Commonly Used Conversion Factors	Front & Back Cover
---	-----------------------------------

Section I: Overview of SI Units	1
--	----------

Section II: Conversion Nomograms	11
---	-----------

Adrenocorticotropin (ACTH)	13
--------------------------------------	----

Albumin	14
-------------------	----

Ammonia (as NH_3)	15
---------------------------------------	----

Bilirubin	16
---------------------	----

Calcium	17
-------------------	----

Cholesterol	18
-----------------------	----

Complement C3	19
-------------------------	----

Complement C4	20
-------------------------	----

Cortisol	21
--------------------	----

Cortisol, Free	22
--------------------------	----

Creatinine, plasma, serum	23
-------------------------------------	----

Creatinine, urine	24
-----------------------------	----

Creatinine Clearance	25
--------------------------------	----

Diazepam	26
--------------------	----

Digoxin	27
-------------------	----

Dilantin (Phenytoin)	28
--------------------------------	----

Estradiol	29
---------------------	----

Ethanol	30
-------------------	----

Folate	31
Gases (pCO ₂ & pO ₂)	32
Glucose	33
Hematocrit	34
Hemoglobin	35
Immunoglobulins	36
Iron & Iron Binding Capacity	37
Magnesium	38
N-acetylprocainamide	39
Phenobarbital	40
Phosphate	41
Procainamide	42
Progesterone	43
Protein, Total	44
T ₃ Uptake	45
Testosterone	46
Theophylline	47
Thyroxine	48
Transferrin	49
Triglycerides	50
Urea Nitrogen	51
Uric Acid	52

Section III: Conversion Tables	53
