Introduction	viii
Part I. Action for tobacco control	1
Chapter 1. The need for tobacco control	2
Patterns of tobacco use and mortality	3
World Health Assembly resolutions	3
The social acceptability of tobacco use	5
The importance of effective tobacco control	6
Monitoring the tobacco epidemic	7
Background reading	7
Chapter 2. A national plan of action for comprehensive tobacco control	9
Goals and objectives	9
WHO's plans of action	11
WHO headquarters plan of action	11
Regional WHO plans of action	12
Health promotion	13
No-tobacco days	14
Media advocacy	14
Paid media advertising	15
School-based health promotion	15
Community-based health promotion	16
Sponsorship of cultural, sporting and community events	16
Cessation of smoking	18
Health protection	20
Legislative measures	20
Fiscal measures	22
Economic alternatives to tobacco	23
Building capacities	24
Monitoring and evaluation	25

Conclusion: key points	25
Background reading	26
Chapter 3. Implementing a national plan of action	28
Seven principles for putting tobacco control plans into action	29
Seven strategies for tobacco control	31
Background reading	36
Chapter 4. Obtaining support for tobacco control	37
The participants in a national tobacco control programme	37
The government sector	37
The media	43
Health professionals	44
Other voluntary and professional groups	46
Business, industry and labour unions	47
Opposition to national tobacco control programmes	48
Tobacco is everyone's problem	49
Conclusion: key points	49
Background reading	49
Chapter 5. Information support for tobacco control	50
Economic information	52
The tobacco industry	52
Tobacco in the national economy	53
Relative cost to the consumer	53
Overall economic costs of tobacco	54
Tobacco advertising	56
National tobacco control policies	56
Taxes, prices and consumption	57
Public opinion surveys	58
Country profiles	58
Conclusion: key points	59
Background reading	59
Part II. Monitoring the tobacco epidemic	61
Chapter 6. What kinds of data are needed?	62
Epidemiological surveillance	63
Standardization	63
The need for appropriate data	63
Monitoring diseases	65
Measuring the use of tobacco	65
Smoking prevalence	65
Per capita cigarette consumption	66

Conclusion: key points	67
Background reading	67
Chapter 7. Monitoring tobacco consumption	69
Estimating cigarette consumption	69
Sources of data	70
Problems in the use of per capita data	71
Estimating per capita consumption: the example of Australia	74
Conclusion: key points	75
Background reading	75
Chapter 8. Monitoring tobacco use	76
Defining terms	76
Understanding prevalence	78
Questions for assessing tobacco use	80
Assessing smoking	80
Assessing use of smokeless tobacco	81
Clarifying the core questions	82
Tobacco use in special populations	82
Women of reproductive age and pregnant women	82
Health professionals: practitioners, teachers and students	83
Adolescents	83
Selecting key questions	84
Collecting data	85
Selecting a sample	88
Probability sampling	88
Non-probability sampling	89
Sample size	91
Measuring changes over time	91
Data preparation, analysis and presentation	93
Editing data	93
Computing response rates	93
Prevalence of different tobacco habits	94
Tobacco consumption levels	96
Using survey data to make population estimates	96
Additional questions on tobacco use, knowledge and attitudes	97
Tobacco use	97
Health knowledge	97
Public opinion	98
Workplace surveys	99
Precautions when conducting surveys	99

Conclusion: key points	100
Background reading	100
Chapter 9. Assessing the health effects of tobacco	102
Collecting and interpreting epidemiological data	103
Basic data and definitions	103
Monitoring tobacco-related morbidity	106
Monitoring tobacco-related mortality	106
Risk and causality	111
Quantifying the relationship between tobacco use and disease	113
Estimating relative risk	115
Calculating the number of deaths caused by tobacco	118
Indirect methods for estimating mortality attributable to smoking	118
Projecting future mortality attributable to smoking	119
Conclusion: key points	121
Background reading	122
Glossary	123
For further help	126
Annexes	127

Annex 1. Resolutions of the World Health Assembly on “tobacco or health” issues, 1970–1995	128
Annex 2. A model of a tobacco products control law	146
Annex 3. Selections from WHO’s World No-Tobacco Day advisory kit, 1995: “Tobacco costs more than you think”	153
Annex 4. Categories of the WHO Tobacco or Health database	167
Annex 5. Country profile sample: Indonesia	171
Annex 6. Case studies of prevalence surveys	175
Annex 7. Sampling for a national prevalence survey	178
Annex 8. Sample questions for public opinion surveys, Canada, 1979–1987	179
Annex 9. Smoke-free workplace: sample questionnaire	182
Annex 10. Using epidemiological data to assess the health damage caused by smoking	185
