<i>Preface</i>	v
<i>Contributors</i>	xi
1 Prostate Cancer: Epidemiology and Etiology <i>Marcus N. Morra and Sakti Das</i>	1
2 Prostatic Carcinoma: Anatomical and Pathological Considerations <i>Gary J. Miller</i>	13
3 Prevalence, Progression, and Pathological Staging Systems of Carcinoma of the Prostate <i>Robert E. Donohue</i>	39
4 Cytometry and Cytopathology of Carcinoma of the Prostate: Current Concepts <i>Mitchell C. Benson</i>	59
5 Clinical Presentation and Diagnosis of Carcinoma of the Prostate <i>Joseph R. Drago</i>	73
6 Transrectal Prostatic Ultrasound and Biopsy: Current Technology and Interpretation <i>Glenn S. Gerber and Gerald W. Chodak</i>	101
7 Screening for Carcinoma of the Prostate: Progress and Problems <i>Thomas M. Seay and Ian M. Thompson</i>	119

- |    |                                                                                                                                                                                                                              |     |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 8  | Staging of Prostatic Carcinoma<br><i>Jonathan M. Vapnek and Peter R. Carroll</i>                                                                                                                                             | 147 |
| 9  | Laparoscopic Pelvic Lymphadenectomy<br><i>Michael J. Schutz and E. David Crawford</i>                                                                                                                                        | 173 |
| 10 | Radical Retropubic Prostatectomy<br><i>Fuad S. Freiha</i>                                                                                                                                                                    | 189 |
| 11 | Radical Perineal Prostatectomy<br><i>Vernon E. Weldon</i>                                                                                                                                                                    | 225 |
| 12 | External Beam Radiation Therapy for Carcinoma of the Prostate:<br>Current Perspectives<br><i>Don R. Goffinet and Malcom A. Bagshaw</i>                                                                                       | 267 |
| 13 | Interstitial Brachytherapy for Carcinoma of the Prostate<br><i>Mark J. Noble and Stephen T. Smalley</i>                                                                                                                      | 289 |
| 14 | Active Surveillance and Deferred Therapy for Carcinoma of<br>the Prostate<br><i>Philip H. Smith and Melvyn R. G. Robinson</i>                                                                                                | 325 |
| 15 | Endocrine Therapy of Advanced Carcinoma of the Prostate<br><i>Firouz Daneshgari and E. David Crawford</i>                                                                                                                    | 333 |
| 16 | Hormonal Therapy of Advanced Carcinoma of the Prostate:<br>The European Experience<br><i>Michele Pavone-Macaluso, Vincenzo Serretta, Gaspare Corselli,<br/>Giovanni Messina, Giuseppe Daricello, and Maurizio Cacciatore</i> | 355 |
| 17 | Chemotherapy and Palliation in Prostate Cancer<br><i>Mario A. Eisenberger</i>                                                                                                                                                | 369 |
| 18 | Management of Prostate Cancer: Stage by Stage<br><i>William A. See and Richard D. Williams</i>                                                                                                                               | 397 |
| 19 | Carcinoma of the Prostate: The Impact of Treatment<br><i>Marilyn Davis</i>                                                                                                                                                   | 421 |
