SECTION I

Anatomy and Embryology	<i>Page</i>
<i>Anatomy</i>	
Respiratory System <i>Plate 1</i>	3
Bony Thorax <i>Plate 2</i>	4
Rib Characteristics and Costo- vertebral Articulations <i>Plate 3</i>	5
Anterior Wall of Thorax <i>Plates 4-6</i>	6-8
Dorsal Aspect of Thorax <i>Plates 7-8</i>	9-10
Lateral Aspect of Thorax <i>Plate 8</i>	10
Intercostal Nerves and Arteries <i>Plate 9</i>	11
Diaphragm (Viewed from Above) <i>Plate 10</i>	12
Topography of Lungs <i>Plates 11-12</i>	13-14
Medial Surface of Lungs <i>Plate 13</i>	15
Bronchopulmonary Segments <i>Plates 14-15</i>	16-17
Relations of Trachea and Main Bronchi <i>Plate 16</i>	18
Bronchial Arteries <i>Plate 17</i>	19
Mediastinum <i>Plates 18-19</i>	20-21
Innervation of Tracheobronchial Tree <i>Plate 20</i>	22
Structure of Trachea and Major Bronchi <i>Plate 21</i>	23
Intrapulmonary Airways <i>Plate 22</i>	24
Structure of Bronchi and Bronchioles; Light Microscopy <i>Plate 23</i>	25
Ultrastructure of Tracheal, Bronchial and Bronchiolar Epithelium <i>Plate 24</i>	26
Bronchial Submucosal Glands <i>Plate 25</i>	27
Intrapulmonary Blood Circulation <i>Plate 26</i>	28
Ultrastructure of Pulmonary Alveoli and Capillaries <i>Plate 27</i>	29
Type II Alveolar Cell and Surface- Active Layer <i>Plate 28</i>	30
Pulmonary Vascular Endothelium <i>Plate 29</i>	31
Lymphatic Drainage of Lungs and Pleura <i>Plates 30-31</i>	32-33

SECTION I (continued)

<i>Embryology</i>	
Development of Respiratory System	34-43
—Developing Respiratory Tract at 4 to 5 Weeks <i>Plate 32</i>	34
—Sagittal Section; Bronchi and Lungs at 5 to 6 Weeks <i>Plate 33</i>	35
—Developing Respiratory Tract at 6 to 7 Weeks <i>Plate 34</i>	36
—Larynx, Tracheobronchial Tree and Lungs at 7 to 10 Weeks <i>Plate 35</i>	37
—Sagittal Section at 6 to 7 Weeks <i>Plate 36</i>	38
—Transverse Sections at 5 to 8 Weeks <i>Plate 37</i>	39
—Innervation of Tongue, Neck and Diaphragm at 5 to 6 Weeks; Origins of Diaphragm <i>Plate 38</i>	40
—Terminal Air Tube at 20 and 24 Weeks <i>Plate 39</i>	41
—Alveolar-Capillary Relationships at 8 Years <i>Plate 40</i>	42
—Surfactant Effects <i>Plate 41</i>	43

SECTION II

Physiology	
Pulmonary Mechanics and Gas Exchange	47-71
—Muscles of Inspiration and Expiration <i>Plate 1</i>	47
—Spirometry <i>Plate 2</i>	48
—Determination of Functional Residual Capacity <i>Plate 3</i>	49
—Forces During Quiet Breathing <i>Plate 4</i>	50
—Measurement of Elastic Properties of Lung <i>Plate 5</i>	51
—Surface Forces in Lung <i>Plate 6</i>	53
—Elastic Properties of Respiratory System <i>Plate 7</i>	54
—Distribution of Airway Resistance <i>Plate 8</i>	55
—Patterns of Airflow <i>Plate 9</i>	56
—Expiratory Flow-Volume Curves; Isovolume Pressure-Flow Curves; Determinants of Maximal Expiratory Flow <i>Plate 10</i>	57
—Forced Expiratory Vital Capacity Maneuver; Maximal Expiratory Flow-Volume Curves <i>Plate 11</i>	58

Page

SECTION II (continued)

—Work of Breathing <i>Plate 12</i>	59
—Pleural Pressure Gradient; Closing Volume <i>Plate 13</i>	60
—Vascular Pressure in Systemic and Pulmonary Circulations; Distribution of Pulmonary Blood Flow <i>Plate 14</i>	61
—Pulmonary Vascular Resistance <i>Plate 15</i>	62
—Transfer of O ₂ and CO ₂ Between Alveolar Air and Capillary Blood <i>Plate 16</i>	63
—Blood Gas Relationships During Normal Ventilation and Alveolar Hypoventilation <i>Plate 17</i>	64
—Ventilation-Perfusion Relationships <i>Plate 18</i>	65
—Shunts (Normal and Abnormal) <i>Plate 19</i>	66
—Oxygen Transport <i>Plate 20</i>	67
—Regulation of Acid-Base Balance <i>Plate 21</i>	68
Pulmonary Response to Oxidant Injury <i>Plate 22</i>	69
Inactivation (Serotonin Metabolism) <i>Plate 23</i>	70
Activation of Precursors (Renin- Angiotensin System) <i>Plate 24</i>	71
Control and Disorders of Respiration	72
—Chemical Control of Respiration <i>Plate 25</i>	73
—Neural Control of Breathing <i>Plate 26</i>	74
—Respiratory Response to Exercise <i>Plate 27</i>	75
—Effects of High Altitude on Respiratory Mechanism <i>Plate 28</i>	76
—Hyperventilation and Hypoventilation <i>Plate 29</i>	77
—Periodic Breathing (Cheyne-Stokes) <i>Plate 30</i>	78
—Sites of Pathologic Disturbances in Control of Breathing <i>Plate 31</i>	79
SECTION III	
Radiology	
Roentgenologic Examination of Lungs	85

SECTION III (continued)	Page
—Posteroanterior View; Left Anterior Oblique View <i>Plate 1</i>	85
—Lateral View; Right Anterior Oblique View <i>Plate 2</i>	86
—Lordotic View <i>Plate 3</i>	87
—Lateral Decubitus View <i>Plate 4</i>	88
—Penetrated Grid Roentgenograms <i>Plate 5</i>	89
—Tomography <i>Plate 6</i>	90
—Bronchography: Technique <i>Plate 7</i>	91
—Right Bronchial Tree as Revealed by Bronchograms <i>Plate 8</i>	92
—Left Bronchial Tree as Revealed by Bronchograms <i>Plate 9</i>	93
—Pulmonary Angiography <i>Plate 10</i>	94
—Radioactive Scanning Methods <i>Plate 11</i>	95
—Perfusion and Ventilation Scans <i>Plate 12</i>	96
—Patterns of Lobar Collapse; Right Lung <i>Plate 13</i>	98
—Patterns of Lobar Collapse; Left Lung <i>Plate 14</i>	99
—Consolidation Patterns of Each Segment of Lungs <i>Plate 15</i>	101
—Alveolar Patterns of Pulmonary Disease <i>Plate 16</i>	102
—Interstitial Patterns of Pulmonary Disease <i>Plate 17</i>	103

SECTION IV

Diseases and Pathology

Congenital Malformations

Congenital Deformities of Thoracic Cage <i>Plate 1</i>	107
Kyphoscoliosis <i>Plates 2-3</i>	108-109
Congenital Diaphragmatic Hernia <i>Plate 4</i>	110
Tracheoesophageal Fistula and Tracheal Anomalies <i>Plate 5</i>	111
Pulmonary Agenesis, Aplasia and Hypoplasia <i>Plate 6</i>	112
Congenital Bronchogenic and Pulmonary Cysts <i>Plate 7</i>	113
Bronchopulmonary Sequestration <i>Plate 8</i>	114
Congenital Lobar Emphysema <i>Plate 9</i>	115

SECTION IV (continued)

Diseases of the Airways

Laryngeal Granuloma and Tracheal Stenosis <i>Plate 10</i>	116
Tracheal Resection and Anastomosis <i>Plate 11</i>	117
Plastic Reconstruction of Trachea <i>Plate 12</i>	118
Bronchial Asthma	119-135
—Extrinsic Allergic Asthma: Clinical Features <i>Plate 13</i>	119
—Intrinsic Asthma: Clinical Features <i>Plate 14</i>	120
—Postulated Mechanisms of Airway Hyperreactivity <i>Plate 15</i>	121
—Mechanism of Type I Hypersensitivity <i>Plate 16</i>	122
—Catecholamine Action on α and β Receptors <i>Plate 17</i>	123
—Theory of Catecholamine Effects and β -Adrenergic Blockade <i>Plate 18</i>	124
—Corticosteroid Actions <i>Plate 19</i>	125
—Common Precipitating Factors <i>Plate 20</i>	126
—Pathology of Status Asthmaticus <i>Plate 21</i>	127
—Differential Diagnosis <i>Plate 22</i>	128
—Sputum <i>Plate 23</i>	129
—Management of Acute Asthmatic Attack <i>Plate 24</i>	131
—Blood Gas and pH Relationships <i>Plate 25</i>	132
—General Management Principles <i>Plate 26</i>	133
—Skin Testing for Allergy; Hyposensitization <i>Plate 27</i>	135
Chronic Obstructive Pulmonary Disease (COPD)	136-153
—Interrelationship of Chronic Bronchitis and Emphysema <i>Plate 28</i>	136
—Chronic Bronchitis <i>Plate 29</i>	137
—Centriacinar and Panacinar Emphysema <i>Plates 30-32</i>	138-140
—Pulmonary Function in Obstructive Disease <i>Plate 33</i>	141
—Pursed-Lip Breathing in COPD <i>Plate 34</i>	142
—Effect of Emphysema on Compliance and Diffusing Capacity <i>Plate 35</i>	143

SECTION IV (continued)

—Cor Pulmonale Due to COPD <i>Plate 36</i>	
—Small Airway Disease and Smoking <i>Plates 37-38</i>	145
—Small Airway Disease and Viral Infections <i>Plate 38</i>	
—Hypothesis of the Role of α_1 -Antitrypsin <i>Plate 39</i>	
—The Pink Puffer <i>Plate 40</i>	
—The Blue Bloater <i>Plate 41</i>	
—Roentgenograms in COPD <i>Plate 42</i>	
—General Measures in Management of COPD <i>Plate 43</i>	
—Specific Measures in Management of COPD <i>Plate 44</i>	
—Emphysematous Cyst <i>Plate 45</i>	
Bronchiectasis <i>Plates 46-47</i>	154
Cystic Fibrosis of the Pancreas <i>Plates 48-49</i>	156
<i>Intrathoracic Tumors</i>	
Classification of Bronchogenic Carcinoma <i>Plate 50</i>	
Squamous Cell Carcinoma of Lung <i>Plate 51</i>	
Large Cell Anaplastic Bronchogenic Carcinoma <i>Plate 52</i>	
Small Cell Anaplastic Bronchogenic Carcinoma <i>Plate 53</i>	
Adenocarcinoma of Lung <i>Plate 54</i>	
Pancoast's Syndrome <i>Plate 55</i>	
Superior Vena Cava Syndrome <i>Plate 56</i>	
Lymphangitic Spread and Cavitation of Lung Cancer <i>Plate 57</i>	
Endocrine Manifestations of Bronchogenic Carcinoma <i>Plate 58</i>	
Neuromuscular and Connective Tissue Manifestations of Bronchogenic Carcinoma <i>Plate 59</i>	
Metastatic Carcinoma to Lung <i>Plate 60</i>	
Alveolar Cell Carcinoma <i>Plate 61</i>	
Bronchial Adenoma <i>Plate 62</i>	
Benign Tumors of Lung <i>Plate 63</i>	
Tumors of Mediastinum <i>Plate 64</i>	
Mesothelioma of Pleura <i>Plate 65</i>	
<i>Infectious Diseases of the Lung</i>	
Pneumococcal Pneumonia <i>Plates 66-67</i>	175

SECTION IV (continued)	Page
Klebsiella (Friedländer's) Pneumonia <i>Plate 68</i>	177
Staphylococcal Pneumonia <i>Plate 69</i>	178
Influenza Virus and Its Epidemiology <i>Plate 70</i>	179
Influenzal Pneumonia <i>Plate 71</i>	181
Varicella Pneumonia <i>Plate 72</i>	182
Cytomegalovirus Pneumonia <i>Plate 73</i>	183
Legionnaires' Disease <i>Plate 74</i>	184
Pneumocystis Carinii Pneumonia <i>Plate 75</i>	185
Mycoplasmal Pneumonia (Primary Atypical Pneumonia) <i>Plate 76</i>	187
Lung Abscess <i>Plates 77-78</i>	188-189
Actinomycosis <i>Plate 79</i>	190
Nocardiosis <i>Plate 80</i>	191
Histoplasmosis <i>Plates 81-82</i>	192-193
Coccidioidomycosis <i>Plate 83</i>	194
North American Blastomycosis <i>Plate 84</i>	195
South American Blastomycosis <i>Plate 85</i>	196
Cryptococcosis (Torulosis) <i>Plate 86</i>	197
Aspergillosis <i>Plate 87</i>	198
Tuberculosis	199-207
—Dissemination of Tuberculosis <i>Plate 88</i>	199
—Evolution of Tubercle <i>Plate 89</i>	200
—Initial (Primary) Tuberculous Complex <i>Plate 90</i>	201
—Pulmonary Tuberculosis: Progressive Pathology <i>Plate 91</i>	202
—Pulmonary Tuberculosis: Extensive Cavitary Disease <i>Plate 92</i>	203
—Miliary Tuberculosis <i>Plate 93</i>	204
—Tuberculin Testing <i>Plate 94</i>	205
—Sputum Examination <i>Plate 95</i>	206
—Sputum Culture <i>Plate 96</i>	207
Inhalation Diseases of the Lung	
Silicosis <i>Plate 97</i>	208
Silicoruberculosis; Rheumatoid Pneumoconiosis <i>Plate 98</i>	209
Coal Worker's Lung <i>Plate 99</i>	210
Asbestosis <i>Plate 100</i>	211
Reactions Produced by Metals and Mixed Dusts <i>Plate 101</i>	212
Cadmium Inhalation Effects; Chronic Beryllium Disease <i>Plate 102</i>	213

SECTION IV (continued)	Page
Various Mineral Pneumoconioses <i>Plate 103</i>	214
Irritant Gas Effects on Lungs <i>Plate 104</i>	215
Hypersensitivity Pneumonitis <i>Plates 105-106</i>	216-217
Pulmonary Thromboembolic Disease	
Cascade of Clotting Factors and Sites of Action of Heparin and Warfarin <i>Plate 107</i>	219
Clinical Manifestations of Leg Vein Thrombosis <i>Plate 108</i>	220
Fibrin Degradation Products in Diagnosis of Pulmonary Emboli <i>Plate 109</i>	221
Phlebography for Diagnosis of Leg Vein Thrombosis (Venography) <i>Plate 110</i>	222
Radioactive Fibrinogen Scan for Diagnosis of Leg Vein Thrombosis <i>Plate 111</i>	223
Ultrasound in Diagnosis of Acute Venous Thrombosis <i>Plate 112</i>	224
Plethysmography in Diagnosis of Leg Vein Thrombosis <i>Plate 113</i>	225
Pulmonary Embolism	226-235
—Sources of Pulmonary Emboli <i>Plate 114</i>	226
—Predisposing Factors for Pulmonary Embolism <i>Plate 115</i>	227
—Embolism of Lesser Degree Without Infarction <i>Plate 116</i>	228
—Massive Embolization <i>Plate 117</i>	229
—Pulmonary Infarction <i>Plate 118</i>	230
—Chronic Effects of Pulmonary Embolism (Cor Pulmonale) <i>Plate 119</i>	231
—Medical Prophylaxis and Therapy <i>Plate 120</i>	232
—Tests for Monitoring Anticoagulant Therapy <i>Plate 121</i>	233
—Surgical Defenses Against Massive Pulmonary Embolism <i>Plate 122</i>	234
—Extravascular Sources of Pulmonary Emboli <i>Plate 123</i>	235
Pulmonary Edema <i>Plates 124-125</i>	236-237
Thoracic Trauma	
Thoracic Cage Injuries <i>Plate 126</i>	238
Flail Chest <i>Plate 127</i>	239
Diaphragmatic Injuries <i>Plate 128</i>	240

SECTION IV (continued)	Page
Rupture of Trachea or Major Bronchi <i>Plate 129</i>	241
Subcutaneous Emphysema; Traumatic Asphyxia <i>Plate 130</i>	242
Open Pneumothorax <i>Plate 131</i>	243
Tension Pneumothorax <i>Plate 132</i>	244
Hemothorax <i>Plate 133</i>	245
Chylothorax <i>Plate 134</i>	246
Pulmonary Contusion <i>Plate 135</i>	247
Posttraumatic Pulmonary Insufficiency (Shock Lung) <i>Plate 136</i>	248
Diseases of Unknown Etiology	
Hyaline Membrane Disease <i>Plates 137-139</i>	250
Idiopathic Diffuse Interstitial Pulmonary Fibrosis (Hamman-Rich Disease) <i>Plate 140</i>	251
Sarcoidosis <i>Plates 141-142</i>	255
Idiopathic Pulmonary Hemosiderosis <i>Plate 143</i>	256
Alveolar Proteinosis <i>Plate 144</i>	257
Connective Tissue Disorders	
Lung Involvement in Rheumatoid Arthritis <i>Plate 145</i>	258
Lung Involvement in Progressive Systemic Sclerosis <i>Plate 146</i>	259
Lung Involvement in Systemic Lupus Erythematosus <i>Plate 147</i>	260
Lung Involvement in Dermatomyositis and Polymyositis <i>Plate 148</i>	261
Polyarteritis Nodosa, Wegener's Granulomatosis and Allergic Granulomatosis <i>Plate 149</i>	262
SECTION V	
Diagnostic and Therapeutic Procedures	
Tests of Pulmonary Function <i>Plates 1-2</i>	267
Psychotherapy and Administration of Bronchodilator Therapy <i>Plates 3-4</i>	269
Upper Airway Obstruction; Heimlich Maneuver <i>Plates 5-6</i>	27
Parent Airways <i>Plate 7</i>	27
Endotracheal Intubation <i>Plate 8</i>	27
Tracheostomy <i>Plate 9</i>	27

SECTION V (continued)	Page
Morbidity of Endotracheal Intubation and Tracheostomy <i>Plate 10</i>	277
Bronchofiberscopic Suction and Lavage <i>Plate 11</i>	278
Nasotracheobronchial Suction <i>Plate 12</i>	279
Bronchofiberscopy <i>Plate 13</i>	280
Bronchofiberscopic Views <i>Plate 14</i>	281
Nomenclature for Peripheral Bronchi <i>Plate 15</i>	282
Rigid Bronchoscopy <i>Plate 16</i>	283
Introduction of Chest Drainage Tubes <i>Plate 17</i>	284

SECTION V (continued)	Page
Underwater-Seal Drainage of Chest; Heimlich Valve <i>Plate 18</i>	285
Postural Drainage <i>Plates 19-20</i>	286-287
Breathing Exercises <i>Plate 21</i>	288
Arterial Blood Gas Analysis <i>Plate 22</i>	289
Oxygen Therapy in Acute Respiratory Failure <i>Plate 23</i>	291
Methods of Oxygen Administration <i>Plate 24</i>	292
Ambulatory and Home Use of Oxygen <i>Plate 25</i>	293
Mechanical Ventilation <i>Plate 26</i>	294

SECTION V (continued)	Page
Mediastinoscopy <i>Plate 27</i>	295
Mediastinotomy <i>Plate 28</i>	296
Pneumonectomy <i>Plates 29-30</i>	297-298
Lobectomy <i>Plate 31</i>	299
Resection and Biopsy <i>Plate 32</i>	300
Removal of Mediastinal Tumors <i>Plate 33</i>	301
Selected References	303-
Subject Index	313-
