Preface	vii
Acknowledgements	ix
<b>Part I. Principal methods of applying pesticides in integrated vector control</b>	<b>I</b>
Introduction	3
The role of chemical control in the integrated approach	4
Principal methods of pesticide application	5
Factors to be considered for effective application of pesticides	5
<b>Part II. Components of application equipment</b>	<b>17</b>
Nozzles	19
Hydraulic energy nozzles	19
Pressure pack nozzles	25
Centrifugal energy nozzles	26
Gaseous energy nozzles	29
Thermal nozzles	31
Electrostatic charging nozzles	33
Pressure-regulating devices	34
Pressure regulators	34
Disc flow regulators	34
Diaphragm check valves	34
Pumps for liquids	39
Piston pumps	39
Diaphragm pumps	39
Rotary pumps	40
Centrifugal pumps	40
Selection and maintenance of hydraulic pumps	40

## Equipment for vector control

Compressors and blowers	42
Rotary compressors	42
Rotary blowers or fans	42
Sprayer tanks	43

## Part III. Guide to ground equipment used for vector control

	45
Equipment for the production of sprays	47
Manually operated sprayers	47
Power-operated sprayers	58
Equipment for the production of mists	59
Hand-carried sprayers	59
Knapsack mistblowers	60
Vehicle-mounted mistblowers	63
Equipment for the production of aerosols	64
Small hand-carried aerosol generators	64
Vehicle-mounted aerosol generators	64
Aerosol dispensers	65
Selection of aerosol equipment	65
Equipment for the production of thermal fogs	66
Hand-carried thermal foggers	66
Vehicle-mounted thermal foggers	66
Equipment for the application of solid materials	68
Hand-carried dusters	68
Knapsack dusters	68
Granule applicators	69
Equipment for trapping tsetse flies	72
Biconical trap (Challier and Laveissière)	72
Monoconical trap (Lancien)	73
Monopyramidal trap (Lancien-Gouteux)	73
Screens	74

<b>Part IV. Guide to the use of aircraft in vector control</b>	75
Introduction	77
Types of aircraft used in vector control	81
Pesticide application equipment	84
Tanks	84
Pumps	86
Liquid atomizers	86
Instrumentation	87
Dispersal of solid materials	88
Recently developed equipment for aerial application	88
Operational requirements	89
Safety	94
Organization and management	96
<b>Part V. Specifications for equipment for vector control</b>	99
Compression sprayer, hand-operated (Specification WHO/VBC/89.970)	101
Hand-activated plunger-type duster, hand-carried (Specification WHO/EQP/4.R2)	128
Hand-activated rotary duster, front-carried (Specification WHO/EQP/5.R1)	133
Hand-sprayer, intermittent (Specification WHO/EQP/2.R1)	137
Stirrup-pump-type sprayer, single-barrel (Specification WHO/EQP/3.R3)	141
Single-use aerosol dispenser for the disinsection of aircraft by the "blocks away" method (Specification WHO/EQP/6.R1)	158
Multi-use aerosol dispenser for the disinsection of aircraft (Specification WHO/EQP/7)	166
Multi-use aerosol dispenser, domestic type (Specification WHO/EQP/8)	174
Motorized knapsack mistblower (Specification WHO/VBC/89.971)	177
Vehicle-mounted motorized aerosol generator with gaseous energy nozzle (Specification WHO/VBC/89.972)	187

## Equipment for vector control

Thermal fogging equipment (Specification 89.973)	WHO/VBC/	195
Vehicle-mounted mistblower (Specification 89.974)	WHO/VBC/	209
<b>Bibliography</b>		219
<b>Annexes</b>		223
<b>Annex 1.</b> Methods of sampling pesticide sprays to determine droplet size spectra		225
<b>Annex 2.</b> Procedures and methods for the testing and evaluation of pesticide application equipment		233
<b>Annex 3.</b> Guidelines for field trials of hand-operated compression sprayers		239
<b>Annex 4.</b> Guidelines for field trials of ground space spraying equipment		252
<b>Annex 5.</b> WHO data sheets on pesticide application equipment		279
<b>Annex 6.</b> Reference information for use in testing aerosol dispensers		300
<b>Annex 7.</b> Membership of the WHO informal consultation meeting		303
