<b>Chapter 1. Electrophysiology of the Normal Heart</b> . . . . .	3
Basic Electric Theory . . . . .	3
The Cell as a Source of Electrical Potentials . . . . .	4
The Heart as a Source of Electrical Potentials . . . . .	5
Vectorial Presentation of the Electromotive Force of the Heart . . . . .	6
Clinical Recording of the Electromotive Force of the Heart in the Frontal Plane . . . . .	7
Standard Leads (L1, L2, L3) . . . . .	7
Unipolar Extremity Leads ( $aV_R$ , $aV_L$ , $aV_F$ ) . . . . .	8
Angular Relationships between the Frontal Plane Leads . . . . .	8
Triaxial System . . . . .	8
Hexaxial System . . . . .	8
Projection of the Hexaxial System on a Circle . . . . .	8
Clinical Recording of the Electromotive Force of the Heart in the Horizontal Plane (Precordial Leads $V_1$ to $V_6$ ) . . . . .	9
Derivation of the Mean Electrical Axis of the Electromotive Force of the Heart . . . . .	9
Plotting the Mean Electrical Axis . . . . .	11
Alternate Method for Plotting MEA . . . . .	11
Exercises in Plotting the Mean Electrical Axis . . . . .	11
Normal Range of the Mean Electrical Axis of QRS and T . . . . .	15
<b>Chapter 2. Technique for Taking the Electrocardiogram</b> . . . . .	16
Precautions . . . . .	16
Correct Electrode Placement for Chest Leads . . . . .	17
<b>Chapter 3. The Normal Electrocardiogram</b> . . . . .	18
Derivation of the Normal Electrocardiogram . . . . .	18
The P Wave . . . . .	18
The P-R Segment and P-R Interval . . . . .	18
The QRS . . . . .	18

Complex . . . . .	
The P Wave . . . . .	
The P-R Interval (P-Q) . . . . .	
The QRS (the Main Ventricular) . . . . .	
Mean Electrical Axis . . . . .	
The S-T Segment . . . . .	
The T Wave . . . . .	
The Q-T Interval . . . . .	
The U Wave . . . . .	
Upper Limits of Normal Values . . . . .	
Normal Q-T Interval (Table) . . . . .	
Conversion Chart—Heart Rate from Electrocardiograph . . . . .	
<b>Chapter 4. Electrophysiology of the Heart</b> . . . . .	
The Abnormal P Wave . . . . .	
Abnormal QRS . . . . .	
Myocardial Infarction . . . . .	
Left Bundle Branch Block . . . . .	
Right Bundle Branch Block . . . . .	
Left Ventricular Hypertrophy . . . . .	
Right Ventricular Hypertrophy . . . . .	
The Abnormal S-T Segment . . . . .	
The Abnormal T Wave . . . . .	
The Abnormal U Wave . . . . .	
<b>PART II</b>	
<b>DIFFERENTIAL DIAGNOSIS OF ABNORMALITIES</b>	
<b>Chapter 5. Differential Diagnosis of Arrhythmias</b> . . . . .	
Method for Examination of Electrocardiogram When Present . . . . .	

	PAGE
Key Page . . . . .	42
Arrhythmias Due to Alterations of:	
P-P Interval . . . . .	44
P-R Interval . . . . .	52
R-R Interval . . . . .	58
Arrhythmias Due to:	
Occasional Disturbances of the Dominant Rhythm . . . . .	68
<b>Chapter 6. Differential Diagnosis Based upon Abnormalities of QRS . . . . .</b>	<b>74</b>
Differential Diagnosis of the Q Wave . . . . .	75
Key Page . . . . .	75
The Q Wave in Leads I and aV <sub>L</sub> . . . . .	76
The Q Wave in aV <sub>F</sub> and L3 . . . . .	78
The Q Wave in the Right Precordial Leads . . . . .	82
The Q Wave in the Midprecordial Leads . . . . .	86
The Q Wave in the Left Precordial Leads . . . . .	90
Differential Diagnosis of the Abnormal QRS . . . . .	93
Key Page . . . . .	93
High Voltage in the Left Precordial Leads . . . . .	94
High Voltage in the Right Precordial Leads . . . . .	96
Low Voltage in All Leads . . . . .	98
Prolongation of Duration . . . . .	98
Rotation of Mean Electrical Axis . . . . .	106
<b>Chapter 7. Differential Diagnosis Based on Abnormalities of S-T Segment . . . . .</b>	<b>112</b>
Key Page . . . . .	113
S-T Segment Depression . . . . .	114
S-T Segment Elevation . . . . .	122
S-T Segment Abnormal Due to Alteration of Duration . . . . .	126
<b>Chapter 8. Differential Diagnosis Based upon Abnormalities of T Wave . . . . .</b>	<b>128</b>

	PAGE
Key Page . . . . .	129
Isolated T-Wave Changes . . . . .	130
T Upright in the Same Direction as the Main Deflection of the Ventricular Complex . . . . .	130
T Diphasic or Inverted . . . . .	132
<b>Chapter 9. Differential Diagnosis Based upon Serial Changes . . . . .</b>	<b>138</b>
Key Page . . . . .	138
Acute Serial Changes Limited to the QRS Complex . . . . .	140
Acute Serial Changes Limited to the S-T Segment . . . . .	148
Acute Serial Changes Limited to the T Wave . . . . .	154
Acute Simultaneous Serial Changes of Both QRS and T . . . . .	156
Acute Simultaneous Serial Changes in Both S-T and T . . . . .	162
Acute Simultaneous Serial Changes in QRS, S-T and T . . . . .	168

### PART III

#### CLINICAL CARDIOGRAPHY

<b>Chapter 10. Disturbances of the Rhythm of the Heart . . . . .</b>	<b>175</b>
Passive Rhythms. Depression of Rhythmicity . . . . .	175
Active Rhythms. Increased Irritability . . . . .	176
Conduction Defects and Block . . . . .	178
Chart of the Common Arrhythmias . . . . .	180
<b>Chapter 11. Abnormalities of QRS, S-T, and T . . . . .</b>	<b>192</b>
The Q Wave . . . . .	192
Differentiation of the Borderline Q Wave . . . . .	192
The Problem Deep Q Wave; Myocardial Infarction versus Electrical Position of the Heart . . . . .	193
The Q Wave in Esophageal Leads . . . . .	193

<b>Chapter 12. Clinical Indications . . . . .</b>	<b>193</b>
Coronary Artery Disease . . . . .	193
Angina Pectoris . . . . .	193
Acute Coronary Infarction . . . . .	193
Acute Myocardial Infarction . . . . .	193
Pericarditis . . . . .	193
Acute Coronary Thrombosis . . . . .	193
<b>Index . . . . .</b>	<b>193</b>
