

The Anatomy of the Medulla Oblongata	35
Fissures and Sulci	35
Nerve Roots	37
The Anatomy of the Pons	37
The Fourth Ventricle	38
The Mesencephalon	42
<i>The Cerebellum</i>	43
The Anatomy of the Cerebellum	43
<i>The Diencephalon</i>	47
Development	47
The Third Ventricle	48
The Thalamus	49
<i>The External Configuration of the Cerebral Hemispheres</i>	52
Development	52
Development of the Cerebral Cortex	53
Development of the Septum and Commissures	53
The Dorsolateral Surface of the Hemisphere	55
Lobes	56
The Frontal Lobe	57
The Temporal Lobe	57
The Parietal Lobe	58
The Occipital Lobe	58
The Insula	59
The Opercula	59
The Median and Basal Surfaces	59
Convolutions	62
<i>The Internal Configuration of the Cerebral Hemispheres</i>	62
The Corpus Callosum	63
The Lateral Ventricle	65

Chapter III

MENINGES AND BLOOD VESSELS OF THE CENTRAL NERVOUS SYSTEM	71
Arteries of the Brain	77
Venous Drainage	81
Vessels of Spinal Cord	83
Cerebral Angiography	85

Chapter IV

HISTOGENESIS OF THE NERVOUS SYSTEM	89
Early Stages in the Differentiation of the Neural Tube	89
The Development of the Neuron	91
Development of Afferent Neurons	93
Nerve Fiber Sheaths	94
Development of the Spinal Nerves	95

Chapter V

NEURONS AND NEUROGLIA	98
Form	99
Structure of Neurons	103
Interrelation of Neurons	108
The Neuron as a Trophic Unit	116
Degeneration and Regeneration of Nerve Fibers	117
Neuron Chains	120
Pathways through Higher Centers	121
<i>Neuroglia</i>	123

Chapter VI

THE SPINAL NERVES	128
Metamerism	129
The Structure of the Spinal Nerves	133
The Spinal Ganglia	135
Functional Classification of Nerve Fibers	137
Visceral Components	138
Somatic Efferent Components	139
Classification of the Somatic Afferent Fibers According to Function ..	140
Free Nerve Endings	142
Encapsulated Nerve Endings	143
Nerve Endings in the Hair Follicles	145
Proprioceptive Fibers and Sensory Nerve Endings	145
Sensation	146

Chapter VII

THE AUTONOMIC NERVOUS SYSTEM	150
Visceral Efferent Neurons	152
<i>The Autonomic Ganglia</i>	153
Termination of the Preganglionic Fibers	155
Termination of Postganglionic Fibers	155
The Autonomic Plexuses of the Thorax	160
The Cephalic Ganglionated Plexus	162
Visceral Reflexes	162

Chapter VIII

THE SPINAL CORD	166
The Spinal Cord in Section	166
The White Substance	168
Characteristics of the Several Regions of the Spinal Cord	169
<i>Microscopic Anatomy</i>	172
Neuroglia	172
White Substance	172

Gray Substance	173
Nerve Cells	174
The Spinal Reflex Mechanism	178
Intersegmental Reflex Arcs	179
Functional Considerations	181

Chapter IX

FIBER TRACTS OF THE SPINAL CORD	183
<i>The Intramedullary Course of the Dorsal Root Fibers</i>	184
Collaterals	186
<i>Afferent Paths in the Spinal Cord</i>	187
Proprioceptive Paths to the Cerebellum	188
Exteroceptive Sensations	189
The Conduction of Sensations of Pain, of Heat, and of Cold	190
Summary of the Sensory Pathways	193
Referred Pain	194
<i>Ascending and Descending Degeneration of the Spinal Cord</i>	194
<i>Long Descending Tracts of the Spinal Cord</i>	197
The Lateral Corticospinal Tract	198
Other Descending Tracts	199

Chapter X

THE STRUCTURE OF THE MEDULLA OBLONGATA	202
The Rearrangement within the Medulla Oblongata of the Structures Continued Upward from the Spinal Cord	204
The Pyramids and Their Decussation	207
The Medial Lemniscus and Its Decussation	208
Olivary Nuclei	211
Olivocerebellar Fibers	212

Chapter XI

INTERNAL STRUCTURE OF THE PONS	217
<i>The Basilar Part of the Pons</i>	217
<i>The Dorsal or Tegmental Part of the Pons</i>	220
The Cochlear Nuclei	220
The Vestibulocerebellar Fasciculus	221
The Nuclei of the Trigeminal Nerve	223

Chapter XII

THE INTERNAL STRUCTURE OF THE MESENCEPHALON	227
The Tegmentum	227
The Decussation of the Superior Cerebellar Peduncle	228
The Tegmental Decussations	231

The Lemnisci	232
The Central Gray Stratum	232
The Corpora Quadrigemina	234

Chapter XIII

THE CRANIAL NERVES AND THEIR NUCLEI	237
Functional Components	238
Longitudinal Nuclear Columns	241
<i>The Somatic Efferent Column</i>	242
<i>The Special Visceral Efferent Column</i>	245
<i>The General Visceral Efferent Column</i>	248
Nuclei of Origin and Terminal Nuclei	251
<i>The Visceral Afferent Column</i>	252
The Olfactory Apparatus	254
<i>The General Somatic Afferent Nuclei</i>	255
Exteroceptive Nuclei	255
<i>Special Somatic Afferent Nuclei</i>	258
Secondary Auditory Path	260
The Vestibular Nuclei	262
Secondary Vestibular Paths	264
<i>The Visual Apparatus</i>	264
The Optic Chiasma and Optic Tracts	266
The Geniculocalcarine Tract	267
Hemianopsia	267
<i>Summary of the Origin, Composition, and Connections of the Cranial Nerves</i> ..	269
Olfactory Nerve	270
Optic Nerve	270
Oculomotor Nerve	270
Trochlear Nerve	271
Trigeminal Nerve	271
Abducens Nerve	271
Facial Nerve and Nervus Intermedius	271
Stato-acoustic Nerve	272
The Vestibular Nerve	272
The Cochlear Nerve	272
The Glossopharyngeal Nerve	272
Vagus Nerve	272
Accessory Nerve	273
Hypoglossal Nerve	273

Chapter XIV

THE CEREBELLUM	274
Structure of the Cerebellum	275
The Nuclei of the Cerebellum	277
The Cerebellar Peduncles	278
Afferent Cerebellar Tracts	278
Efferent Cerebellar Tracts	281

<i>Histology of the Cerebellar Cortex</i>	282
Nerve Fibers	284
<i>Function of the Cerebellum</i>	285
Comparative Morphology and Function	286
Stimulation of the Cerebellum	287
Cerebellar Lesions	289

Chapter XV

THE DIENCEPHALON	292
Structure of the Thalamus	293
Cortico-thalamic Connections	298
Function	298
<i>The Subthalamus</i>	300
<i>The Epithalamus</i>	301
<i>The Hypothalamus</i>	302
The Neurohypophysis	302
Structure of the Hypothalamus	303
Nuclei	303
Afferent Nerve Fibers	306
Efferent Nerve Fibers	307
Functions of the Hypothalamus	307

Chapter XVI

THE INTERNAL STRUCTURE OF THE CEREBRAL HEMISPHERES	312
<i>The Basal Ganglia of the Telencephalon</i>	312
Nerve Fibers	316
Function	317
The Amygdaloid Body	319
<i>The Internal Capsule</i>	319
Dissections of the Internal Capsule	321
<i>The Medullary Center of the Cerebral Hemisphere</i>	322
Commissural Fibers	322
Projection Fibers	323
Association Fibers	324

Chapter XVII

THE RHINENCEPHALON	327
Olfactory Connections in Brief	329
Parts Seen on the Basal Surface of the Brain	330
The Piriform Area	332
The Amygdaloid Body	333
The Hippocampus	334
The Fornix	335
Structure and Connections of the Rhinencephalon	338
<i>The Olfactory Pathways</i>	344

Chapter XVIII

THE CEREBRAL CORTEX	347
Nerve Fibers	348
Lamination	350
Reverberating Circuits	352
Cortical Areas	352
<i>Cortical Localization of Function</i>	357
The Motor Cortex	357
Other Cortical Areas with Motor Functions	360
Cortical Representation of Motion	361
Pyramidal and Extrapyramidal Motor Pathways	363
Suppressor Zones	364
Cortical Autonomic Representation	366
The Sensory Projection Centers	367
The Olfactory and Gustatory Areas	372
Thalamocortical Connections	372
Functional Significance of the Cerebral Cortex	373
Speech and the Cerebral Cortex	376
The Cortex and Consciousness	379

Chapter XIX

THE GREAT AFFERENT AND EFFERENT SYSTEMS	383
<i>Exteroceptive Pathways to the Cerebral Cortex</i>	383
The Spinal Path for Sensations of Touch and Pressure	385
The Spinal Path for Pain and Temperature Sensations	386
The Exteroceptive Paths Associated with the Trigeminal Nerve	388
The Neural Mechanism for Hearing	388
The Neural Mechanism for Sight	391
<i>Proprioceptive Pathways</i>	391
The Spinal Proprioceptive Path to the Cerebral Cortex	392
Spinal Proprioceptive Paths to the Cerebellum	392
Cerebellar Connections of the Vestibular Nerve	394
<i>Efferent Paths</i>	394
<i>The Great Motor Path</i>	395
The Corticobulbar Tract	399
The Extrapyramidal Motor Paths	401
<i>The Corticopontocerebellar Path</i>	402
<i>The Cerebellorubrospinal Path</i>	403
<i>Reticular Formation</i>	404

Chapter XX

REFLEXES AND REFLEX ARCS	405
Reflex Arcs of the Spinal Cord	405
Vestibular Reflex Arc through the Medial Longitudinal Bundle	406
Pupillary Reactions	408
Respiration and Blood Pressure	410

Chapter XXI

CLINICAL ILLUSTRATIONS	419
Abnormalities of Motion	422
Pain	425
Abnormalities of Vision	430
SECTIONS OF THE BRAIN	449
Transverse Sections of the Brain Stem	449
Nuclei of the Brain Stem	450
Sagittal Sections through the Brain Stem	530
A LABORATORY OUTLINE OF NEUROANATOMY	545
<i>Introduction</i>	545
<i>Methods of Brain Dissection</i>	547
<i>Dissection of the Head of the Dogfish</i>	547
<i>The Brain of the Fetal Pig</i>	551
<i>General Topography of the Brain</i>	551
<i>Neurologic Stains</i>	551
<i>The Peripheral Nervous System</i>	553
<i>The Spinal Cord</i>	555
<i>The Cerebellum</i>	559
<i>Functional Analysis of the Brain Stem</i>	560
<i>Proprioceptive Paths and Centers</i>	560
<i>Exteroceptive Paths and Centers</i>	561
<i>Visceral Afferent Paths and Centers</i>	561
<i>Visceral Motor Centers</i>	561
<i>Somatic Motor Tracts and Centers</i>	562
<i>Cerebellar Connections</i>	562
<i>The Reticular Formation</i>	562
<i>Prosencephalon</i>	562
BIBIOGRAPHY	568
INDEX	595
