

# Table of Contents

## General Technique

<b>A. Introduction</b> . . . . .	1
I. Historical Review. H. WILLENEGGER . . . . .	1
II. Objectives and Hazards of Internal Fixation. M. E. MÜLLER . . . . .	6
III. Theoretical and Practical Principles of Rigid Internal Fixation. M. E. MÜLLER . . . . .	7
a) Anatomical Reduction . . . . .	7
b) Rigid Fixation of the Fragments . . . . .	8
c) Vascularization of the Bone Fragments . . . . .	17
<b>B. Operative Technique and Postoperative Management</b> . . . . .	20
I. Basic Principles of Operative Technique. M. E. MÜLLER. . . . .	20
II. Principles of Postoperative Care. M. E. MÜLLER . . . . .	22
III. Follow-up Examinations. M. E. MÜLLER . . . . .	23
IV. Timing of the Operation. M. E. MÜLLER . . . . .	25
V. Removal of the Metal Used for Internal Fixation. M. E. MÜLLER . . . . .	26
<b>C. Instruments and their Use</b> . . . . .	27
I. Metallurgical Considerations. F. STRAUMANN and S. STEINEMANN . . . . .	27
1. Corrosion Resistance of Metals . . . . .	28
2. Corrosion in Living Tissues . . . . .	30
3. Local Effects of Corrosion on the Tissues (Metallosis) . . . . .	30
4. Metals Used in Practice . . . . .	32
5. The Manufacture of the AOI Implants and Instruments . . . . .	34
II. Instruments. M. E. MÜLLER . . . . .	35
1. General Considerations . . . . .	35
2. Cerclage Wiring, Pinning with KIRSCHNER Wires and Traction Absorbing Wiring . . . . .	37
3. Screw Fixation . . . . .	38
a) Technique of Screw Fixation . . . . .	46
b) Indications for Screw Fixation . . . . .	46
4. Compression Fixation with Plates . . . . .	47
5. Medullary Nailing . . . . .	51
a) Indications for Medullary Nailing . . . . .	52
b) Technique of Medullary Nailing of the Tibia . . . . .	55
6. Angulated Blade Plates . . . . .	58
7. Compression Fixation with External Compressors . . . . .	63
8. General Instruments . . . . .	67
a) The AOI Set of Instruments . . . . .	67
b) Cortical Bone Set . . . . .	69
c) Cancellous Bone Set . . . . .	70
d) Compression Plate Set . . . . .	71
e) General Hip Instrument Set and Angulated Plates for Fractures . . . . .	72
f) Intramedullary Reaming Instrument Set . . . . .	73
g) Medullary Nails . . . . .	73
h) Impaction-Extraction Set for Medullary Nails . . . . .	73
i) External Compression Instruments . . . . .	73
k) General Instruments . . . . .	74

<b>Special Fractures</b>	
<b>I. Fractures of the Tibia. M. ALLGÖWER</b> . . . . .	77
1. Introduction . . . . .	77
2. Operative Procedures . . . . .	77
a) Fractures of the Shaft . . . . .	83
b) Fractures of the Lower Quarter of the Tibia . . . . .	94
c) Fractures of the Proximal Quarter of the Tibia . . . . .	94
3. Indications for Internal Fixation in Adolescents . . . . .	97
4. Soft Tissue Considerations in Timing Operations for Tibial Fractures . . . . .	99
5. Technical Details in the Care of the Soft Tissues . . . . .	102
6. Postoperative Treatment of Lower Leg Fractures . . . . .	108
7. Removal of Metal Implants Following Internal Fixation in the Leg . . . . .	108
8. Complications of Medullary Nailing with Special Reference to the Tibia. R. SCHNEIDER . . . . .	109
<b>II. Malleolar Fractures. H. WILLENEGGER and B. G. WEBER</b> . . . . .	112
1. Functional Anatomy . . . . .	112
2. Pathological and Physiological Considerations . . . . .	114
3. Clinical Aspects . . . . .	116
4. Pros and Cons of Operative Treatment . . . . .	119
5. Classification of Malleolar Fractures . . . . .	120
6. Operative Technique . . . . .	126
a) General Technique . . . . .	126
b) Special Operative Technique . . . . .	127
α) Management of the Fibula . . . . .	128
β) Surgical Treatment of the Inferior Tibiofibular Joint . . . . .	131
γ) Management of the Medial Malleolus . . . . .	134
c) Postoperative Treatment . . . . .	140
<b>III. Fractures of the Femur. M. ALLGÖWER</b> . . . . .	146
1. Introduction . . . . .	146
2. Positioning . . . . .	146
3. Approach . . . . .	147
4. Fractures of the Middle Third of the Shaft . . . . .	147
5. Fractures of the Lower Third and of the Femoral Condyles . . . . .	152
<b>IV. Fractures of the Patella. M. E. MÜLLER</b> . . . . .	155
<b>V. Fractures of the Forearm</b> . . . . .	159
1. Fractures of the Shaft of the Radius and Ulna. H. R. BLOCH . . . . .	159
2. Fractures of the Proximal End of the Ulna and of the Lower End of the Radius. B. G. WEBER . . . . .	166
a) Fractures of the Olecranon . . . . .	166
b) Monteggia Fractures . . . . .	170
c) Fractures of the Lower End of the Radius . . . . .	171
<b>VI. The Fractured Scaphoid. H. WILLENEGGER</b> . . . . .	174
1. Physiology and Pathology . . . . .	174
2. Indications for Surgery . . . . .	177
3. Screwing of the Scaphoid . . . . .	179
<b>VII. Fractures of the Humerus. W. BANDI and A. MUMENTHALER</b> . . . . .	185
1. Soft Tissues and Surgical Access to the Bone . . . . .	185
2. Technique of Internal Fixation . . . . .	188
3. Supracondylar Fractures of the Humerus . . . . .	196
<b>VIII. Fractures in the Region of the Hip. M. E. MÜLLER</b> . . . . .	206
1. Fractures of the Pelvis . . . . .	206
2. Subcapital Fractures of the Femoral Neck . . . . .	207
3. Pertrochanteric Fractures . . . . .	219

## Supplement

I. Internal Fixation of Compound Fractures. M. E. MÜLLER . . . . .	226
II. Principles of Antibiotic Therapy and the Treatment of Infection Following Internal Fixation. M. ALLGÖWER . . . . .	233
1. Surgical Principles when Infection Follows Internal Fixation . . . . .	233
2. Treatment of Infection with Antibiotics . . . . .	233
a) General . . . . .	233
b) Principles in the Use of Antibiotics . . . . .	235
c) Local Application of Antibiotics (Irrigation Drainage). H. WILLENEGGER . . . . .	236
III. The Problem of Shock in Accident Surgery. M. ALLGÖWER . . . . .	242
1. Diagnosis of Shock . . . . .	242
2. Pathogenesis of Posttraumatic Circulatory Disturbances . . . . .	243
3. Treatment of Shock . . . . .	246
4. Indications for Surgery in Patients with Shock . . . . .	249
Literature . . . . .	250
Subject Index . . . . .	269
