

Contents

Introduction, 1

CHAPTER 1

Examination Procedures and Results, 3

Clinical Examination, 3

Ultrasonography, 3

X-ray Examinations, 4

Mammography, 4

Method, 4

Analysis of Images, 5

Findings, 5

Pneumocystography, 5

Galactography, 6

Preoperative Labeling and Mass Radiography of Occult Lesions, 7

Microradiography, 7

Computed Tomography, 8

Magnetic Resonance Imaging, 9

Dr. S.H. Heywang

Principles and Techniques, 9

Results, 9

Magnetic Resonance Imaging without Contrast Medium, 9

Magnetic Resonance Imaging with Contrast Medium, 10

Thermography, 11

Electronic Thermovision, 11

Plate Thermography, 11

Cytologic Examination, 11

Puncture or Aspiration Cytology, 12

Evaluation, 12

Technique, 12

Results and Margin of Error, 13

Outlook, 14

Cytologic Examination of Breast Secretions, 14

Histologic Methods, 16

Summary Evaluation of the Examination Methods Described, 17

CHAPTER 2

The Healthy Breast, 19

Anatomical Foundation, 19

Mastion, 19

Development, Maturation, and Involution, 20

Hormonally Determined Changes in the Breast, 20

The Juvenile Breast, 21

The Breast of the Mature Woman (Including Pregnancy and Lactation), 21

Regression of the Breast Tissue (Involution and Atrophy), 36

CHAPTER 3

Congenital Anomalies, 40

Accessory Breasts, 40

Abnormalities of the Nipple and Milk Ducts, 40

Hypertrophy, 40

Hypoplasia, 41

Displaced Milk Duct Openings, 41

CHAPTER 4

Tumor-Like Lesions, 43

Ductal Ectasia (Secretory Disease), 43

Morphology and Clinical Findings, 43

Radiology and Supplementary Procedures, 43

Inflamed Pseudotumors, 44

Necrotic Fatty Tissue, 44

Morphology and Clinical Findings, 44

Radiology and Supplementary Procedures, 44

Eleoma Cysts and Dermoid Cysts (Pseudocysts), 44

Morphology and Clinical Findings, 44

Radiology and Supplementary Procedures, 44

Hamartoma, 44

Morphology and Clinical Findings, 44

Radiology and Supplementary Procedures, 45

Asynchronous Involution of the Lactating Breast, 45

Diffuse Hyperplasia, 45

Morphology and Clinical Findings, 45

Radiology and Supplementary Procedures, 45

Gynecomastia, 45

Morphology and Clinical Findings, 45

Radiology and Supplementary Procedures, 46

CHAPTER 5

Mondor's Disease, Obliterative Thrombophlebitis of the Thoracoepigastric Vein and Its Branches, 61

Morphology and Clinical Findings, 61

Radiology and Supplementary Procedures, 61

CHAPTER 6

Fibroadenoma, Adenofibroma, Phyllodes Tumor, Fibromatosis, Myofibroblastoma, 63

Morphology and Clinical Findings, 63

Fibroadenoma, Adenofibroma, Fibroma, Lactating Adenoma, 63

Phyllodes Tumor, 63

Fibromatosis and Myofibroblastoma, 64

Radiology and Supplementary Procedures, 64

CHAPTER 7

Mastopathy, 76

Morphology and Clinical Findings, 76

Pathologic Significance of Mastopathy, 77

Milk Duct Papilloma, 77

Morphology, Diagnosis, and Prognosis, 77

Radiology and Supplementary Procedures, 78

Cysts and Accompanying Proliferations, 78

Mammographic Criteria for Mastopathy, 80

CHAPTER 8

Calcifications in Benign and Malignant Processes in the Breast, 101

Morphology and Clinical Findings, 101

**Radiology and Supplementary
Procedures, 101**

Calcification in Benign Processes, 101

Calcification in Malignant Processes, 103

CHAPTER 9

Carcinoma, 120

Carcinoma In Situ

(Noninvasive Carcinoma), 120

Morphology and Clinical Findings, 120

Radiology and Supplementary
Procedures, 121

Diagnostic Value of Noninvasive
Carcinoma of the Breast, 122

Invasive Carcinoma, 136

Morphology and Clinical Findings, 136

Mapping and Staging, 136

Typing (according to WHO), 136

Grading, 137

Hormone Receptor Analysis in
Carcinoma of the Breast, 137

Radiology and Supplementary
Procedures, 138

Predominantly Stellate Growth, 144

Mixed Stellate/Knobby Tumors, 162

Predominantly Smoothly Contoured,
Knobby Polycyclic Growth, 172

Sarcomas and Metastases of
Other Tumors, 172

Predominantly Ductal Tumor Diffusion
with Calcification, 188

Predominantly Ductal Diffusion of
Tumor without Calcification, 193

Predominantly Diffuse Tumor
Growth, 198

Specific Forms of Growth, 207

CHAPTER 10

Problematic Differential Diagnoses, 218

CHAPTER 11

Breast Cancer in Men, 226

CHAPTER 12

Untreated Carcinoma, Local Recidivism and Metastases, 230

CHAPTER 13

Therapy-Related Changes, 236

**Changes During and After
Radiation Therapy, 245**

Bibliography, 255

Index, 260
