| Terminology | xiii |
| Keys to control and eradication | xvii |

PART I BASIC FACTS

1. The evolution of primary infection with *Mycobacterium tuberculosis* 3
Mycobacterium tuberculosis and the human host/The concept of primary infection/The development of the primary complex/The mechanisms, timetable and risks of complications of untreated primary pulmonary infection/Effect of age, nutrition and intercurrent infection/The relationship of primary infection to chronic pulmonary tuberculosis/Regional differences in tuberculosis in children
2. Tuberculin sensitivity and the tuberculin test 18
Origins/Tuberculin sensitivity/Standardisation of tuberculin/Test dosage/Techniques of tuberculin testing/Comparison of tests/Geographical variation in tuberculin sensitivity and the efficiency of the tuberculin test
3. The epidemiology of tuberculosis 37
The epidemiological situation/Measurement of tuberculosis in a population/The contemporary situation
4. BCG vaccination 55
Rationale of vaccination/BCG vaccine/Techniques of vaccination/Events after vaccination/Tuberculin sensitivity after vaccination/Revaccination/Complications of vaccination/Accidents during vaccination/Progressive BCG infection/The efficacy of BCG vaccination/Studies of BCG vaccination/Tuberculosis after BCG vaccination/BCG and leprosy
5. Control of tuberculosis 73
The doctor's responsibility/National tuberculosis programmes/Contact tracing/The doctor's personal responsibilities

PART II CLINICAL MANIFESTATIONS

6. The recognition, diagnosis and treatment of tuberculosis in children 85
Introduction/Presentation/Symptom complexes of tuberculosis/Tuberculosis and nutrition/Diagnosis/Treatment

| | |
|--|-----|
| 7. Intrathoracic tuberculosis and miliary spread | 105 |
| Pulmonary primary infection/Bronchial complications/Cardiac complications/Chronic pulmonary tuberculosis/Progressive pulmonary tuberculosis/Miliary tuberculosis | |
| 8. Oral and alimentary tuberculosis | 137 |
| Primary tuberculosis of the mouth/Visible primary tuberculosis of the tonsil/Tuberculosis of middle ear and mastoid/Tuberculosis of the oesophagus/Abdominal tuberculosis | |
| 9. Tuberculosis of the skin | 144 |
| Classification (with synonyms)/Diagnosis of skin tuberculosis/Primary skin infection/Haematogenous lesions/Injection abscesses/Erythema nodosum | |
| 10. Tuberculosis of eye and conjunctiva | 156 |
| Primary infection of conjunctiva/Phlyctenular conjunctivitis/Choroidal tuberculosis | |
| 11. Superficial tuberculous lymphadenitis | 161 |
| Clinical presentation/Treatment | |
| 12. Tuberculosis of the central nervous system | 168 |
| Introduction/Tuberculous meningitis/Tuberculomata/Tuberculous encephalopathy/Tuberculous arachnoiditis and radiculitis/Paraplegia of tuberculous origin | |
| 13. Tuberculosis of bones and joints | 186 |
| General considerations/Tuberculosis of the spine/The hip/The knee/Other bones and joints/Multiple cystic tuberculosis of bone (Jungling's disease) | |
| 14. Tuberculosis of genital tract and breast | 209 |
| Male genital tract/Female genital tract/Tuberculosis of the breast | |
| 15. Tuberculosis of the renal tract | 212 |
| Evolution of lesions/Clinical aspects/Differential diagnosis/Treatment | |
| 16. Tuberculosis of liver, spleen, haemopoietic system and adrenals | 215 |
| The liver/The spleen/The blood/The adrenals | |
| 17. Congenital tuberculosis and infection early in infant life | 220 |
| Mechanisms and epidemiology/Pathology/Condition of the mother/Clinical syndromes/Diagnosis/Treatment and prognosis/Protection of the newborn infant | |
| 18. Tuberculosis in immigrant children in the United Kingdom | 225 |
| Introduction/The epidemiological situation/Tuberculous infection and morbidity in immigrants/Policy regarding assessment, treatment and prevention/Clinical considerations | |

| | |
|--|-----|
| 19. Non-tuberculous mycobacterial infections | 232 |
| Introduction/Classification of organisms/Distribution of organisms/Sensitivity to chemotherapy/Clinical syndromes of infection in children/Sensitivity to mycobacteria other than <i>M. tuberculosis</i> | |
| 20. Tuberculosis in animals | 250 |
| Introduction/ <i>M. bovis</i> infection/Tuberculosis in animals other than cattle | |
| Epilogue | 256 |
| Appendices | 257 |
| Introduction | |
| Appendix 1 Examination of gastric contents for AFB | |
| Appendix 2 Laryngeal swabs | |
| Appendix 3 Staining of <i>M. tuberculosis</i> and other acid fast bacilli — Ziehl-Neelsen method | |
| Appendix 4 Examination of c.s.f. for AFB | |
| Appendix 5 Locally prepared food (Hyderabad Mix) | |
| References | 263 |
