PREFACE . . . . .	ix
ACKNOWLEDGMENTS . . . . .	xii
I. ANATOMY OF THE KIDNEY . . . . .	1
II. NORMAL RENAL FUNCTION . . . . .	12
Filtration . . . . .	16
Renal Blood Flow . . . . .	20
Tubular Resorption . . . . .	21
Concentration and Dilution of the Urine . . . . .	32
Metabolic Function of the Kidney . . . . .	38
The Adrenal Cortex and Renal Function . . . . .	38
Other Factors Affecting Sodium Excretion . . . . .	40
Tests of Renal Function . . . . .	40
III. NORMAL COMPOSITION OF BODY FLUIDS . . . . .	52
Fluid Compartments . . . . .	52
Composition of Body Fluids . . . . .	54
The Regulation of Composition . . . . .	56
The Regulation of pH . . . . .	60
IV. THE DISEASED KIDNEY . . . . .	67
The Concept of Decreased Flexibility . . . . .	70
Excretion of Water . . . . .	70
Hypothenuria . . . . .	72
The Role of Solute (Osmotic Diuresis) . . . . .	73
The Intact Nephron Hypothesis . . . . .	76
The Excretion of Acid and Sodium . . . . .	78
Nitrogen Retention . . . . .	83
Relation of Structure and Function in Acute Renal Failure . . . . .	85
V. SIGNS AND SYMPTOMS OF RENAL FAILURE . . . . .	96
Effect of Compensatory Mechanisms . . . . .	96
Functional Impairment without Failure . . . . .	96
Role of Electrolyte Losses . . . . .	98
Examination of the Urine . . . . .	100

The Nephrotic Syndrome .....	100
Lack of Correlation between Symptoms and the Degree of Renal Impairment .....	101
Abnormalities of Body Composition in Renal Failure .....	102
Anemia .....	103
VI. DIAGNOSIS AND TREATMENT OF ACUTE RENAL FAILURE .....	118
Prerenal Failure .....	119
Postrenal Failure .....	124
Renal Failure .....	126
Nephrotoxic Renal Failure .....	131
Treatment of Acute Renal Failure .....	134
Specific Problems in the Treatment of Acute Renal Failure .....	158
Infection .....	167
Treatment of Complications of Acute Renal Failure .....	173
Acute Potassium Intoxication .....	180
Management of the Diuretic Phase .....	191
Prognosis in Acute Renal Failure .....	202
VII. TREATMENT OF CHRONIC RENAL FAILURE .....	204
Reversible Defects .....	204
Treatment of Acidosis and Alkalosis .....	210
Dietary Treatment .....	212
Treatment of Complications .....	234
General Considerations .....	245
Treatment of Other Metabolic Abnormalities in Renal Failure .....	246
Prognosis .....	247
When not to Treat .....	248
VIII. TREATMENT OF RENAL FAILURE BY EXTRARENAL ROUTES .....	249
The Artificial Kidney .....	250
Complications of Hemodialysis .....	259
Peritoneal Dialysis .....	260
IX. TRANSPLANTATION OF THE KIDNEY .....	270
APPENDICES	
Technic of Peritoneal Dialysis, <i>modified from E. B.</i>	

<i>Hager and J. P. Merrill</i> .....	290
Illustrative Case: The Management of Dehydration with Incipient Renal Failure .....	301
Isolation Technic for Containment or Exclusion of Bac- teria for the Prevention of Cross Infection in Hospitals, by <i>Carl W. Walter</i> .....	306
Neurological Complications of Acute and Chronic Renal Failure, by <i>H. Richard Tyler</i> .....	315
Additional Tables .....	338
REFERENCES .....	341
INDEX .....	375
