The epidemiologist

## VOLUME ONE

1	The epidemiologist and the clinician
2	Changing aspects of infectious diseases 1 Legionellosis; Kawasaki disease; Reye's syndrome; haemorrhagic shock and encephalopathy; toxic shock syndrome
3	Changing aspects of infectious diseases 2 Acute haemorrhagic conjunctivitis; acquired immune deficiency syndrome, AIDS
4	Food poisoning: salmonellosis
5	Typhoid and paratyphoid fevers
6	Bacillary dysentery
7	Cholera
8	Gastroenteritis 1 Giardiasis; campylobacter enteritis; cryptosporidiosis
9	Gastroenteritis 2 Viral and <i>Esch. coli</i> enteritis; travellers' diarrhoea; transferable drug resistance
10	Botulism
11	Smallpox: obituary and caution
12	Chickenpox (varicella)
13	Herpes zoster
14	Herpes simplex
15	Acute respiratory infections
16	Legionnaires' disease
17	Tuberculosis: non-tuberculous mycobacteriosis
18	Measles
19	Rubella
20	Mumps (epidemic parotitis)
	Index

## VOLUME TWO

1	21	Viral hepatitis	655
	22	Enterovirus infections Coxsackie viruses and echoviruses	753
	23	Acute meningo-encephalitis Acute disseminated encephalomyelitis; arbovirus encephalitis; post-infection encephalitis; encephalitis lethargica	782
3	24	Lymphocytic meningitis Aseptic meningitis; viral meningitis; lymphocytic choriomeningitis	810
	22	25 Acute poliomyelitis	817
	43	26 Acute bacterial or pyogenic meningitis	857
100	27	Other meningococcal syndromes	914
165	28	Whooping cough (pertussis)	927
193	29	Tetanus	959
	30	Anthrax	983
231	31	Rabies	1004
	32	Plague: tularaemia	1036
	33	Rickettsial disease: typhus	1070
	34	Q fever	1098
276	35	Psittacosis	1116
327	36	Brucellosis Undulant fever Malta or Mediterranean fever	1130
347	37	Leptospiral infections	1159
353	38	Diphtheria	1183
376	39	Infectious mononucleosis	1210
387	40	Cytomegalovirus disease	1231
413	41	Toxoplasmosis	1253
475	42	Streptococcal infections	1275
492	43	Erythema multiforme exudativum Stevens-Johnson syndrome	1300
541	44	Immunization	1306
581		Index	II
