VOLUME I

PART I. GRAPHIC METHODS OF CARDIAC EXAMINATION

1. ROENTGENOLOGIC EXAMINATION OF THE HEART	3
ROENTGENOLOGIC TECHNICS	3
Fluoroscopy	3
Fluoroscopic Image Intensification	4
Teleoroentgenography	6
Orthodiagraphy	6
THE NORMAL CARDIAC SILHOUETTE	6
Cardiac Tomography	11
Roentgenkymography and Elektrokymography	13
Angiocardiography	15
2. ELECTROCARDIOGRAPHY AND VECTORCARDIOGRAPHY	24
ELECTROCARDIOGRAPHY	24
The Electrophysiologic Basis of the Electrocardiogram	24
The Leads of the Electrocardiogram	30
The Normal Electrocardiogram and Its Genesis	35
VECTORCARDIOGRAPHY (VECTOR ELECTROCARDIOGRAPHY)	46
The Normal Vectorcardiogram	59
Clinical Application of Vectorcardiography	65
Ventricular Gradient	66
3. PHONOCARDIOGRAPHY AND OTHER GRAPHIC METHODS	74
PHONOCARDIOGRAPHY—HEART SOUNDS	74
The Normal Heart Sounds	76
The Opening Snap of Mitral Stenosis	82
Cardiac Murmurs	82

THEORIES OF MECHANISM OF MANIFESTATIONS OF HEART FAILURE	270
The Backward Failure Theory	270
The Forward Failure Theory	271
Criticisms of Backward Failure and Forward Failure Theories	272
THE MECHANISM OF CONGESTIVE HEART FAILURE	273
PATHOGENESIS OF LEFT-SIDED AND RIGHT-SIDED HEART FAILURE	277
THE PATHOGENESIS OF HIGH-OUTPUT HEART FAILURE	278
10. THE PATHOGENESIS OF INDIVIDUAL MANIFESTATIONS OF CONGESTIVE HEART FAILURE	284
PATHOGENESIS OF CARDIAC DYSPNEA	284
Cerebral Blood Flow and Dyspnea	284
Blood Chemical Changes and Dyspnea	284
Pulmonary Congestion and Rigidity As the Cause of Cardiac Dyspnea	285
Pathogenesis of Subjective Distress During Dyspnea	289
Production of Dyspnea During Right-Sided Heart Failure	289
Relation of Effort to Cardiac Dyspnea	290
PATHOGENESIS OF ORTHOPNEA	290
PATHOGENESIS OF PAROXYSMAL DYSPNEA AND CARDIAC ASTHMA	291
PATHOGENESIS OF ACUTE PULMONARY EDEMA	292
PATHOGENESIS OF CHEYNE-STOKES RESPIRATION	295
PATHOGENESIS OF CARDIAC EDEMA	296
PATHOGENESIS OF CARDIAC HYDROTHORAX	300
PATHOGENESIS OF ASCITES	301
PATHOGENESIS OF CYANOSIS	301
The Amount of Reduced Hemoglobin in the Blood	302
The Amount of Blood Visible in the Vessels of the Skin	303
Factors Modifying Cyanotic Hue	303
PATHOGENESIS OF ICTERUS IN HEART DISEASE	303
PATHOGENESIS OF GALLOP RHYTHM	304
PATHOGENESIS OF PULSUS ALTERNANS (ALTERNATION OF PULSE; CARDIAC ALTERNANS)	304
11. CIRCULATORY AND RELATED MEASUREMENTS	307
THE CARDIAC OUTPUT	307
Measurement of the Cardiac Output	307
The Cardiac Output in Health and Disease	313
THE CIRCULATION TIME	314
Methods of Determining the Circulation Time	315
Clinical Abnormalities of the Circulation Time	316
Diagnostic Value of the Circulation Time	317
VENOUS PRESSURE	317
BLOOD VOLUME	321
Determination of the Circulating Blood Volume	322
The Normal Circulating Blood Volume	322
Physiologic and Pathologic Variations in Blood Volume	323
The Intrathoracic Blood Volume	324
The Circulating Blood Volume in Congestive Heart Failure	326
BODY WATER	326
EXTRACELLULAR AND INTRACELLULAR ELECTROLYTES	327
BLOOD pH AND BLOOD GASES	329

TESTS OF PULMONARY FUNCTION	334
TESTS OF MYOCARDIAL RESERVE	334
12. THE TREATMENT OF CONGESTIVE HEART FAILURE	341
GENERAL THERAPEUTIC MEASURES	342
REST	342
RESTRICTION OF SODIUM AND FLUID	346
DIGITALIS AND RELATED DRUGS	351
The Action of Digitalis	352
Indications for Digitalis Therapy	361
Factors Modifying the Indications for Digitalis	363
Contraindications and Nonindications for Digitalis Therapy	364
Preparations and Dosage of Digitalis	366
Standardization and Assay of Digitalis Preparations	370
The Administration of Digitalis	370
Evidences of Digitalis Overdosage	376
The Effect of Digitalis on the Electrocardiogram	386
DIURETICS	389
Mercurial Diuretics	389
Oral Diuretics	397
Ethacrynic Acid	405
Furosemide	407
Antialdosterone Diuretics	408
Triamterene (Dyrenium)	410
Acidifying Salts	410
Glucocorticoids	412
Xanthine Derivatives	412
Uracils	413
Nonelectrolyte (Osmotic) Diuretics, Mannitol, Urea	413
Serum Albumin Infusions	413
Potassium Salts	414
Alcohol	414
OTHER DRUGS	414
OXYGEN THERAPY AND POSITIVE PRESSURE RESPIRATION	416
PHLEBOTOMY (VENESECTION)	417
MECHANICAL REMOVAL OF SEROUS EFFUSION AND EDEMA FLUID	418
LIGATION OF THE INFERIOR VENA CAVA	419
TOTAL THYROIDECTOMY, ANTITHYROID DRUGS, RADIOIODINE	419
FLUID AND ELECTROLYTE DISTURBANCES IN HEART FAILURE AND THEIR TREATMENT	420
Hyponatremia	420
Diuresis Hypochloremia with Alkalosis and Hypokalemia	424
Potassium Depletion	425
Hyperchloremic Acidosis	426
EMERGENCY TREATMENT OF ACUTE LEFT VENTRICULAR FAILURE (CARDIAC ASTHMA; PULMONARY EDEMA)	426
TREATMENT OF INTRACTABLE HEART FAILURE	428
13. ACUTE CIRCULATORY FAILURE: SHOCK, SYNCOPE AND SUDDEN DEATH	443
SHOCK	444

Definition of Shock	444
Classification of Shock	445
Pathologic Physiology	445
Etiology and Pathogenesis	449
Pathology of Shock	452
Clinical Features of Shock	453
Treatment of Shock	455
SYNCOPE	462
Treatment of Syncope	468
CARDIAC ARREST	469
SUDDEN DEATH	474
Pathologic Physiology	474
Etiology and Pathology	474

PART III. THE CARDIAC ARRHYTHMIAS

14. DISTURBANCES IN IMPULSE FORMATION	483
CLASSIFICATION OF DISORDERS OF THE HEART BEAT	483
SINUS TACHYCARDIA	485
SINUS BRADYCARDIA	485
SINUS ARRHYTHMIA (PHASIC ARRHYTHMIA, JUVENILE ARRHYTHMIA)	486
SINUS ARREST AND ATRIAL STANDSTILL	487
Ectopic Beats and Ectopic Rhythms	488
ESCAPE RHYTHMS	488
PREMATURE BEATS	496
Treatment	508
15. THE ECTOPIC TACHYCARDIAS	514
PAROXYSMAL ATRIAL TACHYCARDIA	514
PAROXYSMAL ATRIAL TACHYCARDIA WITH BLOCK (PAT WITH BLOCK)	523
ATRIAL FLUTTER	526
ATRIAL FIBRILLATION	534
Treatment	543
<i>Treatment of Paroxysmal Atrial Fibrillation</i>	543
<i>Treatment of Established Atrial Fibrillation</i>	544
VENTRICULAR TACHYCARDIA	562
VENTRICULAR FIBRILLATION	572
DIAGNOSIS AND DIFFERENTIAL DIAGNOSIS OF TACHYCARDIAS	575
16. DISTURBANCES IN CONDUCTION: HEART BLOCK AND BUNDLE BRANCH BLOCK	583
SINOATRIAL BLOCK	583
ATRIOVENTRICULAR BLOCK	584
<i>Treatment of Heart Block and the Adams-Stokes Syndrome</i>	602
BUNDLE BRANCH BLOCK	616
<i>The Electrocardiogram</i>	617
<i>Clinical Features and Diagnosis</i>	627

<i>Course and Prognosis</i>	627
<i>Treatment</i>	628
SHORT P-R INTERVAL WITH WIDE QRS (WOLFF-PARKINSON-WHITE SYNDROME)	628
PART IV. DISEASES OF THE CORONARY ARTERIES AND CORONARY HEART DISEASE	
17. CORONARY (ATHEROSCLEROTIC) HEART DISEASE; OTHER DISEASES OF THE CORONARY ARTERIES	643
INCIDENCE OF CORONARY HEART DISEASE	643
ETIOLOGY OF CORONARY (ATHEROSCLEROTIC) HEART DISEASE	644
DEFINITION AND CLASSIFICATION OF ARTERIOSCLEROSIS	651
PATHOGENESIS OF ATHEROSCLEROSIS	651
Aging Theory of Atherosclerosis	652
Metabolic Theory of Atherosclerosis	652
<i>Evidence for Metabolic Theory</i>	654
Endocrine Factors	668
Mechanical Factors in Atherosclerosis: Intravascular Pressure and Hypertension	670
PATHOLOGY OF CORONARY ATHEROSCLEROSIS	671
Microscopic Appearance of Coronary Atherosclerosis	672
Macroscopic Pathology	674
PATHOLOGIC PHYSIOLOGY	675
CLINICAL FEATURES	675
DIAGNOSIS OF CORONARY (ATHEROSCLEROTIC) HEART DISEASE	677
PROGNOSIS	684
TREATMENT	684
OTHER DISEASES OF THE CORONARY ARTERIES	693
18. ANGINA PECTORIS—CLINICAL FEATURES, ETIOLOGY AND PATHOGENESIS	706
CHARACTERISTICS OF THE PAIN OF ANGINA PECTORIS	706
Other Symptoms and Signs	709
ETIOLOGY AND PATHOLOGY	711
Precipitating Causes of Angina Pectoris	711
Underlying Causes of Angina Pectoris	714
Contributing Factors	716
Predisposing Factors	718
PATHOGENESIS	718
Site of Origin and Cause of Pain	724
Nervous Pathway of Pain in Angina Pectoris	724
The Physiologic Basis for the Perception and Radiation of Anginal Pain	725
Angina Pectoris and Congestive Heart Failure	726
Angina Pectoris and Intermittent Claudication	726
ACUTE CORONARY INSUFFICIENCY	726
19. ANGINA PECTORIS—DIAGNOSIS, DIFFERENTIAL DIAGNOSIS, PROGNOSIS AND TREATMENT	734
DIAGNOSIS	734

The Clinical History 734

Objective Evidences of Cardiac Disease 735

Tests of Coronary Reserve and Coronary Insufficiency 736

DIFFERENTIAL DIAGNOSIS 741

PROGNOSIS 744

TREATMENT 746

 General Management 748

 Drug Therapy 750

 Induced Myxedema by Thiouracil or Radioiodine 757

 Paravertebral Alcohol Injections 758

 Surgical Treatment of Angina Pectoris 759

 Management of Acute Angina Pectoris, Status Anginosus, Angina Decubitus, Intractable Angina Pectoris 763

20. ACUTE CORONARY OCCLUSION AND MYOCARDIAL INFARCTION—
ETIOLOGY, PATHOLOGIC PHYSIOLOGY AND PATHOLOGY 770

 ETIOLOGY OF ACUTE CORONARY OCCLUSION 771

 Underlying Causes 771

 Contributory and Predisposing Factors 771

 Precipitating Factors 774

 PATHOLOGIC PHYSIOLOGY 778

 The Effect of Experimental Acute Coronary Artery Ligation..... 778

 Experimental Chronic Coronary Artery Ligation 780

 Factors Determining the Occurrence of Infarcts After Acute Coronary Occlusion 780

 PATHOLOGY OF ATHEROSCLEROTIC CORONARY ARTERY OCCLUSION AND CARDIAC INFARCTION 781

 Mechanism of Atherosclerotic Coronary Occlusion 781

 Coronary Thrombosis and Coagulation Mechanism 782

 Arterial Intima and Thrombosis 785

 Pathology of Coronary Thrombi 786

 Localization of Coronary Artery Occlusions 786

 Occurrence and Location of Cardiac Infarction 786

 Macroscopic and Microscopic Pathology of Cardiac Infarcts 789

 Endocardial and Pericardial Lesions in Cardiac Infarcts 790

 Size of the Heart After Cardiac Infarction 790

 RECENT MYOCARDIAL INFARCTION WITHOUT ACUTE CORONARY OCCLUSION 791

21. ACUTE CORONARY OCCLUSION AND MYOCARDIAL INFARCTION—
CLINICAL FEATURES 796

 SYMPTOMATOLOGY 796

 Premonitory Symptoms (Preinfarction Angina) 796

 Clinical Picture of Acute Myocardial Infarction 797

 Associated and Minor Symptoms 805

 OBJECTIVE MANIFESTATIONS OF ACUTE MYOCARDIAL INFARCTION 806

 General Appearance and Behavior 806

 The Heart 807

 The Pulse 807

 The Blood Pressure 808

Fever	809
Leukocytosis	809
Increased Sedimentation Rate	810
Serum Enzymes	810
C-Reactive Protein	813
Weltmann Serum Coagulation Band	814
Other Laboratory Findings	814
Circulatory Dynamics in Acute Myocardial Infarction	815
Roentgenologic Findings in Acute Cardiac Infarction	815
Electrocardiographic Changes in Acute Cardiac Infarction	816
Vectorcardiogram in Myocardial Infarction	836
The Ballistocardiogram	841
Kinetocardiogram	841
Cardiac Arrhythmias in Acute Myocardial Infarction	841
COMPLICATIONS AND CAUSES OF DEATH	851
INFARCTION OF THE ATRIA	860
22. ACUTE CORONARY OCCLUSION AND MYOCARDIAL INFARCTION— DIAGNOSIS, DIFFERENTIAL DIAGNOSIS, PROGNOSIS AND TREATMENT	866
DIAGNOSIS OF ACUTE MYOCARDIAL INFARCTION	866
DIFFERENTIAL DIAGNOSIS	870
Angina Pectoris	870
Diseases of the Chest	872
Abdominal Conditions Resembling Cardiac Infarction	873
PROGNOSIS	874
Mortality Rate of the Acute Attack	874
Factors Influencing Prognosis	875
Prognosis After Recovery from the Acute Attack	877
Residual Symptoms and Rehabilitation After Acute Myocardial Infarction	878
Subsequent Attacks of Myocardial Infarction	879
Effect of Patient's Cooperation and Morale	880
TREATMENT OF ACUTE MYOCARDIAL INFARCTION	880
Symptomatic Treatment	882
Shock	882
Acute Left Ventricular Failure (<i>Acute Pulmonary Edema</i>)	891
Individual Therapeutic Measures and Drugs	891
Treatment of Complications	914
Convalescence and Rehabilitation	922

VOLUME II

PART V. STRUCTURAL ABNORMALITIES OF THE HEART

23. ACUTE PERICARDITIS	933
CLASSIFICATION AND ETIOLOGY	933
PATHOLOGY	934

CLINICAL FEATURES	934
Subjective Symptoms	934
Objective Signs	936
Roentgenology	939
The Electrocardiogram	943
DIAGNOSIS AND DIFFERENTIAL DIAGNOSIS	945
COURSE AND PROGNOSIS	946
TREATMENT	947
Pericardial Aspiration	947
Surgical Therapy	949
INDIVIDUAL FORMS OF PERICARDITIS	950
Rheumatic Pericarditis	950
Uremic Pericarditis	950
Bacterial (Purulent) Pericarditis	951
Tuberculous Pericarditis	952
Idiopathic Pericarditis	954
Other Forms	957
PERICARDIAL CYSTS AND DIVERTICULA	960
HEMOPERICARDIUM	961
HYDROPERICARDIUM	961
PNEUMOPERICARDIUM	962
24. ADHESIVE PERICARDITIS. CHRONIC CONSTRICTIVE PERICARDITIS ...	966
CONSTRICTIVE PERICARDITIS (PERICARDIAL COMPRESSION SCAR)	966
Definitions	966
Etiology	967
Pathology	968
Pathologic Physiology	969
Clinical Features	970
Diagnosis	976
Differential Diagnosis	977
Treatment	978
Prognosis, With and Without Operation	979
CALCIFICATION OF THE PERICARDIUM	981
25. MYOCARDITIS AND MYOCARDIAL DISEASE OF OBSCURE ORIGIN	984
MYOCARDITIS	984
ACUTE ISOLATED MYOCARDITIS	989
The Myocardiopathies. Primary or Idiopathic Myocardial Disease.	
Idiopathic Hypertrophy of the Heart	992
IDIOPATHIC MYOCARDIOPATHY	993
ALCOHOLIC MYOCARDIOPATHY	999
FAMILIAL CARDIOMEGALY	1000
AFRICAN ENDOMYOCARDIAL FIBROSIS	1001
POSTPARTUM HEART DISEASE (IDIOPATHIC MYOCARDIOPATHY OF PUERPERIUM)	1002
ENDOCARDIAL FIBROELASTOSIS	1003
SCLERODERMA (SYSTEMIC SCLEROSIS)	1005
AMYLOIDOSIS OF THE HEART	1006
SARCOIDOSIS	1008
LUPUS ERYTHEMATOSUS	1009

NECROTIZING ARTERITIS OR ANGIITIS	1010
MYOTONIA ATROPHICA ('DYSTROPHICA)	1011
FRIEDREICH'S ATAXIA	1011
PROGRESSIVE MUSCULAR DYSTROPHY	1012
MUCOPOLYSACCHARIDOSES (GARGOYLISM, HURLER'S SYNDROME)	1013
GLYCOGEN STORAGE HEART DISEASE	1014
HEMOCHROMATOSIS OF THE HEART	1014
FATTY INFILTRATION OF THE HEART (FATTY HEART; LIPOMATOSIS CORDIS)	1014
ATROPHY OF THE HEART	1014
TROPICAL EOSINOPHILIA	1014
26. ENDOCARDITIS AND ENDOCARDIAL DISEASE	1019
DEFINITION	1019
CLASSIFICATION	1019
GENERAL PATHOLOGY OF ENDOCARDITIS	1020
CHARACTERIZATION OF INDIVIDUAL FORMS OF ENDOCARDITIS	1021
Atypical Verrucous Endocarditis (Libman-Sacks Disease) (Systemic Lupus Erythematosus)	1021
Nonbacterial Thrombotic Endocarditis	1024
Syphilitic Endocarditis	1025
Tuberculous Endocarditis	1025
Endocardial Fibroelastosis	1025
Endomyocardial Fibrosis	1026
Loeffler's Parietal Fibroplastic Endocarditis	1026
OTHER ENDOCARDIAL LESIONS	1027
27. MITRAL VALVULAR DISEASE	1029
ETIOLOGY OF MITRAL VALVULAR DISEASE	1029
PATHOLOGY OF MITRAL VALVULAR DISEASE	1030
MITRAL STENOSIS	1033
Pathologic Physiology	1033
<i>Cardiac Catheterization</i>	1033
Clinical Features	1040
Diagnosis	1059
Differential Diagnosis	1060
Prognosis	1061
Medical Treatment	1062
Surgical Treatment	1063
MITRAL REGURGITATION	1082
Pathologic Physiology	1082
Clinical Features	1084
Diagnosis	1090
Differential Diagnosis	1091
Prognosis	1093
Medical Treatment	1093
Surgical Treatment	1093
28. AORTIC REGURGITATION (AORTIC INSUFFICIENCY)	1103
ETIOLOGY AND PATHOLOGY	1103

	PATHOLOGIC PHYSIOLOGY	1106
	CLINICAL FEATURES	1108
	Stage of Compensation	1108
	Cardiac Pain in Aortic Regurgitation	1109
	Left Ventricular Failure in Aortic Regurgitation	1109
	Right-Sided Heart Failure in Aortic Regurgitation	1110
	Objective Evidences of Aortic Regurgitation	1111
	Complications	1117
	DIAGNOSIS	1117
	PROGNOSIS	1118
	SURGICAL TREATMENT OF AORTIC REGURGITATION	1119
	Arteriovenous Fistula	1122
	ETIOLOGY AND PATHOLOGY	1122
	PATHOLOGIC PHYSIOLOGY	1122
	CLINICAL FEATURES	1123
	DIAGNOSIS	1124
	TREATMENT	1124
29.	AORTIC STENOSIS	1128
	ETIOLOGY AND PATHOLOGY	1128
	PATHOLOGIC PHYSIOLOGY	1133
	CLINICAL FEATURES	1136
	Objective Findings in Aortic Stenosis	1140
	Complications of Aortic Stenosis	1148
	DIAGNOSIS	1149
	PROGNOSIS	1150
	TREATMENT	1151
	Medical Management	1151
	Surgical Treatment	1151
30.	TRICUSPID AND PULMONIC VALVULAR DISEASE	1162
	Tricuspid Valvular Disease	1162
	ETIOLOGY	1162
	PATHOLOGY	1163
	PATHOLOGIC PHYSIOLOGY	1164
	CLINICAL FEATURES	1166
	DIAGNOSIS	1172
	COURSE AND PROGNOSIS	1174
	TREATMENT	1174
	Pulmonic Regurgitation	1176
	ETIOLOGY AND PATHOLOGY	1176
	CLINICAL FEATURES	1178
	DIAGNOSIS	1180
	PROGNOSIS AND TREATMENT	1180
	Pulmonic Stenosis	1180
	CLINICAL FEATURES	1181
	Combined Valvular Disease	1181

PART VI. ETIOLOGIC FORMS OF HEART DISEASE

31. CONGENITAL HEART DISEASE	1187
INCIDENCE	1187
ETIOLOGY	1187
GENERAL EMBRYOLOGY AND PATHOLOGY	1190
GENERAL SYMPTOMATOLOGY	1191
Pathogenesis of Cyanosis in Congenital Heart Disease	1192
Pathogenesis of Clubbing in Congenital Heart Disease	1194
COMPLICATIONS	1194
The Types of Congenital Heart Disease	1195
ATRIAL SEPTAL DEFECTS	1197
ENDOCARDIAL CUSHION DEFECTS (PERSISTENT OSTIUM PRIMUM; PERSISTENT COMMON ATRIOVENTRICULAR CANAL)	1206
Cor Triatriatum	1211
Anomalous Entrance of the Pulmonary Veins	1211
Left-Sided Superior Vena Cava	1216
VENTRICULAR SEPTAL DEFECTS	1216
Ventricular Septal Defect with Aortic Regurgitation	1226
Ventricular Septal Defect with Mitral Valve Disease	1228
Cor Triloculare Biatritium (Single Ventricle)	1228
Cor Biloculare	1229
Eisenmenger's Complex	1229
ISOLATED PULMONIC STENOSIS (PULMONIC STENOSIS WITH NORMAL AORTIC ROOT)	1230
THE TETRALOGY OF FALLOT	1238
Pulmonary Atresia (Pseudotruncus Arteriosus)	1249
Single Ventricle with Pulmonary Stenosis	1250
Pulmonary Atresia with Normal Aortic Root	1250
COMPLETE TRANSPOSITION OF THE GREAT VESSELS	1251
Corrected Transposition of the Great Vessels	1256
Origin of Both Great Arteries from the Right Ventricle (Double-Outlet Right Ventricle)	1258
The Taussig-Bing Syndrome	1260
PATENT DUCTUS ARTERIOSUS	1260
PATENT DUCTUS ARTERIOSUS WITH PULMONARY HYPERTENSION AND REVERSED SHUNT	1267
Persistent Truncus Arteriosus Communis	1269
Aortic Septal Defect (Aorticopulmonary Septal Defect)	1272
Aneurysm of Sinus of Valsalva	1272
Aortico-Left Ventricular Tunnel	1272
Aneurysm of the Interventricular Septum	1272
COARCTATION OF THE AORTA	1273
Coarctation of the Aorta with Patent Ductus Arteriosus	1280
Other Congenital Cardiac Anomalies	1281
RIGHT-SIDED OR DOUBLE AORTIC ARCH	1281
Other Anomalies of the Aortic Arch	1283
DEXTROCARDIA	1284
CONGENITAL IDIOPATHIC HYPERTROPHY (IDIOPATHIC MYOCARDIOPATHY)	1287
CONGENITAL VALVULAR DEFECTS	1287
Pulmonic Stenosis	1287

Pulmonic Regurgitation	1287
Aortic Valvular Disease	1287
Tricuspid Valvular Disease	1289
Congenital Mitral Valvular Disease	1293
ANOMALIES OF THE CORONARY ARTERIES	1295
PERICARDIAL DEFECTS	1298
ANOMALOUS BANDS, CHORDAE, AND PAPILLARY MUSCLES	1298
CONGENITAL ARTERIOVENOUS ANEURYSM OR VARIX OF THE LUNG (CAVERNOUS HEMANGIOMA)	1299
32. RHEUMATIC FEVER—ETIOLOGY, PATHOGENESIS AND PATHOLOGY ...	1311
INCIDENCE AND IMPORTANCE OF RHEUMATIC FEVER AND RHEUMATIC HEART DISEASE	1311
DEFINITION AND CRITERIA	1312
ETIOLOGY AND PATHOGENESIS	1313
Specific Cause	1313
Predisposing Causes of Rheumatic Fever	1319
PATHOLOGY	1322
General Features	1322
Cardiac Lesions	1322
Extracardiac Lesions in Rheumatic Fever	1326
Relation of Rheumatic Fever to Rheumatoid Arthritis	1326
33. RHEUMATIC FEVER—CLINICAL PICTURE	1330
INTRODUCTION	1330
MODES OF ONSET	1331
CLINICAL FORMS OF RHEUMATIC FEVER	1331
GENERAL COURSE OF RHEUMATIC FEVER	1332
THE INDIVIDUAL FEATURES OF RHEUMATIC FEVER	1332
General Symptoms	1332
Local Symptoms	1334
ELECTROCARDIOGRAPHIC CHANGES	1343
34. RHEUMATIC FEVER—DIAGNOSIS, DIFFERENTIAL DIAGNOSIS, PROGNOSIS AND TREATMENT	1347
DIAGNOSIS OF RHEUMATIC HEART DISEASE AND RHEUMATIC DISEASE	1347
The Presence of Active Rheumatic Disease	1347
The Presence of Rheumatic Heart Disease in Patients without Active Rheumatic Fever	1352
DIFFERENTIAL DIAGNOSIS OF RHEUMATIC FEVER	1353
PROGNOSIS OF RHEUMATIC FEVER AND RHEUMATIC HEART DISEASE	1355
The Acute Attack of Rheumatic Fever	1355
The Probability and Significance of Recurrent Rheumatic Fever and Cardiac Damage	1356
The Course After Acute Rheumatic Fever	1358
Causes of Death in Rheumatic Heart Disease	1359
THE TREATMENT OF RHEUMATIC FEVER AND RHEUMATIC HEART DISEASE	1359
The Acute Attack of Rheumatic Fever	1359

Convalescence and Rehabilitation	1365
Treatment of the Chronic Inactive Stage of Rheumatic Heart Disease ..	1366
The Treatment of Chorea	1371
35. BACTERIAL ENDOCARDITIS	1374
ETIOLOGY	1375
Causative Organisms	1375
Predisposing Factors	1378
PATHOGENESIS	1381
PATHOLOGY	1382
The Heart	1382
Kidney	1385
Spleen	1385
Central Nervous System	1386
Liver	1386
Lungs	1386
Bone Marrow	1386
Arterial Lesions. Mycotic Aneurysms	1386
CLINICAL FEATURES	1386
Mode of Onset and General Course	1386
Symptoms and Signs	1387
Symptoms of Individual Organ Systems	1388
Individual Types of Endocarditis	1392
DIAGNOSIS AND DIFFERENTIAL DIAGNOSIS	1395
TREATMENT	1398
Principles of Antibiotic Treatment	1398
Commencement of Treatment	1399
Sensitivity of the Causative Organism	1399
Serum Bactericidal Test	1400
Antibiotic Treatment According to Causative Organism	1400
Treatment of Endocarditis in Cases with Negative Blood Cultures	1410
Individual Antibiotics	1410
Surgical Treatment	1413
Prophylactic Treatment	1413
PROGNOSIS	1414
36. SYPHILIS OF THE HEART AND AORTA. NONSYPHILITIC AORTIC DISEASE	1422
ETIOLOGY OF AORTIC SYPHILIS	1422
PATHOLOGY OF CARDIOAORTIC SYPHILIS	1423
Syphilitic Aortitis	1423
Complications of Syphilitic Aortitis	1424
Syphilitic Myocarditis	1425
CLINICAL FEATURES	1426
Uncomplicated Syphilitic Aortitis	1426
Coronary Stenosis or Occlusion	1426
Syphilitic Aortic Regurgitation	1426
Aneurysm of the Aorta	1427
Gummata of the Heart and Gummatous Myocarditis	1428

Arrhythmias and Electrocardiographic Changes in Syphilitic Aortitis and Its Complications	1429
DIAGNOSIS OF CARDIOAORTIC SYPHILIS	1429
PROGNOSIS	1432
TREATMENT OF CARDIOVASCULAR SYPHILIS	1433
Nonsyphilitic Aortic Disease	1434
ANEURYSM OF THE AORTA	1434
Aneurysm of the Thoracic Aorta	1435
Traumatic Aneurysm	1439
Dissecting Aneurysm of the Aorta	1440
Mycotic Aneurysms of the Aorta	1445
Abdominal Aortic Aneurysm	1445
OCCLUSIVE DISEASE OF THE AORTA	1448
AORTIC ARCH SYNDROME (TAKAYASU'S SYNDROME, PULSELESS DISEASE)	1449
OTHER DISEASES OF THE AORTA	1450
37. THE HEART IN INFECTIONS	1455
THE HEART IN DIPHTHERIA	1455
Clinical Features	1456
Diagnosis	1457
Prognosis	1457
Treatment	1458
SCARLET FEVER	1458
Scarlatinal (Benign) Carditis	1458
ACUTE TONSILLITIS AND NASOPHARYNGITIS	1459
PNEUMONIA	1459
BACTERIAL INFLUENZA	1461
TYPHOID FEVER	1461
MENINGOCOCCUS INFECTIONS	1461
UNDULANT FEVER	1462
LEPTOSPIROSIS	1462
TUBERCULOSIS	1462
OTHER BACTERIAL INFECTIONS	1463
FUNGAL INFECTIONS	1463
VIRUS INFECTIONS	1464
RICKETTSIAL DISEASES	1465
TRICHINOSIS	1466
ECHINOCOCCUS INFECTIONS	1466
SCHISTOSOMIASIS	1467
TRYPANOSOMIASIS (CHAGAS' DISEASE)	1467
TOXOPLASMOSIS	1469
CARDIAC DISEASE DUE TO INTOXICATIONS, DRUGS OR PHYSICAL AGENTS	1469
38. THE HEART IN HYPERTENSION AND RENAL DISEASE	1474
HYPERTENSION AND HYPERTENSIVE HEART DISEASE	1474
NORMAL BLOOD PRESSURE AND HIGH BLOOD PRESSURE (HYPERTENSION)	1475
ETIOLOGY OF HYPERTENSIVE HEART DISEASE	1477
Theories of Hypertension	1477
Other Etiologic Factors	1483

PATHOLOGIC PHYSIOLOGY	1484
PATHOLOGY	1485
CLINICAL FEATURES AND COURSE	1486
ELECTROCARDIOGRAPHY	1486
EVALUATION OF HYPERTENSION	1487
DIAGNOSIS OF HYPERTENSIVE HEART DISEASE	1489
PROGNOSIS	1489
TREATMENT	1492
Cardiac Manifestations	1492
Control of Hypertension	1492
Rice Diet and Other Low Sodium Diets	1494
Drug Treatment of Hypertension	1494
Surgical Treatment of Hypertension	1506
RENOVASCULAR HYPERTENSION	1506
The Heart in Relation to Renal Disease	1513
ACUTE GLOMERULONEPHRITIS	1513
TOXEMIA OF PREGNANCY (PREECLAMPSIA AND ECLAMPSIA)	1515
LOWER NEPHRON NEPHROSIS (ACUTE TUBULAR NECROSIS)	1516
CHRONIC NEPHRITIS AND UREMIA	1517
39. PULMONARY EMBOLISM AND ACUTE COR PULMONALE	1528
RELATION OF PULMONARY EMBOLISM TO HEART DISEASE	1528
ETIOLOGY OF PULMONARY EMBOLISM	1529
PATHOLOGY	1529
PATHOLOGIC PHYSIOLOGY	1530
CLINICAL FEATURES	1531
Laboratory Findings	1533
Pulmonary Function Tests	1533
Cardiac Catheterization	1533
Electrocardiographic Signs of Pulmonary Embolism	1534
The Vectorcardiogram in Acute Cor Pulmonale	1535
Roentgenology	1535
Radioisotope Scanning	1536
Pulmonary Angiography	1537
DIAGNOSIS AND DIFFERENTIAL DIAGNOSIS	1537
PROGNOSIS OF ACUTE COR PULMONALE	1539
TREATMENT OF PULMONARY EMBOLISM	1540
Prophylaxis	1540
Treatment of Pulmonary Embolus	1542
FAT EMBOLISM	1544
BONE MARROW EMBOLISM	1545
AIR EMBOLISM	1545
AMNIOTIC FLUID EMBOLISM	1546
40. CHRONIC PULMONARY HEART DISEASE—COR PULMONALE	1551
PULMONARY FUNCTION TESTS AND LUNG VOLUMES	1551
INTERRELATION OF PULMONARY CIRCULATORY AND VENTILATORY FUNCTION AND COR PULMONALE	1562
ETIOLOGY OF CHRONIC COR PULMONALE	1565

PATHOLOGY AND PATHOGENESIS OF CHRONIC COR PULMONALE	1580
The Heart	1582
PATHOLOGIC PHYSIOLOGY	1588
CLINICAL FEATURES	1588
DIAGNOSIS OF CHRONIC COR PULMONALE	1591
TREATMENT	1593
41. THE HEART IN HYPERTHYROIDISM	1609
ETIOLOGY AND PATHOGENESIS	1609
Mechanism	1610
Methods By Which Hyperthyroidism May Affect the Heart	1610
PATHOLOGIC PHYSIOLOGY	1611
PATHOLOGY OF THE HEART IN GRAVES' DISEASE	1614
CLINICAL FEATURES OF THE HEART IN HYPERTHYROIDISM	1615
Symptoms	1615
Objective Manifestations	1616
THE DIAGNOSIS OF THYROCARDIAC DISEASE	1620
TREATMENT	1622
42. THE HEART AND CIRCULATION IN MYXEDEMA	1629
PATHOLOGY OF THE HEART	1630
PATHOLOGIC PHYSIOLOGY	1630
CLINICAL FEATURES OF MYXEDEMA HEART	1633
DIAGNOSIS	1637
TREATMENT	1638
43. OTHER ENDOCRINE, METABOLIC AND NUTRITIONAL DISTURBANCES	1642
THE PITUITARY	1642
Hyperfunction of the Anterior Pituitary. Acromegaly	1642
Pituitary Insufficiency—Simmonds' Disease	1643
THE ADRENAL GLANDS	1643
Hyperfunction of the Adrenal Cortex—Cushing's Syndrome	1643
Hyperaldosteronism	1644
Hypoaldosteronism	1646
Hyperfunction of the Adrenal Medulla—Pheochromocytoma, Paragan-	
glioma	1646
Hypofunction of the Adrenal Cortex—Adrenal Insufficiency—Addison's	
Disease	1652
THE HEART IN POTASSIUM DISTURBANCES	1654
Hyperkalemia	1655
Hypokalemia	1658
Acidosis and Alkalosis	1659
THE PARATHYROIDS	1659
Pathologic Physiology	1659
Hyperparathyroidism and Hypercalcemia	1659
Hypoparathyroidism and Hypocalcemia	1660
Magnesium	1660
TESTES AND OVARIES	1660

THYMUS	1661
THE PANCREAS	1661
Hyperinsulinism and Hypoglycemia	1661
Diabetes Mellitus	1662
Diabetic Acidosis	1663
HEMOCHROMATOSIS	1663
NUTRITIONAL DISTURBANCES	1664
Obesity	1664
Undernutrition and Starvation	1665
Vitamin Deficiency	1667
GLYCOGEN STORAGE DISEASE OF MYOCARDIUM (CARDIAC GLYCOGENOSIS)	1670
HURLER'S SYNDROME (MUCOPOLYSACCHARIDOSIS)	1671
FAMILIAL PSEUDOXANTHOMA ELASTICUM	1671
XANTHOMATOSIS AND HYPERCHOLESTEROLEMIA	1671
ACUTE PORPHYRIA	1672
GOUT	1672
HEART IN MALIGNANT CARCINOID	1672
44. THE HEART AND CIRCULATION IN ANEMIA	1678
PATHOLOGIC PHYSIOLOGY	1679
PATHOLOGY	1681
CLINICAL FEATURES RELATED TO THE CIRCULATION IN ANEMIA	1682
THE HEART IN SICKLE-CELL ANEMIA	1685
LEUKEMIA	1686
CARBON MONOXIDE POISONING	1686
POLYCYTHEMIA	1687
45. TRAUMATIC HEART DISEASE	1691
HEART DISEASE DUE TO PENETRATING LESIONS	1691
Pathology	1691
Clinical Features	1692
Diagnosis	1694
Prognosis and Treatment	1694
NONPENETRATING INJURIES OF THE HEART	1697
Etiology	1697
Pathology of Nonpenetrating Cardiac Trauma	1699
Clinical Features of Nonpenetrating Cardiac Trauma	1701
Diagnosis	1703
Prognosis	1703
Treatment	1704
46. CARDIAC TUMORS	1707
INCIDENCE	1707
CLASSIFICATION	1707
PATHOLOGY	1707
Primary Tumors	1707
Secondary (Metastatic) Cardiac Neoplasms	1710
CLINICAL MANIFESTATIONS OF CARDIAC TUMORS	1711

DIAGNOSIS	1715
TREATMENT	1716

47. FUNCTIONAL MANIFESTATIONS REFERRED TO THE HEART	1721
"NEUROCIRCULATORY ASTHENIA" OR "CARDIAC NEUROSIS"	1721
Definition	1721
Etiology and Pathogenesis	1721
Clinical Features	1723
Diagnosis	1724
Differential Diagnosis	1724
Prognosis	1724
Treatment	1724
ISOLATED AND TRANSIENT FUNCTIONAL CARDIAC SYMPTOMS	1725
OBJECTIVE FUNCTIONAL CARDIAC SIGNS	1725
HEART PHOBIAS	1726
FAINTING AND SYNCOPE	1726

50. II

INDE

PART VII. SPECIAL PROBLEMS IN HEART DISEASE

48. PREGNANCY AND HEART DISEASE	1731
PATHOLOGIC PHYSIOLOGY OF THE CIRCULATION IN PREGNANCY	1731
Significance of Circulatory Changes	1732
Circulatory Dynamics of Labor	1733
CARDIOVASCULAR MANIFESTATIONS DURING PREGNANCY	1733
DIAGNOSIS OF CARDIAC DISEASE IN PREGNANCY	1735
DIAGNOSIS OF HEART FAILURE	1736
PROGNOSIS OF CARDIAC DISEASE ASSOCIATED WITH PREGNANCY	1736
Fetal Mortality	1739
THE MANAGEMENT OF HEART DISEASE AND HEART FAILURE IN PREGNANCY	1740
Cardiovascular Corrective Surgery During Pregnancy	1741
CONDUCT OF LABOR	1742
INDICATIONS FOR DISCOURAGING PREGNANCY AND FOR PERFORMING THERAPEUTIC ABORTION	1743
49. SURGICAL PROCEDURES IN THE CARDIAC PATIENT	1746
FUNCTIONS OF THE CARDIOLOGIST	1746
CIRCULATORY RISKS IMPOSED BY SURGICAL PROCEDURES	1747
CARDIAC RISKS IMPOSED BY ANESTHESIA	1747
THE TYPE OF OPERATION	1748
THE TYPE OF CARDIAC DISEASE AND FUNCTIONAL CARDIAC STATUS	1750
THE CHOICE OF ANESTHESIA	1752
MANAGEMENT OF THE SURGICAL CARDIAC PATIENT	1754
Preoperative Management	1754
Management During Operation	1757
Postoperative Care	1760
OPEN HEART SURGERY	1762
Hypothermia	1763

Hyperbaric Oxygen (Oxygen under High Pressure—OHP)	1766
Pump-Oxygenators (Artificial Heart; Mechanical Heart)	1768
Autotransplantation of the Heart	1774
Cardiac Grafts. Homotransplantation	1775
Implantation of Artificial Heart (Total Cardiac Replacement)	1776
50. INSURANCE AND MEDICOLEGAL PROBLEMS IN CARDIAC DISEASE	1781
CARDIOVASCULAR EXAMINATION AND ACCEPTANCE FOR INSURANCE	1781
WORKMEN'S COMPENSATION AND HEART DISEASE	1782
LIFE, HEALTH AND ACCIDENT INSURANCE	1787
PERSONAL LITIGATION	1787
INDEX	i to l

GRAPHIC METHODS

of CARDIAC EXAMINATION
