis	110
	Arteritis	110
	Amyloidosis	111
	Rheumatoid Pulmonary Disease	111
	Iatrogenic Disease	111
	References	111
	Suggested Readings	112
<b>Chapter 12</b>	<b>Other Extra-Articular Manifestations</b>	<b>113</b>
	Fever	113
	Raynaud's Syndrome	114
	Hyperviscosity Syndrome	114
	Psychiatric Symptoms	114
	Neuromuscular Disease	115
	Sepsis	115
	Dermatologic Syndromes	116
	Osteoporosis	116
	Renal Involvement	116
	Hepatic Disease	116
	Amyloidosis	117
	References	117
	Suggested Readings	117
<b>Chapter 13</b>	<b>The Laboratory and Rheumatoid Disease</b>	<b>119</b>
	Blood Elements	120
	The Erythrocyte Sedimentation Rate and Acute Phase Reactants	121
	Immune Factors	122
	• Antinuclear Factors • Complement • HLA Antigen • Collagen Antibodies	
	Rheumatoid Factors	124
	• Biologic Significance of the Rheumatoid Factor	
	Liver Function	128
	Renal Function	128
	References	129

<b>Chapter 14</b>	<b>Radiology</b>	130
	Characteristic Radiologic Changes in Rheumatoid Arthritis	131
	When to X-Ray?	133
	Which Joints to X-Ray?	136
	Sequential Changes	137
	Relationship of Radiologic Changes to Prognosis	139
	Specific Joint Changes	139
	• Hand and Wrists • Feet • Knees • Hip • Cervical Spine	143
	Differential Diagnosis	
	• Comparison Between Rheumatoid Arthritis and Osteoarthritis • Comparison Between Rheumatoid Arthritis and Psoriatic Arthropathy • Comparison Between Rheumatoid Arthritis and Ankylosing Spondylitis • Comparison Between Rheumatoid Arthritis and Juvenile Chronic Arthritis	150
	Other Radiologic Techniques	
	• Arthrogram	150
	Effect of Drug Therapy on Erosive Disease	150
	Suggested Readings	
<b>Chapter 15</b>	<b>Rheumatoid Arthritis: Genetic Aspects</b>	151
	“Arthritis Runs in Families”	152
	The HLA System	152
	Adult Rheumatoid Arthritis and HLA-DRW4	152
	Juvenile Chronic Arthritis—Different Subsets; Different HLA Antigens	154
	Drug Toxicity—An HLA Link?	155
	The HLA Association—Some Hypotheses	156
	References	156
	Suggested Readings	157
<b>Chapter 16</b>	<b>Clinical and Functional Evaluation of Disease Severity</b>	158
	The Major Difficulties	159
	• Natural History • Modification by Previous Treatment • Environmental Factors • Associated Disorders • Drug Toxicity	161
	Symptoms	161
	Signs	161
	Function	161

	Radiography	162
	Xeroradiography	162
	Arthrography	162
	CAT Scans	162
	Thermography	163
	Scintigrams	163
	Bone Densitometry	163
	Laboratory Evaluation	163
	Pathology	164
	How Active is the Disease?	164
	Self-Administered Questionnaires for Functional Assessment	165
	Appendix 16-1 Health Assessment Questionnaire	168
	Appendix 16-2 Administration and Scoring of the Health Assessment Questionnaire	170
	References	172
	Suggested Readings	172
<b>Chapter 17</b>	<b>Some Emergency Problems</b>	<b>173</b>
	Complications of Rheumatoid Disease	174
	• Infected Joints • Infected Nodules • Vasculitis	
	• Scleromalacia • Cervical Spine Subluxation • Ruptured Popliteal Cyst • Ruptured Tendon • Pericardial Effusion	
	• Pleural Effusion • Obliterative Bronchiolitis • Fibrosing Alveolitis/Pneumonitis • Laryngeal Stridor • Bone Fracture	
	• Acute Felty's Syndrome • Compression Neuropathy	
	Complications of Drug Therapy	179
	• Infection • Bone Marrow Dysfunction • Gastrointestinal Bleeding • Nephropathy • Myasthenia • Bone Fracture	
	• Fluid Retention and Heart Failure • Fluid Retention Leading to the Carpal Tunnel Syndrome • Psychosis	
	• Glaucoma • Steroid Withdrawal • Hepatotoxicity	
	• Hemorrhagic Cystitis • Other Complications	
	Complications of Chronicity and Debility	182
	Techniques of Joint Aspiration and Injection	182
	References	183
<b>Chapter 18</b>	<b>Juvenile Chronic Polyarthropathy (Juvenile Chronic Arthritis and Juvenile Rheumatoid Arthritis)</b>	<b>184</b>
	Historical Background	185
	Terminology and Classification	185

	Prevalence and Incidence	187
	Pathology	187
	Etiology	187
	Clinical Aspects	188
	• Systemic Onset • Pauciarticular Onset • Polyarticular Onset	
	Complications of Juvenile Chronic Polyarthropathy	191
	• Growth Defects • Fractures • Amyloidosis • Death	
	Diagnostic Aids	191
	• Acute Phase Reactants • Blood Count • IgM Rheumatoid Factor • Radiologic Evaluation	
	Differential Diagnosis	192
	Prognosis	193
	Management	193
	• Salicylates • Other Nonsteroidal Anti-inflammatory Drugs • Gold • Antimalarials • Penicillamine • Corticosteroids	
	• Anticancer Drugs • Physical and Occupational Therapy	
	• Orthopedic Surgery • Therapy for Iridocyclitis	
	References	196
	Suggested Readings	197
<b>Chapter 19</b>	<b>Management: General Principles</b>	198
	A Chronic Disease	199
	A Systemic Disorder	199
	A Multidisciplinary Approach	
	• Primary Physician • Rheumatologist • Orthopedic Surgeon • Rehabilitation Physician	
	Explanation for the Patient and Family	202
	A Detailed but Flexible Therapeutic Plan	203
	General Considerations: The Whole Body	203
	Local Considerations: Individual Joints	204
	When to Refer	204
	Rheumatoid Arthritis: An Expensive Disease	205
	Suggested Readings	206
<b>Chapter 20</b>	<b>Drug Treatment and Newer Therapeutic Modalities</b>	207
	General Comments	208
	Aspirin	209
	• Absorption, Metabolism, and Excretion of Aspirin	
	• Prescribing Aspirin • Clinical Efficacy of Aspirin	
	• Side Effects of Aspirin • Aspirin Variants	

Nonsteroidal Anti-inflammatory Drugs (NSAIDs)	212
• Indomethacin • Phenylbutazone (Butazolidin) • Ibuprofen (Motrin) • Fenoprofen (Nalfon) • Naproxen (Naprosyn) • Tolmetin (Tolectin) • Sulindac (Clinoril) • Meclofenamate Sodium (Meclomen) • Piroxicam (Feldene) • Benoxaprofen (Oraflex) • The Future	
Antimalarials	218
• Side Effects of Antimalarials	
Gold	218
• Gold Preparations • Administration and Dosage of Gold • Side Effects of Gold	
Penicillamine	222
• Mode of Action • Dosage Regimen • Side Effects of Penicillamine	
Corticosteroid Therapy	225
Immunosuppressive Agents (Cytotoxic Drugs)	227
Experimental Modalities	228
• Levamisole • Thoracic Duct Drainage • Lymphoplasma-pheresis and Plasmapheresis • Total Lymphoid Irradiation	
References	230
<b>Chapter 21</b> <b>Surgical Management</b>	<b>233</b>
The Management Team	234
Aims of Surgical Treatment	234
• Functional Improvement • Relief of Pain • Cosmetic Improvement	
Presurgical Evaluation	235
• The Patient's Needs • Local Joint Disease • Generalized Disease • Psychosocial Status • Family Response	
General Surgical Considerations	237
• The Patient's General Health • The Patient's Local Disease • Wound Healing • Anesthesiology • Drug Therapy • Risk of Embolism	
Surgical Procedures: General	239
• Synovectomy • Arthroplasty • Osteotomy • Arthodesis	
Surgical Procedures: Specific Joints	241
• Forefoot • The Tarsus and Ankle Joints • The Knee • Hip Joint • Cervical Spine • Shoulder • Elbow • Wrist • Fingers	
Postsurgical Evaluation	244
Suggested Readings	244

<b>Chapter 22</b>	<b>Rheumatoid Arthritis in the Older Patient</b>	245
	Prevalence and Incidence	246
	Differential Diagnosis	246
	<ul style="list-style-type: none"> <li>• Generalized Osteoarthritis (GOA) • Polyarticular Gout</li> <li>• Calcium Pyrophosphate Disease/Pseudorheumatoid Arthritis</li> <li>• Polymyalgia Rheumatic/Giant-Cell Arteritis • Other</li> </ul>	
	Conditions with False-Positive Rheumatoid Factors	
	A Different Disease Course?	248
	Secondary Problems	249
	<ul style="list-style-type: none"> <li>• Co-Disease • Superadded Disease</li> </ul>	
	False-Positive Laboratory Tests	249
	<ul style="list-style-type: none"> <li>• Rheumatoid Factor • Antinuclear Antibody • Erythrocyte Sedimentation Rate • Drug-Induced Hyperuricemia</li> </ul>	
	Age-Related Drug Toxicity	250
	<ul style="list-style-type: none"> <li>• Aspirin • Indomethacin • Phenylbutazone • Other NSAIDs • Corticosteroids</li> </ul>	
	Age-Related Functional Problems	252
	Suggested Readings	252
<b>Chapter 22</b>	<b>When to Refer</b>	253
	Earlier, Rather than Later	254
	Always Before Corticosteroids	254
	When the Patient Feels the Need	254
	When the Physician Needs Help	255
	When Anticipating Surgery	255
	* When Frustrated	255
	References	255
<b>Appendix</b>	<b>Criteria for Diagnosis and Classification of Rheumatic Diseases</b>	256
	Diagnostic Criteria for Rheumatoid Arthritis	257
	<ul style="list-style-type: none"> <li>• Classical Rheumatoid Arthritis • Definite Rheumatoid Arthritis • Probable Rheumatoid Arthritis • Possible Rheumatoid Arthritis • Exclusions</li> </ul>	
	References	260
	American Rheumatism Association Functional Classification	260
	American Rheumatism Association Anatomical Stages	260
	<ul style="list-style-type: none"> <li>• Stage I—Early • Stage II—Moderate • Stage III—Severe</li> <li>• Stage IV—Terminal</li> </ul>	
	<b>Index</b>	262
