ENVIRONMENTAL HEALTH CRITERIA FOR SELECTED RADIONUCLIDES		7
PREFACE	1 - 6	11
I. INTRODUCTION	7 - 22	13
II. TRITIUM	23 - 77	18
A. INTRODUCTION	23 - 25	18
B. SOURCES	26 - 57	18
1. Natural tritium	26 - 29	18
2. Nuclear explosions	30 - 33	19
3. Nuclear fuel cycle	34 - 51	20
4. Tritium production plants	52 - 54	26
5. Consumer products	55 - 56	26
6. Controlled thermonuclear reactors	57	27
C. BEHAVIOUR IN THE ENVIRONMENT	58 - 61	27
1. Natural and fallout tritium	58 - 59	27
2. Industrial releases	60 - 61	28
D. TRANSFER TO MAN	62 - 63	28
E. DOSIMETRY	64 - 77	29
1. Dose per unit intake	64 - 66	29
2. Dose per unit release	67 - 77	30
F. REFERENCES		36
III. CARBON-14	78 - 112	40
A. INTRODUCTION	78 - 80	40
B. SOURCES	81 - 98	40
1. Natural carbon-14	81	40
2. Nuclear explosions	82 - 84	41
3. Nuclear fuel cycle	85 - 98	41
C. BEHAVIOUR IN THE ENVIRONMENT	99 - 102	46
D. TRANSFER TO MAN	103 - 105	47
E. DOSIMETRY	106 - 112	47
1. Dose per unit intake	106 - 107	47
2. Dose per unit release	108 - 112	48
F. REFERENCES		50
IV. KRYPTON-85	113 - 150	52
A. INTRODUCTION	113 - 117	52
B. SOURCES	118 - 128	53
1. Natural krypton-85	121	54
2. Nuclear explosions	122 - 123	54
3. Nuclear fuel cycle	124 - 128	55

	Paragraphs	Page
C. BEHAVIOUR IN THE ENVIRONMENT	129 - 137	55
1. Dispersion in the atmosphere	130 - 133	56
2. Removal from the atmosphere	134 - 137	57
D. TRANSFER TO MAN	138 - 141	59
E. DOSIMETRY	142 - 150	60
1. Dose per unit exposure	143 - 144	60
2. Dose per unit release	145 - 150	62
F. REFERENCES		65
V. STRONTIUM-90	151 - 211	68
A. INTRODUCTION	151 - 154	68
B. SOURCES	155 - 165	69
1. Nuclear explosions	155 - 156	69
2. Nuclear fuel cycle	157 - 165	70
C. BEHAVIOUR IN THE ENVIRONMENT	166 - 185	73
1. Movement in soil	166	73
2. Transfer to plants	167 - 171	73
3. Transfer to milk	172	74
4. Transfer to diet	173 - 181	74
5. Aquatic behaviour	182 - 185	77
D. TRANSFER TO MAN	189 - 192	78
E. DOSIMETRY	193 - 211	80
1. Dose per unit intake	193 - 197	80
2. Dose per unit release	198 - 211	81
F. REFERENCES		87
VI. IODINE	212 - 269	90
A. INTRODUCTION	212 - 214	90
B. SOURCES	215 - 234	90
1. Natural production	215 - 216	90
2. Nuclear explosions	217 - 220	91
3. Nuclear fuel cycle	221 - 234	92
C. BEHAVIOUR IN THE ENVIRONMENT	235 - 255	97
1. Nuclear explosions	235 - 241	97
2. Industrial releases	242 - 255	99
D. TRANSFER TO MAN	256 - 259	103
E. DOSIMETRY	260 - 270	105
1. Dose per unit intake	260 - 261	105
2. Dose per unit release	262 - 270	106
F. REFERENCES		111
VII. CAESIUM-137	271 - 336	116
A. INTRODUCTION	271 - 274	116
B. SOURCES	275 - 282	118
1. Nuclear explosions	275 - 276	118
2. Nuclear fuel cycle	277 - 282	119

	Paragraphs	Page
C. BEHAVIOUR IN THE ENVIRONMENT	283 - 309	120
1. Fixation in soil	283 - 286	120
2. Transfer to plants	287 - 290	121
3. Transfer to milk	291	122
4. Transfer to meat	292	122
5. Transfer to diet	293 - 301	123
6. The lichen-caribou-man foodchain	302 - 303	126
7. Aquatic behaviour	304 - 309	127
D. TRANSFER TO MAN	310 - 319	128
1. Absorption and distribution in tissues	310 - 314	128
2. Retention half-time	315 - 317	129
3. Transfer factor	318 - 319	130
E. DOSIMETRY	320 - 336	130
1. Dose per unit intake	320 - 324	130
2. Dose per unit release	325 - 336	131
F. REFERENCES		136
VIII. RADON	337 - 395	143
A. INTRODUCTION	337 - 340	143
B. SOURCES	341 - 351	143
1. Outdoors	341 - 344	143
2. Indoors	345 - 351	145
C. BEHAVIOUR IN THE ENVIRONMENT	352 - 375	148
1. Release from soil	352 - 355	148
2. Dispersion in air	356 - 361	150
3. Indoor behaviour	362 - 365	152
4. Radon daughter concentrations	366 - 375	155
D. TRANSFER TO MAN	376 - 380	157
E. DOSIMETRY	381 - 395	158
1. Dose per unit exposure	381 - 393	158
2. Dose per unit release	394 - 395	161
F. REFERENCES		163
IX. PLUTONIUM	396 - 456	169
A. INTRODUCTION	396 - 401	169
B. SOURCES	402 - 411	171
1. Nuclear explosions	402 - 404	171
2. Nuclear fuel cycle	405 - 406	172
3. Other sources	407 - 411	172
C. BEHAVIOUR IN THE ENVIRONMENT	412 - 434	173
1. Movement in soil	412 - 416	173
2. Transfer to plants	417 - 418	175
3. Transfer to animals	419 - 420	175
4. Transfer to diet	421 - 425	176
5. Aquatic behaviour	426 - 434	177

	Paragraphs	Page
D. TRANSFER TO MAN	435 - 443	179
E. DOSIMETRY	444 - 456	182
1. Dose per unit intake	444 - 448	182
2. Dose per unit release	449 - 456	184
F. REFERENCES		188
X. RADIATION EFFECTS	457 - 476	197
A. SOMATIC EFFECTS	459 - 463	197
1. Early somatic effects	459 - 461	197
2. Late somatic effects	462 - 463	198
B. GENETIC EFFECTS	464 - 465	198
C. DOSE-RESPONSE RELATIONSHIPS	466 - 469	199
D. RISK ESTIMATES	470 - 476	200
XI. CONCLUSIONS	477 - 491	203
A. RADIONUCLIDES AND THE ENVIRONMENT	477 - 481	203
B. DOSE ASSESSMENTS	482 - 487	204
C. EFFECTS EVALUATION	488 - 491	206
ANNEX		208
EXCERPTS FROM "BASIC SAFETY STANDARDS FOR RADIATION PROTECTION 1982 EDITION"
