

# Contents

<b>1. Disorders of function in the light of anatomy and physiology</b>	1	Subdural haematoma	231
Some general considerations	1	Post-traumatic epilepsy	232
The cerebrum	12	Intracranial birth injuries	235
The motor system	15	<b>6. Diseases of the meninges</b>	237
The sensory system	37	The anatomy of the meninges	237
The reflexes	48	Calcification of the falx	237
Speech and its disorders	52	Pachymeningitis	237
Apraxia and agnosia	62	Acute leptomeningitis	237
The cerebrospinal fluid (CSF)	64	<b>7. Suppurative encephalitis: intracranial abscess</b>	250
History and examination	73	<b>8. Nervous complications of miscellaneous infections</b>	254
<b>2. The cranial nerves and special senses</b>	83	Acute toxic encephalopathy	254
The first or olfactory nerve and the sense of smell	83	Scarlet fever	255
The sense of vision, the visual apparatus, and the second or optic nerve	83	Whooping cough	255
External ocular movement and its abnormalities	95	Typhoid fever	255
Lesions of the third, fourth, and sixth nerves	106	Typhus fever	256
The fifth or trigeminal nerve	109	Malaria	256
The seventh or facial nerve	113	Trypanosomiasis	257
The eighth or vestibulocochlear nerve	117	Influenza	257
The ninth or glossopharyngeal nerve	128	Infective hepatitis	257
The sense of taste	128	Infectious mononucleosis	258
The tenth or vagus nerve	129	Sarcoidosis	258
The eleventh or accessory nerve	133	Mycoplasma infection	258
The twelfth or hypoglossal nerve	133	Toxoplasmosis	258
<b>3. Raised intracranial pressure, cerebral oedema, hydrocephalus, intracranial tumour, and headache</b>	135	Benign myalgic encephalomyelitis	259
Raised intracranial pressure — pathophysiology	135	Behçet's disease	259
Cerebral oedema	137	Metazoal infections	260
Hydrocephalus	137	Whipple's disease	261
Intracranial tumour	143	<b>9. Syphilis of the nervous system</b>	263
Headache	175	Secondary syphilis	263
Migraine	177	Tertiary meningovascular syphilis	264
<b>4. Disorders of the cerebral circulation</b>	183	General paresis	267
The cerebral arterial circulation	183	Tabes dorsalis	268
Cerebral ischaemia	188	Congenital neurosyphilis	272
Classification of the cerebrovascular diseases	191	<b>10. Virus infections of the nervous system</b>	274
The incidence and epidemiology of 'strokes'	191	General considerations	274
Cerebral infarction	192	Epidemic encephalitis lethargica	275
Syndromes of the cerebral arteries	194	Epidemic encephalitis: Japanese type B, St. Louis type, and Murray Valley type	277
Cerebral embolism	200	Eastern and Western (equine) encephalomyelitis	278
Hypertensive encephalopathy	205	Other forms of viral encephalitis	279
Intracranial aneurysm	206	Subacute sclerosing panencephalitis	279
Arteriovenous angioma	208	Herpes simplex encephalitis	280
Subarachnoid haemorrhage	208	Poliomyelitis	282
Cerebral haemorrhage	214	Rabies	286
Other degenerative vasculopathies	218	Virus meningitis	288
Vascular diseases without changes in the brain and strokes of undetermined aetiology	219	Nervous complications of mumps	289
Inflammatory diseases of intracranial arteries	219	The Coxsackie viruses	289
The cerebral venous circulation	221	The Echo viruses	290
Thrombosis of the intracranial venous sinuses and veins	223	Acute haemorrhagic conjunctivitis	290
<b>5. Head injury</b>	226	Other viral CNS infections	290
Non-penetrating injuries of the brain	226	Herpes zoster	291
Traumatic pneumocephalus and CSF rhinorrhoea	231	Cytomegalovirus infection	293
		Congenital rubella	293
		'Slow virus' infections	294

<b>11. Neuroimmunology and the demyelinating diseases of the nervous system</b>	295	Lead poisoning	435
The foundations of neuroimmunology	295	Manganese poisoning	437
Classification of the demyelinating diseases	298	Mercury poisoning	438
Acute disseminated encephalomyelitis	300	Other metals	438
Acute haemorrhagic leuco-encephalitis	305	Poisoning with organophosphorus and organochlorine insecticides	439
Disseminated myelitis with optic neuritis	306	Subacute myelo-optico-neuropathy (SMON)	439
Multiple sclerosis (MS)	307	Some other poisons with neurological effects	440
Central pontine myelinolysis	319	Oral contraceptives	440
Diffuse sclerosis (Schilder's disease)	319	Cerebral anoxia and hypoxia	440
		Carbon monoxide poisoning	441
<b>12. Extrapyramidal syndromes</b>	322	Caisson disease	442
The basal ganglia	322	Electric shock	443
The parkinsonian syndrome	325	Heat stroke	444
Forms of parkinsonism	329	Accidental hypothermia	444
Wilson's disease	336	Snake bite	444
Hallervorden-Spatz disease and infantile neuroaxonal dystrophy	339	Tetanus	444
Neuronal intranuclear inclusion disease	339	Botulism	447
Torsion dystonia	339	Saxitoxin poisoning	448
Spasmodic torticollis	341	Ergotism	448
Athetosis	342	The neurological manifestations of acute porphyria	449
Chorea	343	The neurological manifestations of hepatic failure	451
		Inborn errors of metabolism including the neuronal storage disorders	452
<b>13. Some congenital, developmental, and degenerative disorders</b>	351	Urea-cycle disorders	452
Cerebral palsy	351	Amino-acid disorders	453
Congenital diplegia and quadriplegia	351	The lipidoses (lipid storage diseases)	455
Congenital and infantile hemiplegia	354	Disorders of serum lipoproteins	464
Minimal cerebral dysfunction	355	Disorders of purine metabolism	464
Kernicterus	356	Disorders of carbohydrate metabolism	465
Cerebral malformations	356	Disorders of mucopolysaccharide metabolism	467
Tuberous sclerosis (epiloia)	358	Miscellaneous disorders of varied or unknown aetiology	467
Neurofibromatosis	359	Some other metabolic disorders	469
Ataxia telangiectasia	362	Some endocrine causes of mental retardation and of other neurological symptoms	470
The hereditary ataxias	362	Some non-metabolic causes of mental retardation	471
Motor-neurone disease	370	Mental retardation syndromes of undetermined cause	471
Creutzfeldt-Jakob disease	379	Carbon dioxide intoxication	472
Familial cerebral amyloidosis	379		
Peroneal muscular atrophy	380	<b>16. Deficiency disorders</b>	473
Infantile spinal muscular atrophy and related disorders	383	Beriberi	474
Facial hermiatropy	387	Wernicke's encephalopathy	475
Hemihypertrophy	388	Pellagra	476
		Nutritional neuropathies of obscure origin	477
<b>14. Disorders of the spinal cord and cauda equina</b>	390	Vitamin B <sub>12</sub> neuropathy (subacute combined degeneration of the spinal cord and brain)	479
Anatomy of the spinal cord and cauda equina	390	Folate deficiency	482
Paraplegia	391	Neurological complications of other haematological disorders	482
The innervation of the bladder and rectum	393		
The care of the paraplegic patient	394	<b>17. The neurological manifestations of neoplasms arising outside the nervous system</b>	484
Haematomyelia and acute central cervical-cord injury	398	Neurological complications of the reticuloses	485
Compression of the spinal cord	402	Paraneoplastic neurological syndromes	486
Syringomyelia	412	The incidence of non-metastatic complications of carcinoma	486
Myelodysplasia (spinal dysraphism)	416	Neurometabolic disorders associated with neoplasms	488
Caudal dysplasia (sacral agenesis)	417		
The Arnold-Chiari malformation	417	<b>18. Disorders of peripheral nerves</b>	492
Congenital cervical spinal atrophy	418	Tumours of nerves	492
Spina bifida	418	Traumatic and allied lesions of peripheral nerves	492
Myelitis (myelopathy)	420	Symptoms, signs and treatment of individual nerve lesions	499
Radiation myelopathy	422	Spinal radiculitis and radiculopathy	514
Subacute necrotic myelitis	422	Other forms of mononeuropathy	520
Landry's paralysis	423	Polyneuritis (polyneuropathy)	522
Infarction and ischaemia of the spinal cord and cauda equina	423		
<b>15. Intoxications and metabolic disorders</b>	426		
Alcohol addiction	426		
Drug addiction	431		

<b>19. Disorders of muscle</b>	551	Hypertelorism	607
The anatomy and physiology of muscle	551	Basilar impression and other craniovertebral anomalies	607
General comments on disorders of muscle	553		
Progressive muscular dystrophy	553		
Myotonic disorders	557	<b>22. Paroxysmal and convulsive disorders</b>	609
Inflammatory disorders of muscle	563	Epilepsy	609
Myasthenia gravis	567	Myoclonus and the myclonic epilepsies	630
Endocrine and metabolic myopathies	574	Tetany	633
The floppy infant syndrome	582		
Some miscellaneous disorders of muscle	584	<b>23. Psychological aspects of neurology (including consideration of memory, sleep, coma, and the dementias)</b>	636
Differential diagnosis	585	Anatomy and physiology	636
<b>20. Disorders of the autonomic nervous system</b>	593	Consciousness and unconsciousness	640
The autonomic nervous system	593	Disorders of memory	653
Disorders of autonomic function	598	Disorders of mood	655
Syndromes of the hypothalamus	601	The investigation of mental changes after cerebral lesions	656
<b>21. Diseases of the bones of the skull</b>	604	Dementia	657
Osteitis deformans	604	Hysteria	661
Leontiasis ossea, polyostotic fibrous dysplasia, and other craniotubular modelling disorders	606	Occupational cramps or neuroses	667
Craniostenosis	606		
Cleidocranial dysostosis	607	<b>Index</b>	669
