

# Contents

1. Recent application of tracer techniques to neuropathology, with particular reference to vascular permeability and axonal flow <i>Yngve Olsson and Krister Kristensson</i>	1
2. Cerebral oedema and ischaemia <i>Igor Klatzo</i>	27
3. The application of cell turnover studies to neuropathology <i>P. D. Lewis</i>	41
4. Regeneration in the central nervous system <i>Martin Berry</i>	67
5. The practical application of image-analysing systems to neuropathology: principles and possible scope <i>A. K. H. Miller, R. L. Alston and J. A. N. Corsellis</i>	113
6. The ageing brain <i>B. E. Tomlinson</i>	129
7. DNA damage and repair in experimental neuro-oncogenesis <i>P. Kleihues</i>	161
8. Recent advances in human neuro-oncology <i>L. J. Rubinstein and Mary M. Herman</i>	179
9. The pathogenesis of spina bifida and related malformations <i>J. Rokos</i>	225
10. Metallic toxicity and the nervous system <i>J. B. Cavanagh</i>	247
11. Multiple sclerosis: recent advances in aetiopathogenesis <i>E. J. Field</i>	277
12. The neuropathology of parkinsonism <i>G. W. Pearce</i>	299
