<p>1. EMBRYOLOGY OF THE REPRODUCTIVE TRACT 1</p> <p>Development of the ovary 3-5</p> <p>Development of uterus and fallopian tubes 6, 7</p> <p>Development of external genitalia 8, 9</p> <p>Development of testis 10, 11</p> <p>Development of male external genitalia 12, 13</p>	<p>4. EXAMINATION OF THE PATIENT 65</p> <p>Taking the history 66</p> <p>Normal menstrual history 67</p> <p>Abnormal menstrual history 68</p> <p>Complaints of pain 69</p> <p>Examination of the breasts 70</p> <p>Abdominal examination 71-73</p> <p>Examination of the vulva 74</p> <p>Bimanual pelvic examination 75</p> <p>Speculum examination 76, 77</p> <p>Laparoscopy 78-80</p> <p>Lymphography and gynaecography 81</p>
<p>2. ANATOMY OF THE REPRODUCTIVE TRACT 15</p> <p>Perineum 16</p> <p>Vulva 17, 18</p> <p>Bartholin's gland 19</p> <p>Muscles of the perineum 20</p> <p>Urogenital diaphragm 21</p> <p>Anatomy of the pelvis 22</p> <p>Muscles of the pelvis 23</p> <p>Pelvic diaphragm 24</p> <p>Pelvic fascia 25</p> <p>Vagina 26-28</p> <p>Uterus 29-35</p> <p>Fallopian tube 36</p> <p>Broad ligament 37</p> <p>Ovary 38-40</p> <p>Changes in the genital tract with age 41</p> <p>Blood supply of the pelvis 42-44</p> <p>Lymphatic drainage of the genital tract 45</p> <p>Nerves of the pelvis 46</p> <p>Autonomic nerve supply of the pelvis 47</p>	<p>5. ABNORMALITIES OF MENSTRUATION 82</p> <p>Irregular pubertal bleeding 83</p> <p>Dysfunctional uterine bleeding 84-87</p> <p>Total hysterectomy 88, 89</p> <p>Subtotal hysterectomy 90</p> <p>Abnormal vaginal bleeding 91</p> <p>Amenorrhoea 92-96</p> <p>Endocrine causes of amenorrhoea 97</p> <p>Adreno-genital syndrome 98-100</p> <p>Polycystic ovary disease 101-103</p> <p>Genetic causes of amenorrhoea 104-106</p> <p>Laboratory detection of genetic defects 107</p> <p>Genetic abnormalities 108</p> <p>Sex chromosome additions 109</p> <p>Testicular feminisation 110</p> <p>Cryptomenorrhoea 111</p> <p>Virilism 112</p> <p>Hirsutism 113-115</p> <p>Dysmenorrhoea 116-118</p> <p>Presacral neurectomy 119</p> <p>Pre-menstrual tension syndrome 120, 121</p>
<p>3. PHYSIOLOGY OF THE REPRODUCTIVE TRACT 49</p> <p>Ovulation 51-53</p> <p>Endometrial cycle 54</p> <p>Cyclic changes in vagina and tube 55</p> <p>Cyclic ovarian hormonal changes 56</p> <p>Control of ovulation 57-59</p> <p>Action of ovarian hormones 60, 61</p> <p>The menopause 62-64</p>	<p>6. CONGENITAL ABNORMALITIES 123</p> <p>Abnormalities of ovary and tube 125</p>

Abnormalities of the tube and uterus	126	Treatment	193
Abnormalities of uterus	127	Results of treatment	194
Abnormalities of the vagina	128	Indications for surgery	195
Abnormalities of the vulva	129	Combined radiotherapy and surgery	196
7. DISEASES OF VULVA AND PERINEUM	131	Scheme of treatment of cervical carcinoma	197
Vulval dystrophy-Kraurosis	132, 133	Carcinoma of the cervical stump	197
Leukoplakia	134, 135	X-rays	198, 199
Lichen planus	136	Linear accelerator	200
Localised scleroderma and Lichen simplex	137	Betatron	201
Cyst of Bartholin's gland	138, 139	Gamma rays	202, 203
Simple tumours of the vulva	140-142	Effects of irradiation	204
Carcinoma of the vulva	143-149	Radiotherapy of cervical carcinoma	205
Simple vulvectomy	150	Radiation dosage	206
Diseases of the urethra	151-153	External radiation	207, 208
Operations on the perineum	154	Radioactive isotopes	209
Repair of deficient perineum	155	Intracavitary irradiation	210
Repair of complete tear	156	The Manchester method	211
Operation for enlarging the vaginal outlet	157	The Stockholm method	212
8. DISEASES OF VAGINA	159	Dosage to bladder and rectum	213
Vaginal discharge	160-164	Protection of normal tissue	214
Non-specific vaginitis	165	Afterloading techniques	215, 216
Cysts of the vagina	166	Preparation for radiotherapy	217
Carcinoma of vagina	167, 168	Early complications	218
Plastic surgery of the vagina	169, 170	Late complications	219
9. DISEASES OF CERVIX	171	Radiosensitisation	220
Cervical erosion and cervicitis	173, 174	Operations for cervical carcinoma	221
Cone biopsy of cervix	175	Radical hysterectomy	222, 223
Cervical polyps	176	Radical vaginal hysterectomy	224, 225
Colposcopy	177	Pelvic exenteration	226, 227
Squamous metaplasia	178	Combined abdominal-vaginal operation	228
Dysplasia	179	Preparation for radical surgery	228
Carcinoma in situ	180, 181	Complications of radical surgery	229
Prognosis in dysplasia and carcinoma in situ	182	Pain in advanced cancer	230, 231
Microinvasive carcinoma	183	10. DISEASES OF UTERUS	233
The positive smear in pregnancy	183	Uterine polyps	235
Carcinoma of the uterine cervix	184	Fibroids	236-239
Histology	185, 186	Adenomyosis	240
Aetiology	187	Carcinoma of the endometrium	241
Spread	188	Histology	242
Symptoms	189	Spread	243
Differential diagnosis	190	Staging	244
Clinical staging	191, 192	Clinical features	245
		Treatment	246, 247

Recurrence	248	Control of stress incontinence	305
Sarcoma of the uterus	249, 250		
11. DISPLACEMENTS OF UTERUS	251	13. THE URETER	307
Backward displacements of the uterus	253, 254	Anatomy	308, 309
Symptoms of displacement	255	Blood supply	310
Treatment of displacement	256, 257	Injury to the ureter	311, 312
Sling operations on uterus	258	Prevention of injury	313, 314
Chronic inversion of the uterus	259-261	Ureter in vaginal operations	315
Uterovaginal prolapse	262, 263	Repair of damaged ureter	316-318
Vaginal prolapse	264	Treatment of damaged ureter	319
Prolapse of the posterior wall	265	Urinary diversion operations	320, 321
Cervical prolapse	266	Complications of diversion procedure	321
Changes following prolapse	267	The ileal conduit	322
Clinical features of prolapse	268		
Differential diagnosis of prolapse	269	14. FISTULA	323
Pessary treatment	270, 271	Urinary fistula	324
Anterior colporrhaphy (and repair of cystocele)	272, 273	Causes	325
Repair of uterine prolapse	274, 275	Pathology	326
Posterior colpoperineorrhaphy	276	Symptoms	327
Repair of enterocele	277, 278	Examination	328
Repair by vaginal hysterectomy	279, 280	Treatment	329
Le Fort's operation for prolapse	281	Operative treatment	330, 331
Selection of patients for operation	282	The flap-splitting technique	332
Post-operative complications	283	Vaginal vault fistula	333
Late complications	284	Urethral fistula	334
		Interposition operations	335
		Interposition of the gracilis muscle	336, 337
		Transvesical repair	338
12. INCONTINENCE OF URINE	285		
Physiology of micturition	286, 287	15. DISEASES OF BROAD LIGAMENT AND FALLOPIAN TUBE	339
Mechanism of voiding	288	Broad ligament cysts	341, 342
Incontinence of urine	289, 290	Carcinoma of fallopian tubes	343
Frequency	291	Sterilisation	344, 345
Investigation of incontinence	292	Laparoscopic sterilisation	346
Tests of bladder function	293, 294	Restoring tubal patency	347, 348
Treatment of stress incontinence	295	Ectopic pregnancy	349
Physiotherapy	296	Sites of implantation	350
Drugs in stress incontinence	297	Rupture of the tube	351
Vaginal urethroplasty	298	Diagnosis of tubal pregnancy	352, 353
Urethroplasty with implant	299	Treatment	354
Marshall-Marchetti-Krantz operation	300		
Aldridge's operation	301	16. DISEASES OF THE OVARY	355
Moir's operation	302	Clinical features of ovarian tumours	356
Other treatments for stress incontinence	303	Physical signs	357, 358
Electrical control of stress incontinence	304	Differential diagnosis	359-362
		Torsion of the pedicle	363, 364
		Rupture of ovarian cyst	365, 366

Extraperitoneal development of ovarian tumours	367	Classification	418
Surgical treatment of ovarian tumours	368, 369	Dilatation and curettage ('D and C')	419
Dealing with the tumour pedicle	370	Complications of dilatation	420
Mucinous cystadenoma	371	Incomplete abortion	421
Serous cystadenoma	372	Therapeutic abortion	422, 423
Ovarian tumours	373	Medical induction of abortion	424, 425
Germ cell tumours	373-375	Technique of PGE2 abortion	426
Carcinoma of the ovary	376	Therapeutic abortion	427
Krukenberg tumour	377	Habitual abortion	428, 429
Hormone-producing tumours	378	Septic abortion	430
Androgen-producing tumours	379, 380	Septic shock	431, 432
Other hormone-producing tumours	381	Monitoring CVP	433
Clinical staging of malignant tumours	382	Hydatidiform mole	434-437
Cytotoxic drugs	383-385	Invasive mole	438
		Choriocarcinoma	439
		Treatment of choriocarcinoma	440
17. SEXUAL PROBLEMS	387	19. ENDOMETRIOSIS AND PELVIC INFLAMMATION	441
Infertility	388	Endometriosis	443-446
Investigation of the wife	389, 390	Pelvic inflammation	447, 448
Tests for ovulation	391, 392	Salpingo-oophoritis	449
Compatibility of sperms and cervical mucus	393	Pelvic cellulitis	450, 451
Hysterosalpingography	394, 395	Abscess formation in pelvic cellulitis	452
Drugs increasing FSH/LH secretion	396	Gonorrhoea	453
Treatment with gonadotrophins	397	Syphilis	454-456
Artificial insemination	398	Two tropical venereal diseases	457
Infertility	399	Chlamydial infections	458
Infertility—Summary	400	Genital tuberculosis	459-461
Psychosexual problems	401	Venous thrombosis	462-463
Apareunia	402	Clinical features	464
Oral contraception	403-407	Diagnosis	465, 466
Intra-uterine devices (IUD)	408-409	Prevention	467
The vaginal diaphragm	410	Treatment	468, 469
Vaginal spermicides	411	Anticoagulant treatment	470
Rhythm method	411	Surgical treatment of venous thrombosis	471
Contraception in the male	412	Pulmonary embolism	472-475
Medico-legal problems	413, 414	Treatment of pulmonary embolism	476
18. ABORTION	415	Index	477
Abortion	416, 417
