

Contents

Medical Terminology	1
Radiation Physics and X-ray Technology	2
X-rays	2
The Radiograph (Roentgenogram)	3
Radiography and Fluoroscopy	5
Other Imaging Systems Using Ionizing Radiation	10
X-ray Examination with Contrast Media	10
The Structure of the Human Organism	13
Radiological Demonstration	13
The Skeleton	15
Radiological Demonstration	18
The Axial Skeleton	19
Radiological Demonstration	25
The Skeleton of the Extremities	25
Radiological Demonstration	27
The Skull	27
Radiological Demonstration	30
The Muscles	32
Radiological Demonstration	34
The Respiratory Organs	36
Radiological Demonstration	38
The Heart and Circulatory System	39
The Blood	39
The Heart	40
The Circulatory System	42
Radiological Demonstration	43
Nomenclature	45
The Digestive System	47
Radiological Demonstration	51
The Urinary System	54
Radiological Demonstration	55
The Reproductive Organs	58
Radiological Demonstration	60
The Nervous System	62
Radiological Demonstration	64

The Sense Organs	66
The Eye	66
The Ear	67
Radiological Demonstration	68
The Endocrine System	69
Radiological Demonstration	71
The Lymphatic System	72
Radiological Demonstration	74
Designation of Special Radiological Examination Methods	75
Designation of Direction and Position in X-ray Technology	86
Radiological Considerations	89
Radiation Hazards	89
Radiation Protection	91
Appendix: Radiographic Exposures	95
Bibliography	134
