

Index

List of Participants	VIII
Preface	XII
WESTPHAL, O. (Freiburg i. Br.): Opening of the Conference	1
BAUER, H.J. (Göttingen): History, Facts, Problems and Clinical Aspects of Multiple Sclerosis	3

Morphological Aspects

JACOB, H. (Marburg/Lahn): Tissue Process in Multiple Sclerosis and Parainfectious and Post-Vaccinal Encephalomyelitis	22
SEITELBERGER, F. (Wien): Immunopathogenesis of the Central Nervous Pattern of Alterations	37
MANNWEILER, K. (Hamburg): Cytologic Ultrastructural Considerations and Studies of the Pathogenesis of Demyelinating Processes	41

Virological Aspects

KURTZKE, J.F. (Washington, D.C.): Some Epidemiologic Features Compatible with an Infectious Origin for Multiple Sclerosis	59
ADAMS, J.M. and BROWN, W.J. (Los Angeles, Cal.): Studies on Inclusion Bodies in Early and Late Demyelinating Disease	83
PETTE, EDITH and PALACIOS, OLGA (Hamburg): The Possible Role of Measles Virus in the Pathogenesis of Multiple Sclerosis	102
MAI, K. (Hamburg): Measles Antibodies in Multiple Sclerosis Patients and Controls (Biostatistical Evaluation)	109
DRESCHER, J. (Hannover): Demonstration of Measles Virus Antibody in Multiple Sclerosis Patients by Means of the Photometric ACU Method	117
SCHORRE, E. (Köln): Clinical Evaluation of Complement-Fixation-Reaction and Hemagglutination-Inhibition-Test in Measles of MS Patients (Manuscript not received).	121
KATZ, S.L. (Boston, Mass.): The Effect of Live Attenuated Measles-Virus Vaccine on the Central Nervous System	125
SEVER, J.L. (Bethesda, Md.): Myxoviruses and Multiple Sclerosis	134
ISACSON, P. (Buffalo, NY): The Role of Host-Incorporated Antigens in the Immune Response to Measles Virus	139
DRZENIEK, R. and ROTT, R. (Giessen): Host-Specific Antigens of Lipid-Containing RNA-Viruses	146
KALUZA, G. (Hamburg): Components of Myxoviruses	153
KOPROWSKI, H. (Philadelphia, Pa.): Chronic Viral Neuropathies: Models for Study and Food for Thought	158

Immunological Aspects

KIES, MARIAN W. and ALVORD, E. C. (Bethesda, Md. and Seattle, Wash.): Multiplicity of Encephalitogenic Myelin Basic Proteins. I. Relative Molecular Sizes Related to Methods of Preparation	182
ALVORD, E. C.; HRUBY, SARKA; SHAW, CHENG-MEI and KIES, MARIAN W. (Seattle, Wash. and Bethesda, Md.): Multiplicity of Encephalitogenic Myelin Basic Proteins. II. Antigenic Determinants Related to Species of Origin and Molecular Size	203
BORRIS, ELSA; AUGUST, C.S. and KIES, MARIAN W. (Hamburg and Bethesda, Md.): In vitro Effect of Brain Antigens on C-14-Leucine Incorporation in Sensitized Lymphoid Cells	218
CLAUSEN, J. and MØLLER, J. (Copenhagen): Allergic Encephalomyelitis Induced by Brain Antigen after Deficiency in Polyunsaturated Fatty Acids during Myelination	224
CAZZULLO, C.L.; BRAZZELLI, C. A. and GIORDANO, P.L. (Milano): 5-Hydroxytryptamine Content in Rabbits Brain in Experimental Allergic Encephalomyelitis	234
LUMSDEN, C.E. (Leeds): Properties and Significance of the Demyelinating Antibody in Multiple Sclerosis	247
ALVORD, E. C.; HRUBY, SARKA; HUGHES, KATHRYN; SHAW, CHENG-MEI and KIES, MARIAN W. (Seattle, Wash. and Bethesda, Md.): Comparisons of Organ-Specific Antigens of the Central Nervous System	276
FINGER, H. (Würzburg): Possible Mechanism of Adjuvant Action	293
TANAKA, A. (Freiburg i. Br.): Significance of the Quantitative Relationships of Antigen and Adjuvant for the Efficiency of the Adjuvant	310
NIEDIECK, BARBARA (Hamburg): Further Studies on the Role of Lipids and Lipid Antibodies in Experimental Allergic Encephalomyelitis	328
YAMAGUCHI, Y.; NIEDIECK, B. and PALACIOS, O. (Hamburg): An Immunobiological Approach to the Pathogenesis of Experimental Allergic Encephalomyelitis in Chickens	334
PATERSON, P. Y. (Chicago, Ill.): Nervous System-Sensitized Cell Interactions and Tissue Injury	345
ROBOZ EINSTEIN, ELIZABETH and CERUTTI, PRISCA (San Francisco, Cal.): Application of Quantitative Chromatographic Technique in the Determination of CSF Gamma Globulin to MS	355
ROBOZ EINSTEIN, ELIZABETH; CSEJTEY, JUDIT; DAVIS, W. J.; LAJTHA, A. and MARKS, M. (San Francisco, Cal. and New York, N.Y.): Enzymatic Degradation of the Encephalitogenic Protein	363
RAUCH, HELENE C. and ROBOZ EINSTEIN, ELIZABETH (Stanford, Cal. and San Francisco, Cal.): Immunogenicity of Bovine Encephalitogenic Protein	376
RAUCH, HELENE C. and GRIFFIN, J. (Stanford, Cal.): Passive Transfer Studies in Experimental Allergic Encephalomyelitis	387
HAMMER, D. (Freiburg i. Br.): Experimental Glomerulonephritis in Unresponsive Rabbits after Breaking Immunologic Tolerance	401
RAJEWSKY, K. and ROTTLÄNDER, ELKE (Köln): Antigenic Determinants and Tolerance Specificity	405

Aspects of Mechanisms of Other Demyelinating Processes Caused by Viruses

SEITELBERGER, F. (Wien): Immunopathologic Processes in the Pathogenesis and Manifestation of Viral Encephalitides	408
SEITZ, D. (Göttingen): Clinical Problems of Acute Necrotizing Encephalitis	420

SHIRAKI, H. and YAMAMOTO, T. (Tokyo): The Comparative Study of Acute or Subacute Necrotizing Encephalitis in Humans to Experimental Herpes Simplex Encephalo-Myelo-Neuritis in Newborn to Adult Mice Using Fluorescent Antibody Method	426
PÉRIER, O. (Bruxelles): Electron Microscopic Observations on Human Demyelinating Diseases	452
ZU RHEIN, GABRIELE M. (Madison, Wisc.): Ultrastructural Studies in Progressive Multifocal Leukoencephalopathy, a Demyelinating Disease of Man of Probable Viral Etiology	463
IKUTA, F. (Niigata): Virions Associated with Four Japanese Cases of Progressive Multifocal Leukoencephalopathy	488
MANNWEILER, K. and COLMANT, H.-J. (Hamburg): Ultrastructural Data in Cases of Necrotizing Encephalitis without Inclusion Bodies	515
GIBBS, C. J., Jr.; GAJDUSEK, D. C. and ALPERS, M. P. (Bethesda, Md.): Attempts to Transmit Subacute and Chronic Neurological Diseases to Animals	519
BECK, ELISABETH; DANIEL, P. M.; ALPERS, M.; GAJDUSEK, D. C. and GIBBS, C. J., Jr. (London and Bethesda, Md.): Neuropathological Comparisons of Experimental Kuru in Chimpanzees with Human Kuru	553
FIELD, E. J. and HUGHES, D. (Newcastle upon Tyne): A Comparison of Toxicity of Serum from Multiple Sclerosis and Motor Neurone Disease on Myelin <i>in vitro</i>	563
FIELD, E. J. (Newcastle upon Tyne): Invasion of the Nervous System by 'Slow' Virus: A Study with Scrapie Agent	568
BORNSTEIN, M. B. (Bronx, N. Y.): Anti-Neuroglial and Anti-Neuronal Cell Factors in Experimental Allergic Encephalomyelitis and Multiple Sclerosis	574
CARELS, G. and CERF, J. A. (Bruxelles): Functional Alterations Produced in an Isolated Nerve Center by Serum from Patients with Multiple Sclerosis	608
YONEZAWA, T. and ISHIHARA, Y. (Kyoto): Demyelinating Pattern of Experimental Allergic Peripheral Neuritis, Studied <i>in vitro</i>	629
BAUER, H. and GOTTESLEBEN, A. (Göttingen): Quantitative Immunochemical Studies of Cerebrospinal Fluid Proteins in Relation to Clinical Activity of Multiple Sclerosis	643
CLAUSEN, J. and FOG, T. (Copenhagen): Polar Lipids and Proteins in the Cerebrospinal Fluid	649
DEBUCH, HILDEGARD and MERTENS, WALTRAUD (Köln): Quantitative Determination of Phospholipids in Small Tissue Samples	643
HOELZL WALLACH, D. F. (Boston, Mass.): The Organization of Cellular Membranes Discussions	672
	34, 38, 54, 81, 113, 121, 173, 241, 273, 286, 321, 352, 446, 506, 584, 620, 640, 661, 680
Concluding Remarks	681
