Preface	v
Introduction	1
Severe and complicated malaria	5
General management	6
Nursing care	9
Specific antimalarial chemotherapy	10
Salient clinical features and management of complications	11
Cerebral malaria	11
Anaemia	15
Renal failure	16
Hypoglycaemia	17
Fluid, electrolyte and acid-base disturbances	18
Pulmonary oedema	20
Circulatory collapse ("algid malaria")	22
Spontaneous bleeding and disseminated intravascular coagulation	23
Hyperpyrexia	24
Hyperparasitaemia	25
Malarial haemoglobinuria	25
Special clinical features of severe malaria and management of common complications in children	27
Severe malaria	27
Cerebral malaria	29

Anaemia	31
Hypoglycaemia	32
Dehydration	33
Antimalarial drugs	34
<hr/>	
<b>Special clinical features and management of severe malaria in pregnancy</b>	<b>35</b>
Severe malaria	35
Hypoglycaemia	36
Pulmonary oedema	37
Anaemia	38
Antimalarial drugs	38
<hr/>	
<b>Diagnosis of malaria</b>	<b>39</b>
Clinical diagnosis	39
Parasitological diagnosis	39
Haematological and biochemical findings	44
<hr/>	
<b>Prognostic indicators</b>	<b>45</b>
<hr/>	
<b>Common errors in diagnosis and management</b>	<b>46</b>
<hr/>	
<b>Selected further reading</b>	<b>48</b>
<hr/>	
<b>Annex 1. Notes on antimalarial drugs</b>	<b>49</b>
<hr/>	
<b>Annex 2. The Glasgow coma scale</b>	<b>52</b>
<hr/>	
<b>Annex 3. Measurement of central venous pressure</b>	<b>53</b>
