

Table of Contents

Preface		xiii
SI Units of Measurement in the Biologic Range		xiv
1. The Microbial World		1
Protists 2	Prokaryotes 3	
2. Cell Structure		6
Optical Methods 6	Staining 27	
Eukaryotic Cell Structure 7	Morphologic Changes During Growth 29	
Prokaryotic Cell Structure 9		
3. The Major Groups of Bacteria		32
Principles of Classification 32	Descriptions of the Principal Groups of Bacteria 34	
4. Microbial Genetics		38
The Physical Basis of Heredity 38	Transduction by Bacteriophage 48	
The Prokaryotic Chromosome 38	Plasmid-Mediated Conjugation 49	
Mutation 41	Genes of Structure & Genes of Regulation 57	
Intercellular Transfer & Genetic Recombination in Bacteria 45	Genetics of Drug Resistance 57	
Transformation 46	Insertion Sequence (IS) Elements 59	
5. Microbial Metabolism		61
The Role of Metabolism in Biosynthesis & Growth 61	The Regulation of Metabolic Pathways 72	
Metabolic Pathways Unique to Micro- organisms 64	The Regulation of RNA Synthesis 77	
Patterns of Microbial Energy-Yielding Metabolism 69	The Regulation of DNA Synthesis & Cell Division 78	
6. Cultivation of Microorganisms		80
Nutrition 80	Cultivation Methods 83	
Environmental Factors Affecting Growth 81		
7. The Growth & Death of Microorganisms		86
Definition & Measurement of Growth 86	Synchronous Growth 88	
Exponential Growth 86	Growth Parameters 89	
The Growth Curve 87	Definition & Measurement of Death 89	
The Maintenance of Cells in Exponential Phase 88	Antimicrobial Agents 91	
8. The Microbiology of Special Environments		96
Water 96	Air 102	
Milk 98	Soil 104	
Foods 99		

9. Bacteriophage

108

- Life Cycles of Phage & Host 108
- Methods of Study 109
- Properties of Phage 109
- Phage Reproduction 110

- Replication of RNA Phages 111
- Phage Genetics 112
- Lysogeny 112

10. Antimicrobial Chemotherapy

117

- Mechanisms of Action of Clinically Used Antimicrobial Drugs 117
- Resistance to Antimicrobial Drugs 120
- Origin of Drug Resistance 121
- Drug Dependence 123
- Antimicrobial Activity in Vitro 123
- Antimicrobial Activity in Vivo 124

- Drug-Parasite Relationships 124
- Host-Parasite Relationships 125
- Clinical Use of Antibiotics 126
- Combined Antibiotic Action 126
- Chemoprophylaxis 127
- Disinfectants 128
- Antimicrobial Drugs for Systemic Administration 128

11. Host-Parasite Relationships

145

- Infection 145
- Attributes of Microorganisms That Enable Them to Cause Disease 145
- Attributes of the Host That Determine Resistance to Microorganisms 148

- Some Mechanisms of Nonspecific Host Resistance 148
- Resistance & Immunity 151
- Natural Immunity 151
- Acquired Immunity 152
- Genetic Influences 153

12. Immunology: I. Antigens & Antibodies

154

- Definitions & Cellular Basis of Immune Responses 154
- Definitions 154
- The Cellular Basis of Immune Responses 154
- Antibodies: Structure & Formation 157
- Structure of Immunoglobulins 158
- Antigen-Antibody Reactions 163
- Serologic Reactions 165
- Precipitation Reactions 165
- Gel Diffusion Tests 166
- Agglutination Reactions 166
- The Antiglobulin (Coombs) Test 167
- Toxin-Antitoxin Reactions 167
- Absorption Reactions 168
- Inhibition Reactions 168

- Immunofluorescence (Fluorescent Antibody Tests, FA) 168
- Electrophoresis Methods 168
- Radioimmunoassay (RIA) 169
- Enzyme-Linked Immunoassay 169
- Other Types of Serologic Reactions 169
- The Complement System 170
- Complement-Mediated Reactions 171
- The Complement Fixation Test 171
- Recommended Active Immunization 172
- Recommended Schedule for Routine Active Immunization of Children 172
- Recommended Immunization of Adults for Travel 172

13. Immunology: II. Antibody-Mediated & Cell-Mediated (Hypersensitivity & Immunity) Reactions

175

- Antibody-Mediated Hypersensitivity 175
- Anaphylaxis 175
- Arthus Reaction 177
- Serum Sickness 177
- Immune Complex Disease 177
- Drug Hypersensitivity 178
- Cell-Mediated Hypersensitivity & Immunity 179
- Tuberculin Hypersensitivity 179
- Passive Transfer of Cell-Mediated Hypersensitivity 179
- Induction of Cell-Mediated Hypersensitivity 180
- Tests to Evaluate Cell-Mediated Hypersensitivity or Immunity 180

- "Allergy of Infection": Cell-Mediated Hypersensitivity Employed in Diagnosis of Infection 181
- Relationship of Cell-Mediated Reactions & Immunity & Resistance to Infection 182
- Contact Allergy to Drugs & Simple Chemicals 182
- Role of Lipids, Waxes, & Adjuvants in the Development of Cell-Mediated Reactions 182
- Extrinsic Allergic Alveolitis (Chronic Recurrent Lung Disease) 183
- Interference With Cell-Mediated or Antibody-Mediated Hypersensitivity or Immunity 183
- Autoimmune Diseases 184
- Transplantation Immunity 186
- Tumor Immunity 188

14. Pyogenic Cocci	190
The Staphylococci 190	
The Streptococci 194	
The Pneumococci 200	
The Neisseriae 203	
	<i>Neisseria meningitidis</i> (Meningococcus) 203
	<i>Neisseria gonorrhoeae</i> (Gonococcus) 205
	Other Neisseriae 206
15. Gram-Positive Bacilli	208
Aerobic Sporeforming Bacilli 208	
Anthrax 208	
Anaerobic Sporeforming Bacilli 210	
The Clostridia 210	
	<i>Clostridium botulinum</i> 210
	<i>Clostridium tetani</i> 211
	The Clostridia of Gas Gangrene 213
	Clostridial Pseudomembranous Colitis 214
16. Corynebacteria	215
17. Mycobacteria	220
<i>Mycobacterium tuberculosis</i> 220	
Other Mycobacteria 225	
	Atypical Mycobacteria 225
	<i>M. leprae</i> 226
18. Enteric Gram-Negative Microorganisms	228
Endotoxins of Gram-Negative Bacteria 228	
Exotoxins Produced by Aerobic Gram-Negative Bacteria 230	
The Coliform Bacteria 231	
The <i>Proteus</i> Group 234	
	The <i>Pseudomonas</i> Group 234
	The Salmonellae 235
	The Shigellae 238
	The Vibrios 239
19. Small Gram-Negative Rods	243
The Brucellae 243	
The Pasteurellae 245	
The Hemophilic Bacteria 249	
	<i>Haemophilus influenzae</i> 249
	<i>Bordetella</i> (<i>Haemophilus</i>) <i>pertussis</i> 250
	Other Organisms of the <i>Haemophilus</i> group 252
20. Spirochetes & Other Spiral Microorganisms	254
<i>Treponema pallidum</i> 254	
Diseases Related to Syphilis 257	
Other Spirochetal Organisms 257	
<i>Borrelia recurrentis</i> 257	
Leptospirae 259	
	<i>Spirillum minus</i> (<i>Spirillum morsus muris</i>) 260
	Spirochetes of the Normal Mouth & Mucous Membranes 260
	Fusospirochetal Disease 260
21. Rickettsial Diseases	262
22. Chlamydiae	268
Psittacosis (Ornithosis) 270	
Ocular, Genital, & Respiratory Infections due to <i>Chlamydia trachomatis</i> 272	
Trachoma 272	
Genital Chlamydial Infections & Inclusion Conjunctivitis 273	
	Respiratory Tract Involvement With <i>C. trachomatis</i> 273
	Lymphogranuloma Venereum (LGV) 274
	Other Agents of the Group 275
23. Miscellaneous Pathogenic Microorganisms	276
Mycoplasmas (PPLo) & Wall-Defective Microbial Variants 276	
<i>Legionella pneumophila</i> 278	
<i>Streptobacillus moniliformis</i> 279	
<i>Listeria monocytogenes</i> 279	
<i>Erysipelothrix insidiosa</i> (<i>Erysipelothrix rhusiopathiae</i>) 280	
	<i>Acinetobacter</i> (Mima, Herellea) 280
	<i>Bartonella bacilliformis</i> 280
	<i>Bacteroides</i> 280
	<i>Pseudomonas</i> (<i>Actinobacillus</i>) <i>mallei</i> & <i>Pseudomonas pseudomallei</i> 281
	<i>Aeromonas hydrophila</i> 281

24. Normal Microbial Flora of the Human Body	283
Role of the Resident Flora 283	
Normal Flora of the Skin 283	
Normal Flora of the Mouth & Upper Respiratory Tract 284	
Normal Flora of the Intestinal Tract 285	
Normal Flora of the Urethra 285	
Normal Flora of the Vagina 285	
Normal Flora of the Eye (Conjunctiva) 286	
25. Medical Mycology	287
Structures of Fungi 287	
Superficial Mycoses 289	
Other Superficial Mycoses 292	
Subcutaneous Mycoses 292	
1. <i>Sporothrix schenckii</i> 292	
2. Chromomycosis 293	
3. Mycetoma 294	
Systemic Mycoses 295	
1. <i>Coccidioides immitis</i> 295	
2. <i>Histoplasma capsulatum</i> 296	
3. <i>Blastomyces dermatitidis</i> 298	
4. <i>Paracoccidioides brasiliensis</i> (<i>Blastomyces brasiliensis</i>) 299	
Opportunistic Mycoses 299	
1. <i>Candida albicans</i> 300	
2. <i>Cryptococcus neoformans</i> 301	
3. Aspergillosis 303	
4. Zygomycosis (Mucormycosis, Phycomycosis) 303	
Actinomycetes 303	
1. <i>Actinomyces israelii</i> 303	
2. <i>Nocardia asteroides</i> & Related Species 305	
Hypersensitivity to Fungi 306	
Mycotoxins 306	
26. Principles of Diagnostic Medical Microbiology	307
Communication Between Physician & Laboratory 307	
Specimens 307	
Selection of Laboratory Investigations 308	
The Demonstration of an Infectious Agent 308	
Anaerobic Infections 315	
Serologic Tests & the Demonstration of Specific Antibody 316	
Skin Tests 318	
Nonspecific Clinical Laboratory Tests 320	
Laboratory Aids in the Selection of Antimicrobial Therapy 321	
Gram & Acid-Fast Staining Methods 324	
27. General Properties of Viruses	325
(A detailed Table of Contents of this chapter is presented on p 325)	
28. Isolation of Viruses From Clinical Specimens	364
Considerations in the Diagnosis of Viral Diseases 364	
Direct Examination of Clinical Material 365	
Solid-Phase Immunoassays 365	
Virus Isolation Technic 366	
Specimens for Study 366	
Preservation of Viruses 366	
Preparation of Inocula 368	
Animal Inoculation 368	
Cultivation in Cell Culture 368	
Embryonated Eggs 369	
Examination of Embryos 370	
29. Serologic Diagnosis & Immunologic Detection of Virus Infections	371
Neutralization (Nt) Tests 372	
Quantitative Neutralization Tests 372	
The Neutralization Test in Cell Culture 374	
Neutralization Tests in Eggs 374	
Complement Fixation (CF) Tests 375	
Immune Adherence Hemagglutination (IAHA) Assay 375	
Hemagglutination Inhibition (HI) Tests 376	
Standards & Titration 376	
The Diagnostic Agglutination Inhibition Test 377	
Passive Hemagglutination Test 377	
Immunofluorescence Test 378	
Immunodiffusion Test 378	
Counterimmunoelectrophoresis Test 378	
Radioimmunoassay 379	
Enzyme-Linked Immunosorbent Assay (ELISA) 380	
Immune Electron Microscopy 380	
Diagnosis of Infectious Mononucleosis 381	
Heterophil Agglutination Test 381	
Mononucleosis Spot Test 381	
Tests for Dermal Hypersensitivity (Skin Tests) 381	

30. Arthropod-Borne (Arbo) Viral Diseases	386
Togavirus Encephalitis (SLE, EEE, WEE) 388	Hemorrhagic Fever 398
Venezuelan Equine Encephalitis 393	Lassa Fever 399
Bunyavirus Encephalitis (California Encephalitis) 393	Sandfly Fever (Pappataci Fever, <i>Phlebotomus</i> Fever) 400
West Nile Fever 394	Colorado Tick Fever (Mountain Fever, Tick Fever) 400
Yellow Fever 394	Rift Valley Fever (Enzootic Hepatitis) 401
Dengue (Breakbone Fever) 397	
31. Picornavirus Family (Enterovirus & Rhinovirus Groups)	403
Enterovirus Group 404	New Enterovirus Types 413
Poliomyelitis 404	Rhinovirus Group 414
Coxsackieviruses 409	Foot-and-Mouth Disease (Aphthovirus of Cattle) 415
Echovirus 412	
32. Hepatitis Viruses	417
33. Rabies & Other Viral Diseases of the Nervous System; Slow Viruses	432
Rabies 432	Encephalomyocarditis Virus Infection (Mengo Fever) 439
Aseptic Meningitis 437	Slow Virus Diseases: Chronic Viral Diseases of the CNS & Other Progressive Degenerative Disorders 439
Lymphocytic Choriomeningitis 438	
Encephalitis Lethargica (von Economo's Disease) 438	
Epidemic Neuromyasthenia (Benign Myalgic Encephalitis) 439	
34. Orthomyxovirus (Influenza) & Coronavirus Families	444
Orthomyxovirus Family 444	Coronavirus Family 454
Influenza 445	
35. Paramyxovirus Family & Rubella Virus	456
Mumps (Epidemic Parotitis) 457	Rubella (German Measles) 464
Parainfluenza Virus Infections 459	1. Postnatal Rubella 464
Newcastle Disease Conjunctivitis 460	2. Congenital Rubella Syndrome 465
Measles (Rubeola) 460	3. Control of Rubella 466
Respiratory Syncytial (RS) Virus 463	
36. Poxvirus Family	468
Smallpox & Related Viral Infections of Humans 468	Monkeypox 476
Variola & Vaccinia 468	Yaba Monkey Virus 476
Cowpox 476	Molluscum Contagiosum 477
37. Adenovirus Family	478
38. Herpesvirus Family	484
Herpes Simplex (Herpes Labialis, Herpes Genitalis & Many Other Syndromes) 484	EB Herpesvirus (Infectious Mononucleosis, Burkitt's Lymphoma, Nasopharyngeal Carcinoma) 493
Varicella-Zoster Virus 489	B Virus (Herpesvirus of Old World Monkeys) 495
Varicella (Chickenpox) & Zoster (Herpes Zoster, Shingles, Zona) 489	Marmoset Herpesvirus (Herpesvirus of New World Monkeys) 496
Cytomegalovirus (Cytomegalic Inclusion Disease, Salivary Gland Virus Disease) 491
