Foreword	vii
Acknowledgements	viii
1. Introduction	1
Public health and social importance	1
AIDS in Africa	2
2. Etiology and pathogenesis	4
Human immunodeficiency virus (HIV)	4
Immunological abnormalities	8
Natural history of HIV-1 infection	9
Further reading	11
3. Epidemiology of HIV infection and AIDS	13
Overview of HIV epidemiology	13
Historical review of AIDS in Africa	14
Incidence and prevalence of HIV infection in Africa	15
Transmission	17
Interaction with other diseases	19
Further reading	19
4. Clinical spectrum of HIV infection	21
Classification of HIV infection	21
Acute retroviral illness	25
Asymptomatic HIV infection	26
Symptomatic HIV infection	26
Further reading	40
5. Opportunistic infections and tumours	43
Fungal infections	43
Parasitic infections	46

Bacterial infections	52
Viral infections	55
Kaposi sarcoma	57
Lymphoma	60
Further reading	60
6. HIV infection in children	63
Modes of transmission	63
Frequency and outcome of perinatal transmission	64
Clinical features of HIV-1 infection in children	65
AIDS case definition and classification system	67
Diagnosis of HIV infection in infants and children	68
Management of HIV-infected children	69
HIV-2 infection in children	69
Further reading	70
7. Diagnosing HIV infection and AIDS	72
Clinical diagnosis	72
Laboratory tests	74
Further reading	82
8. Management of patients	84
General considerations	84
Standard treatment guidelines	85
Asymptomatic carriers	86
Symptomatic HIV-infected patients	86
Prophylaxis	89
Therapy for HIV infection	92
Early identification of HIV status	93
Traditional medicine	94
Integrated services	94
Human resources and training	95
Psychological support	95
Further reading	96
9. Counselling and psychosocial support	97
What is counselling?	97
Why is counselling important?	97
Who can give counselling?	98
When is counselling necessary?	98
How to counsel	99
Listening actively	101

10. Prevention and control	104
Sexual transmission	104
Parenteral transmission	105
Perinatal transmission	106
Prevention of HIV transmission in the health care setting	106
Traditional practices	112
Surveillance	112
Further reading	112
Annex 1. CDC 1987 revision of case definition for AIDS for surveillance purposes	113
Annex 2. CDC classification system for HIV infection	122
