Preface	ix
<b>1</b> Erythropoiesis	<b>1</b>
<b>2</b> Diagnosis of Anemia	<b>6</b>
<b>3</b> Iron Deficiency Anemia	<b>30</b>
<b>4</b> Megaloblastic Anemias	<b>43</b>
<b>5</b> Hemoglobinopathies and Thalassemia Syndromes	<b>60</b>
<b>6</b> Hemolytic Anemias: General Remarks	<b>80</b>
<b>7</b> RBC Metabolism: Relation to RBC Function and Hemolytic Anemias	<b>87</b>
<b>8</b> Intrinsic Hemolytic Anemias Caused by RBC Membrane Abnormalities	<b>97</b>
<b>9</b> Hemolytic Anemias Caused by Antibodies	<b>107</b>
<b>10</b> Methemoglobinemia	<b>122</b>
<b>11</b> Anemias Due to Failure of Erythropoiesis	<b>125</b>
<b>12</b> Secondary Anemias in Nonhematologic Disorders	<b>136</b>
<b>13</b> Polycythemias	<b>143</b>
<b>14</b> Leukocytes: Biologic Considerations	<b>153</b>
<b>15</b> Leukemia: General Concepts and the Acute Leukemias	<b>162</b>
<b>16</b> Chronic Leukemias	<b>181</b>
<b>17</b> Myeloproliferative Disorders and Myelofibrosis	<b>196</b>
<b>18</b> Lymphomas	<b>206</b>
<b>19</b> Hodgkin's Disease	<b>223</b>

<b>20</b>	Immunoglobulins and Malignant Immunoproliferative Disorders	235
<b>21</b>	Infections and Other Disorders with Prominent Hematologic Findings	258
<b>22</b>	Hematologic Reactions to Drugs	272
<b>23</b>	Hemostatic Mechanisms	282
<b>24</b>	Screening Evaluation of Hemostasis	303
<b>25</b>	Thrombocytes and Thrombocytopenic Purpuras	314
<b>26</b>	Disorders with Prolonged Bleeding Times but Normal Platelet Counts	334
<b>27</b>	Genetic Clotting Factor Disorders	345
<b>28</b>	Acquired Plasma Clotting Factor Disorders and Anti-coagulant Therapy	356
<b>29</b>	Transfusion Therapy	373
	Index	381
