

CONTENTS

Preface	v
Chapter 1. Introduction	3
<i>A. Historical Background</i>	3
<i>B. Applications of Epidemiology</i>	5
<i>C. The Epidemiological Approach in Cancer</i>	11
Chapter 2. Some General Concepts of Cancer	13
<i>A. Definition and Classification of Cancer</i>	13
<i>B. Latent Period</i>	15
<i>C. Classification of Tumors</i>	18
Chapter 3. Morbidity and Mortality Studies	27
<i>A. Introduction</i>	27
<i>B. Coverage and Quality of Diagnostic Services</i>	27
<i>C. Measurement of Frequency of Occurrence</i>	29
<i>D. Morbidity Studies</i>	32
<i>E. Mortality Studies</i>	46
Chapter 4. Retrospective and Prospective Studies	69
<i>A. Retrospective Studies</i>	69
<i>B. Prospective Studies</i>	79
Chapter 5. Derivation of Biological (Etiological) Inferences	85
<i>A. Hypotheses Derived from Statistical Relationships</i>	85
<i>B. Methods of Distinguishing between Hypotheses</i>	88
<i>C. General Comment</i>	98
Appendix 1. Statistical Procedures	101
<i>A. Introduction</i>	101
<i>B. Age-Adjustment of Mortality and Morbidity Rates</i>	102
<i>C. Sampling of Areas and Groups</i>	107
<i>D. Sampling Variability</i>	117
<i>E. Tests of Hypotheses for Proportions</i>	126
<i>F. Methods of Controlling Extraneous Factors</i>	134
Appendix 2. World Health Organization Classification of Diseases— Neoplasms	141
Appendix 3. The Index Date	153
References	155
Index	163
