## *Evaluation of Liver Function in Clinical Practice*

1. Introduction . . . . .	7
Physiologic-Anatomic Units of the Liver	
<i>Circulatory System</i>	
<i>Biliary Passages</i>	
<i>Reticuloendothelial Cells</i>	
<i>Parenchymal Cells</i>	
2. Clinical Recognition of Liver Disease . . . . .	12
3. Laboratory Recognition of Liver Disease . . . . .	20
4. Circulatory and Lymphatic Systems . . . . .	23
Functional Evaluation	
<i>Blood Flow</i>	
<i>Pressure Measurements</i>	
<i>Radiologic Visualization of Hepatic Vascular Patterns</i>	
<i>Morphologic Study</i>	
5. Biliary Passages . . . . .	30
Functional Evaluation	
<i>Bilirubin Studies</i>	
<i>Other Excretory Products</i>	
<i>Dyes</i>	
<i>Cholecystography and Cholangiography</i>	
<i>Histologic Studies</i>	
6. Reticuloendothelial Cells . . . . .	38
Functional Evaluation	

7. Parenchymal Cells . . . . .	41
Functional Evaluation	
<i>Serum Concentration of Certain Substances</i>	
<i>Serum Constituents Changed in Liver Damage</i>	
<i>Enzyme Release</i>	
<i>Metabolic Performance</i>	
<i>Tissue Levels</i>	
<i>Morphology</i>	
8. Functional Evaluation of the Liver in Practice . . . . .	51
Subclinical Liver Disease	
Jaundice	
<i>Unconjugated Hyperbilirubinemia</i>	
<i>Conjugated Hyperbilirubinemia</i>	
<i>Mixed Hyperbilirubinemia</i>	
Hepatitis	
Fatty Liver and Other Metabolic Alterations	
Cirrhosis	
Neoplastic Lesions	
9. Drug-Induced Liver Injury . . . . .	74
Role of the Liver in Drug Metabolism	
Effect of Hepatic Dysfunction on Drug Metabolism	
Mechanism of Drug-Induced Hepatotoxicity	
Manifestations of Drug-Induced Hepatotoxicity	
Clinical Considerations	
Appendix . . . . .	80
Bibliography . . . . .	82
Index . . . . .	89
